Preface v

Introduction 1

1 Geometric Structures 5
1.1 Geometry of surfaces 6
1.2 Geometry of 3-manifolds 7
1.3 Thurston's eight geometries 8
1.4 Developing map and holonomy 9
1.5 Evidence for the Geometrization Conjecture 11
1.6 Geometric structures on 3-manifolds with symmetry 14
1.7 Some 3-manifolds with symmetry 15
1.8 3-manifolds as branched coverings 18

2 Orbifolds 21
2.1 Orbifold definitions 21
2.2 Local structure 24
2.3 Orbifold coverings 27
2.4 Orbifold Euler characteristic 29
2.5 Geometric structures on orbifolds 30
2.6 Some geometric 3-orbifolds 34
2.7 Orbifold fibrations 37
2.8 Orbifold Seifert fibre spaces 39
2.9 Suborbifolds 46
2.10 Spherical decomposition for orbifolds 47
2.11 Euclidean decomposition for orbifolds 48
2.12 Graph orbifolds 49
2.13 The Orbifold Theorem 50

3 Cone-Manifolds **53**
3.1 Definitions 53
3.2 Local structure 59
3.3 Standard cone neighbourhoods 59
3.4 Geodesics 61
3.5 Exponential map 64
3.6 Dirichlet domains 66
3.7 Area and volume of cone-manifolds 71

4 Two-dimensional Cone-Manifolds **75**
4.1 Developing map and holonomy 75
4.2 Two-dimensional spherical cone-manifolds 76
4.3 Two-dimensional euclidean cone-manifolds 79
4.4 Euclidean examples with large cone angles 83
4.5 Spaces of cone-manifold structures 84
4.6 Two-dimensional hyperbolic cone-manifolds 84

5 Deformations of Hyperbolic Structures **89**
5.1 Introduction 89
5.2 Deformations and degenerations of surfaces 90
5.3 General deformation theory 92
5.4 Deforming hyperbolic cone-manifolds 94
5.5 Representation spaces 97
5.6 Hyperbolic Dehn filling 100
5.7 Dehn surgery on the figure eight knot 102

6 Limits of Metrics Spaces **107**
6.1 ϵ-approximations 108
6.2 Limits with basepoints 110
6.3 Gromov's compactness theorem 113
6.4 Limits of hyperbolic cone-manifolds 114
6.5 Bilipschitz convergence 117
6.6 Convergence of holonomy 118

7 Proof of the Orbifold Theorem **119**
7.1 Topological preliminaries 119
7.2 Deforming hyperbolic structures 122
7.3 Controlling degenerations 128
7.4 Euclidean to spherical transition 138
7.5 Analysis of the thin part 141

7.6 Outline of the Collapsing Theorem 145

Background on the Orbifold Theorem **153**

References **157**

Index **165**

Postface **169**
