

# Table of Contents

<b>Editor's Preface</b>	<b>i</b>
<b>Lectures on Estimation Theory</b>	<b>1</b>
<b>Chapter 1. Review of <math>L^2</math> theory</b>	<b>2</b>
Lecture 1. Review of $L^2$ geometry	2
Lecture 2. Orthogonal projection	4
Lecture 3. $L^2(S,A,P)$	7
Lecture 4. Orthogonal projection in $L^2(S,A,P)$	8
Lecture 5. Formulation of the estimation problem	10
<b>Chapter 2. Bayes Estimation</b>	<b>14</b>
Lecture 6. Bayes estimates	14
Lecture 7. Bayes estimates (continued)	16
Lecture 8. Bayes estimates and maximum likelihood estimates	18
Lecture 9. Example: binomial sampling	20
Lecture 10. Example: negative binomial sampling	23
<b>Chapter 3. Unbiased Estimation</b>	<b>25</b>
Lecture 11. Unbiased estimates and orthogonal projections on the space spanned by likelihood ratios	25
Lecture 12. LMVUE and UMVUE	27
<b>Chapter 4. The Score Function, Fisher Information and Bounds</b>	<b>30</b>
Lecture 13. Score function, Fisher information, Bhattacharya bound and Cramér-Rao bound	30
Lecture 14. Heuristics for maximum likelihood estimates	32
Lecture 15. Necessary conditions for the attainment of the Cramér-Rao bound and Chapman-Robbins bound (one-parameter case)	35
<b>Chapter 5. Sufficient Conditions for the Attainment of the Cramér-Rao     Bound and the Bhattacharya Bound</b>	<b>38</b>
Lecture 16. Exact statement of the Cramér-Rao inequality and Bhattacharya inequality	38
Lecture 17. One-parameter exponential family and sufficient conditions for the attainment of the bounds	40
Lecture 18. Examples	43

<b>Chapter 6. Multi-Parameter Case</b>	<b>46</b>
Lecture 19. Vector-valued score functions, Fisher information and the Cramér-Rao inequality	46
Lecture 20. Heuristics for maximum likelihood estimates in the multi-parameter case	48
Lecture 21. Example	50
Lecture 22. Exact statement of the Cramér-Rao inequality in the multi-parameter case	52
Lecture 23. Metrics in the parameter space	54
Lecture 24. Multi-parameter exponential family	56
<b>Chapter 7. Score Function, MLE and Related Issues</b>	<b>59</b>
Lecture 25. Using the score function	59
Lecture 26. Examples	62
Lecture 27. Review of heuristics for maximum likelihood estimates	64
<b>Chapter 8. The Asymptotic Distribution and Asymptotic Efficiency of MLE and Related Estimators</b>	<b>67</b>
Lecture 28. Asymptotic distribution of MLE, super-efficiency example	67
Lecture 29. Fisher's bound for asymptotic variance and asymptotic optimality of the MLE	69
Lecture 30. Multi-parameter case	72
<b>References</b>	<b>75</b>
<b>Appendix</b>	
Raghu Raj Bahadur 1924-1997, by Stephen M. Stigler	76
Bibliography of Bahadur's Publications	80
