Institute of Mathematical Statistics

Lecture Notes–Monograph Series

Editorial Board
Andrew D. Barbour, John A. Rice,
Robert J. Serfling (Editor), and William E. Strawderman

The production of the *IMS Lecture Notes–Monograph Series* is managed by the IMS Business Office: Jessica Utts, IMS Treasurer, and Jose L. Gonzalez, IMS Business Manager.

Library of Congress Catalog Card Number: 91-77910

International Standard Book Number 0-940600-27-7

TABLE OF CONTENTS

Preamble iii

Participants iv

Introduction vi

I. L. S. Andersen
Inference for hidden Markov models 1

II. M. Clyde & D. Strauss
Logistic regression for spatial pair-potential models 14

III. N. Cressie
Modeling growth with random sets 31

IV. J. L. Denny & A. L. Wright
Inference about the shape of neighboring points in fields 46

V. J. M. Dinten, X. Guyon & J. F. Yao
On the choice of the regularization parameter: the case of binary images in the Bayesian restoration framework 55

VI. A. Frigessi & M. Piccioni
Consistent parameter estimation for 2-D Ising fields corrupted by noise: numerical experiments 78

VII. T. A. Gooley, H. H. Barrett, T. J. Roney & W. E. Smith
Use of prior information in coded-aperture imaging 90

VIII. V. Gupta & E. Waymire
The spatial geometry of random networks and a problem in river basin hydrology 103

IX. J. Haslett & G. Horgan
Linear discriminant analysis in image restoration and the prediction of error rate 112

X. C. Ji
Some estimation problems for Gibbs states 130

XI. E. Jolivet
Moment estimation for stationary point processes in R^d 138

XII. M. Jubb & C. Jennison
Aggregation and refinement in binary image restoration 150

XIII. J. W. Kay
A comparison of smoothing parameter choices in image restoration . . 163

XIV. R. Klein & S. J. Press
Iterative Bayesian contextual classification of remotely sensed data . . 176

XV. J. M. Lees & R. S. Crosson
Bayesian ART versus conjugate gradient methods in tomographic seismic imaging: an application at Mount St. Helens, Washington . . 186

XVI. J. Llacer & E. Veklerov
The use of a stopping rule in iterative image reconstruction 209

XVII. W. R. Madych
Solutions of underdetermined systems of linear equations 227

XVIII. M. I. Miller, B. Roysam, K. Smith & J. T. Udding
On the equivalence of regular grammars and stochastic constraints: applications to image processing on massively parallel processors . . . 239

XIX. M. Moore & S. Archambault
On the asymptotic behavior of some statistics based on morphological operations 258

XX. D. E. Myers
Multidimensional, multivariable smoothing 275

XXI. A. Possolo
Subsampling a random field 286

XXII. S. Richardson & P. Clifford
Testing association between spatial processes 295

XXIII. B. D. Ripley
The use of spatial models as image priors 309

XXIV. J. Skilling & S. F. Gull
Bayesian maximum entropy image reconstruction 341

XXV. D. L. Snyder, D. G. Politte & M. I. Miller
A case study in statistical image processing: positron-emission tomography 368

XXVI. C. C. Taylor
Measure of similarity between two images 382

XXVII. D. M. Titterington
Choosing the regularization parameter in image reconstruction 392

XXVIII. L. Younes
Maximum likelihood estimation for Gibbs fields 403
