LIST OF PUBLICATIONS

BOOKS

[1] The Thermodynamic Pressure in Quantum Statistical Mechanics - Springer Verlag Lecture Notes in Physics 9, (1971) 115 pages.

[2] Operator Algebras and Quantum Statistical Mechanics Vol I (with O Bratteli) 500 pages, Springer-Verlag (1979), 2nd edition 505 pages, Springer-Verlag (1979). Russian translation of first edition (1981).

[3] Operator Algebras and Quantum Statistical Mechanics Vol II (with O Bratteli) 501 pages, Springer-Verlag (1981), 2nd edition 517 pages, Springer-Verlag (1996).

[4] Basic Semigroup Theory Proceedings of the Centre for Mathematical Analysis, ANU, Canberra Volume 2, (1983) 138 pages.

[5] Elliptic Operators and Lie Groups 556 pages, Oxford University Press (1991).

RESEARCH PAPERS

[1] Multiple Coulomb Excitations of Vibrational Nuclei Nuclear Physics 45 (1961) 459–470.

[2] Zero-Mass Representations of the Inhomogeneous Lorentz Group Helv Phys Acta 35 (1962) 98–112.

[3] Support of a Field in Momentum Space Helv Phys Acta 35 (1962) 403–413.

[4] Multiple Coulomb Excitations of Deformed Nuclei Helv Phys Acta 36 (1963) 140–154.

[5] On a Soluble Model of Relativistic Field Theory Physics Letters 9 (1964) 189–191.

[6] A Theorem Concerning the Positive Metric Commun Math Phys 1 (1965) 89–95.

[7] The Ground State of the Bose Gas Commun Math Phys 1 (1965) 159–174.

[8] Conserved Currents and Associated Symmetries (with D Kastler and A Swieca) Commun Math Phys 2 (1966) 108–120.

[9] Covariance Algebras in Field Theory (with S Doplicher and D Kastler) Commun Math Phys 3 (1966) 1–28.

[10] Invariant States in Statistical Mechanics (with D Kastler) Commun Math Phys 3 (1966) 151–180.

[11] Extremal Invariant States (with D Ruelle) Ann Inst Henri Poincaré 6 (1967) 299-310.

[12] Mean Entropy of States of Classical Statistical Mechanics (with D Ruelle) Commun Math Phys 5 (1967) 288–300.

[13] Mean Entropy of States of Quantum Statistical Mechanics (with O E Lanford) J Math Phys 9 (1968) 1120–1125.

[14] Statistical Mechanics of Quantum Spin Systems Commun Math Phys 6 (1967) 151–160.

[15] Asymptotic Abelian Systems (with S Doplicher, R Kadison and D Kastler) Commun Math Phys 6 (1967) 101–120.

[16] Analyticity Properties of a Lattice Gas (with G Gallavotti and S Miracle-Sole) Physics Letter 25A (1967) 443–444.

[17] Statistical Mechanics of Quantum Spin Systems II Commun Math Phys 7 (1968) 337–346.

[18] Statistical Mechanics of Quantum Spin Systems III (with O E Lanford) Commun Math Phys 9 (1968) 327–338.

[19] Analyticity Properties of the Anisotropic Heisenberg Model (with G Gallavotti and S Miracle-Sole) Commun Math Phys 10 (1968) 311–324.

[20] Proof of the Existence of Phase Transitions in the Anisotropic Heisenberg Model Commun Math Phys 14 (1969) 196–204.

[21] Physical States of Fermi Systems (with S Miracle-Sole) Commun Math Phys 14 (1969) 235–270.

[22] Statistical Mechanics of Quantum Mechanical Particles with Hard Cores I (with S Miracle-Sole) Commun Math Phys 16 (1970) 290–309.

[23] Statistical Mechanics of Quantum Mechanical Particles with Hard Cores II (with S Miracle-Sole) Commun Math Phys 19 (1970) 204–218.

[24] Normal and Locally Normal States Commun Math Phys 19 (1970) 219–234.

[25] Normal States and Representations of the Canonical Commutation Relations (with M Courbage and S Miracle-Sole) Ann Inst Henri Poincare XIV (1971) 171–178.

[26] Approach to Equilibrium of Free Quantum Systems (with O E Lanford) Commun Math Phys 24 (1972) 193–210.

[27] The Finite Group Velocity of Quantum Spin Systems (with E H Lieb) Commun Math Phys 28 (1972) 193–210.

[28] Return to Equilibrium Commun Math Phys 31 (1973) 171-189.

[29] Scattering Theory with Singular Potentials I Ann Inst Henri Poincare XXI (1974) 185–215.

[30] Scattering Theory with Singular Potentials II (with P Ferrero and O Depazzis) Ann Inst Henri Poincare XXI (1974) 216–231.

[31] A Characterisation of Clustering States Commun Math Phys 41 (1975) 79–88.

[32] Dynamical Stability and Pure Thermodynamic Phases (with H Narnhofer) Commun Math Phys 41 (1975) 89–97.

[33] Unbounded Derivations of C^*-Algebras I (with O Bratteli) Commun Math Phys 42 (1975) 253–268.

[34] Unbounded Derivations of C^*-Algebras II (with O Bratteli) Commun Math Phys 46 (1976) 11–30.

[35] Unbounded Derivations of Von Neumann Algebras (with O Bratteli) Ann Inst Henri Poincare XXV (1976) 139–164.

[36] Unbounded Derivations and Invariant Trace States (with O Bratteli) Commun Math Phys 46 (1976) 31–35.

[37] The Approximation of Flows J Funct Anal 24 (1977) 280–290.

[38] Green's Functions, Hamiltonians and Modular Automorphisms (with O Bratteli) Commun Math Phys 50 (1976) 53–59.

[39] Bose-Einstein Condensation with Attractive Boundary Conditions Commun Math Phys 50 (1976) 53–59.

[40] Properties of Propagation of Quantum Spin Systems J Aust Math Soc Vol XIX (Series B) 19 (1976) 387–399.

[41] Quasi Analytic Vectors and Derivations of Operator Algebras (with O Bratteli and R Herman) Math Scan 39 (1976) 371–38.

[42] Perturbations of Flows on Banach Spaces and Operator Algebras (with O Bratteli and R Herman) Commun Math Phys 59 (1978) 167–196.

[43] Stability Properties and the KMS Condition (with A Kishimoto and O Bratteli) Commun Math Phys 61 (1978) 209–238.

[44] Ground States of Quantum Spin Systems (with A Kishimoto and O Bratteli) Commun Math Phys 64 (1978) 41–48.

[45] Propagation Properties in Scattering Theory J Aus Math Soc (Series B) 21 (1979) 474–485.

[46] Lie and Jordan Structure in Operator Algebras (with E Stormer) J Aus Math Soc (Series A) 29 (1980) 129–142.

[47] Equilibrium States of a Bose Gas with repulsive interactions (with O Bratteli) J Aus Math Soc (Series B) 22 (1980) 129–147.

[48] Positivity and Monotonicity Properties of C^0-Semigroups I (with O Bratteli and A Kishimoto) Commun Math Phys 75 (1980) 67–84.

[49] Positivity and Monotonicity Properties of C^0-Semigroups II (with A Kishimoto) Commun Math Phys 75 (1980) 85–101.

[50] Subordinate Semigroups and Order Properties (with A Kishimoto) J Aus Math Soc (Series A) 31 (1981) 69–76.

[51] Positive C_0-Semigroups on C^*-Algebras (with O Bratteli) Math Scand 49 (1981) 259–274.

[52] Strictly Positive and Strongly Positive Semigroups (with A Majewski) J Aus Math Soc (Series A) 34 (1983) 36–48.

[53] Strongly Positive Semigroups and Faithful Invariant States Commun Math Phys 85 (1982) 129–142.

[54] On Unbounded Derivations Commuting with a Compact Group of $*$-Automorphisms (with A Kishimoto) Publ RIMS Kyoto Univ 18 (1982) 1121–1136.

[55] Positive Semigroups on Ordered Banach Spaces (with O Bratteli and T Digernes) J Op Theor 9 (1983) 371–400.

[56] Addition of an Identity to an Ordered Banach Space (with S Yamamuro) J Aus Math Soc (Series A) 35 (1983) 200–210.

[57] Hereditary Cones, Order Ideals, and Half-norms (with S Yamamuro) Pac J Math 110 (1984) 335–343.

[58] The Jordan Decomposition and Half-norms (with S Yamamuro) Pac J Math 110 (1984) 345–353.

[59] The Canonical Half-norm, Dual Half-norms, and Monotonic Norms (with S Yamamuro) Tohoku J Math 35 (1983) 375–386.

[60] Continuous Semigroups on Ordered Banach Spaces J Funct Anal 5 (1983) 268–284.

[61] On Positive Semigroups Publ RIMS Kyoto Univ 20 (1984) 213–224.

[62] Extending Derivations (with C J K Batty, A Carey and D E Evans) Publ RIMS Kyoto Univ 20 (1984) 119–139.

[63] Positive One-parameter Semigroups on Ordered Banach Spaces (with C J K Batty) Acta Appl Math 2 (1984) 221–296.

[64] A C^*-algebraic Schoenberg Theorem (with O Bratteli, P Jørgensen and A Kishimoto) Ann Inst Fourier (Grenoble) XXXIV (1984) 155–187.

[65] Relative Locality of Derivations (with O Bratteli and T Digernes) J Funct Anal 59 (1984) 12–40.

[66] Derivations, Dynamical Systems, and Spectral Restrictions (with A Kishimoto) Math Scand 56 (1985) 83–95.

[67] Dissipations, Derivations, Dynamical Systems and Asymptotic Abelianness (with A Kishimoto) J Op Theor 13 (1985) 237–253.

[68] Derivations of Simple C^*-algebras Tangential to Compact Automorphism Groups (with E Stormer and M Takesaki) J Op Theor 13 (1985) 189–200.

[69] Strong Topological Transitivity and C^*-dynamical Systems (with O Bratteli and G A Elliott) J Math Soc Japan 37 (1985) 115–133.

[70] The Characterisation of Differential Operators by Locality; Classical Flows (with O Bratteli and G A Elliott) Comp Math 58 (1985) 279–319.

[71] The Characterisation of Differential Operators by Locality; Abstract Derivations (with C J K Batty) Erg Theor and Dyn Syst 5 (1985) 171–183.

[72] The Characterisation of Differential Operators by Locality; Dissipations and Ellipticity (with O Bratteli and G A Elliott) Publ RIMS Kyoto Univ 21 (1985) 1031–1049.

[73] The Characterization of Differential Operators by Locality: C^*-algebras of Type I (with O Bratteli and G A Elliott) J Op Theor 16 (1986) 213–233.

[74] Integration in Abelian C^*-dynamical Systems (with O Bratteli, T Digernes and F M Goodman) Publ RIMS Kyoto Univ, 21 (1985) 1001–1030.

[75] Smooth Cores of Lipschitz Flows Publ RIMS Kyoto Univ 22 (1986) 659–669.

[76] Smooth Derivations on Abelian C^*-dynamical Systems J Aus Math Soc (Series A) 42 (1987) 247–264.

[77] Commutators and Generators (with C J K Batty) Math Scand 62 (1988) 303–326.

[78] Commutators and Generators II Math Scand 64 (1989) 87–108.

[79] Return to Equilibrium in the $X-Y$ Model (with L R Hume) J Stat Phys 44 (1986) 829–848.

[80] Embedding Product Type Actions into C^*-dynamical Systems (with O Bratteli and A Kishimoto) J Funct Anal 75 (1987) 188–210.

[81] Fractional Powers of Generators of Equicontinuous Semigroups and Fractional Derivatives (with O E Lanford) J Aus Math Soc (Series A) 46 (1989) 1–32.

[82] Commutator Theory on Hilbert Space Can J Math 5 (1987) 1235–1280.

[83] The Differential and Integral Structure of Continuous Representations of Lie Groups J Op Theor 19 (1988) 95–128.

[84] The Heat Semigroup and Integrability of Lie Algebras (with O Bratteli, F M Goodman and P E T Jørgensen) J Funct Anal 79 (1988) 351–397.

[85] An Index for Continuous Semigroups of *-endomorphisms of $B(H)$ (with R T Powers) J Funct Anal 83 (1989) 1–12.

[86] Lie Groups and Lipschitz Spaces Duke Math Jour 57 (1988) 357–395.

[87] The Heat Semigroup, Derivations, and Reynold's Identity (with O Bratteli and C J K Batty) Operator algebras and applications. London Math Soc Lecture Notes Series 136 (1988) 22–47.

[88] The Heat Semigroup and Integrability of Lie Algebras: Lipschitz Spaces and Smoothness Properties Commun Math Phys 132 (1990) 217–243.

[89] Lipschitz Operators J Funct Anal 85 (1989) 179–211.

[90] Comparison of Commuting One-parameter Groups of Isometries (with O Bratteli and H Kurose) Trans Amer Math Soc 320 (1990) 677–694.

[91] Unitary Representations of Lie Groups and Gårding's Inequality (with O Bratteli, F M Goodman and P E T Jørgensen) Proc Amer Math Soc 107 (1989) 627–632.

[92] Positive Semigroups Generated by Elliptic Operators on Lie Groups (with W Arendt and C J K Batty). J Op Theor 23 (1990) 369–407.

[93] Elliptic Differential Operators on Lie Groups J Funct Anal 97 (1991) 373–402.

[94] 2nd order Elliptic Operators and Heat Kernels on Lie Groups (with O Bratteli) Trans Amer Math Soc 325 (1991) 683–713.

[95] Subelliptic Operators on Lie Groups: Regularity (with A F M ter Elst) J Aus Math Soc 57 (1994) 179–229.

[96] Subelliptic Operators on Lie Groups: Variable Coefficients (with O Bratteli) Acta Appl Math 42 (1996) 1–104.

[97] Subcoercivity and Subelliptic Operators on Lie Groups I: Free Nilpotent Groups (with A F M ter Elst) Pot An 3 (1994) 283–387.

[98] Subcoercivity and Subelliptic Operators on Lie Groups II:The General Case (with A F M ter Elst) Pot An 4 (1995) 205–243.

[99] Subcoercive and Subelliptic Operators on Lie Groups: Variable Coefficients (with A F M ter Elst) Publ RIMS Kyoto Univ 5 (1993) 745–801.

[100] L_p-regularity of Subelliptic Operators on Lie Groups (with R J Burns and A F M ter Elst) J Op Theor 31 (1994) 165–187.

[101] Functional Analysis of Subelliptic Operators on Lie Groups (with A F M ter Elst) J Op Theor 31 (1994) 277–301.

[102] Asymptotics of Periodic Subelliptic Operators (with C J K Batty, O Bratteli and P E T Jørgensen) J Geom Anal 5 (1995) 427–443.

[103] Weighted Strongly Elliptic Operators on Lie Groups (with A F M ter Elst) J Funct Anal 125 (1994) 548–603.

[104] On Positive Rockland Operators (with P Auscher and A F M ter Elst) Colloq Math LXVII (1994) 197–216.

[105] Spectral Estimates for Positive Rockland Operators (with A F M ter Elst) Algebraic groups and Lie groups (Ed G I Lehrer), Aus Math Soc Lecture Series 9. Cambridge Univ Press (1997).

[106] Reduced Heat Kernels on Nilpotent Lie Groups (with A F M ter Elst) Commun Math Phys 173 (1995) 475–511.

[107] Semigroup Kernels, Poisson bounds and Holomorphic Functional Calculus (with X T Duong) J Funct An **142** (1996) 89–129.

[108] Weighted Subcoercive Operators on Lie Groups (with A F M ter Elst) J Funct Anal **156** (1998) 88–163.

[109] On Kato's Square Root Problem (with A F M ter Elst) Hokkaido Math J **26** (1997) 1–12.

[110] Analytic Elements of Lie Groups (with A F M ter Elst) Helv Phys Acta **69** (1996) 655–678.

[111] Abundance of Invariant and Almost Invariant Pure States of C^*-dynamical Systems (with O Bratteli and A Kishimoto) Commun Math Phys **187** (1997) 491–507.

[112] Second-order Subelliptic Operators on Lie Groups I: Complex Uniformly Continuous Principal Coefficients (with A F M ter Elst) Acta Appl Math **59** (1999) 299–331.

[113] High Order Divergence-form Elliptic Operators on Lie Groups (with A F M ter Elst) Bull Aus Math Soc 55 (1997) 335-348.

[114] Second-order Subelliptic Operators on Lie Groups II: Real Measurable Coefficients (with A F M ter Elst) Progess in Nonlinear Differential Equations **42** Birkhäuser Verlag (2000) 103–124.

[115] Second-order Strongly Elliptic Operators on Lie Groups with Hölder Continuous Coefficients. (with A F M ter Elst) J Aus Math Soc (Series A) **63** (1997) 297–363.

[116] Heat Kernels and Riesz Transforms on Nilpotent Lie Groups. (with A F M ter Elst and A Sikora) Colloq Math LXXIV (1997) 191–218.

[117] Second-order Subelliptic Operators on Lie Groups III: Hölder Continuous Coefficients (with A F M ter Elst) Calc Var P D E **8** (1999), 327–363.

[118] Spectral Asymptotics of Periodic Elliptic Operators (with O Bratteli and P E T Jørgensen) Math Z **232** (1999), 621–650.

[119] Local Lower Bounds on Heat Kernels (with A F M ter Elst) Positivity **2** (1998) 123–151.

[120] Riesz Transforms and Lie Groups of Polynomial Growth. (with A F M ter Elst and A Sikora) J Funct Anal **162** (1999), 14–51.

[121] Asymptotics of Semigroups on Nilpotent Lie Groups (with N Dungey, A F M ter Elst and A Sikora) J Op Theor (to appear)

[122] Asymptotics of Sums of Subcoercive Operators (with N Dungey and A F M ter Elst) Colloq Math **82** (1999) 231–260.

[123] On second-order Periodic Elliptic Operators in Divergence Form (with A F M ter Elst and Adam Sikora) Math Z (to appear)

[124] On Anomalous Asymptotics of Heat Kernels (with A F M ter Elst) Evolution equations and their applications to Physical and Life Sciences, Lecture Notes in Pure and Applied Mathematics, Vol. 215, (2001) 89–103, Eds. G Lumer, L Weis, Marcel Dekker, New York

[125] On Second-order Almost-periodic Elliptic Operators (with N Dungey and A F M ter Elst) J London Math Soc (submitted)

[126] On Anomalous Asymptotics of Heat Kernels on Groups of Polynomial Growth (with N Dungey and A F M ter Elst) Comp Math (submitted)

Lecture notes, reviews and conference papers

[1] Algebraic Aspects of Relativistic Field Theory - Brandeis Lectures, Gordon and Breach, New York, Vol 1 (1966).

[2] Symmetries, Broken Symmetries, Charges and Currents - Istanbul Lecture, Freeman and Co, San Francisco, (1967) 463–513.

[3] Conserved Currents and Broken Symmetries - Colloque du CNRS (1966), Eds du CNRS 15 (1968) 131–135.

[4] Physical States and Finiteness Restrictions - Proceeding of the CNRS Conference at Gif-sur-Yvette, CNRS (1969).

[5] Existence Theorems in Quantum Statistical Mechanics - Proceedings of the Cargese Summer School (notes by R Lima and S Miracle) Gordon and Breach (1970).

[6] Approach and Return to Equilibrium of Free Fermi States - Colloquium of the American Math Soc 1971 - Siam AMS Proceeding 5 55 (1972).

[7] C^*-Algebras and Quantum Statistical Mechanics - Int School of Physics Enrico fermi Varenna-Editrice Comp Bologna (1975) 235–252.

[8] Time Dependent Scattering Theory III - Int Colloq on Group Theoretical Methods, Marseille (1974).

[9] Unbounded Derivations of C^*-Algebras - Int Symp on Math Problems in Theor Phys, Springer-Verlag (1975).

[10] Dynamics in Quantum Statistical Mechanics - Int Summer School Bielefeld 1976, Plenum Press (1978).

[11] Review of Derivations - Int Conference on Mathematical Physics, Lausanne 1979, Springer-Verlag (1980).

[12] Commutator Theory and Partial Differential Operators on Hilbert Space - Proceedings of the Centre of Mathematical Analysis, ANU, Canberra 14 (1986) 295–302.

[13] Differential Operators on C^*-algebras - Contemporary Mathematics, Amer Math Soc 62 (1987) 367–384.

[14] C^*-algebras and a Single Operator - Surveys of some recent results in operator theory II Pitman Research 171 (1988) 235–266.

[15] Integration of Lie Algebras - Proceedings of the Centre of Mathematical Analysis, ANU, Canberra 15 (1987) 255–278.

[16] Schauder Estimates on Lie Groups- Proceedings of the Centre of Mathematical Analysis, ANU, Canberra 24 (1989) 1–9.
