AUTHOR REFERENCE INDEX

This index includes authors from Volumes I, II, III only. A reference index for Volumes IV, V, and VI is contained in those Volumes.

Ambartsumian Point Processes, Branching Processes Vol. III
Anderson Regression Analysis Vol. I
Azencott with Cartier Markov Processes—Potential Theory Vol. III

Bahadur with Raghavachari Asymptotic Theory Vol. I
Barlow with Doksum Nonparametric Procedures Vol. I
Belyayev Passage Problems Vol. III
Beran General Theory Vol. I
Bhattacharya Central Limit Vol. II
Bickel and Yahav Sequential Analysis Vol. I
Birnbaum Nonparametric Procedures Vol. I
Blumenthal with Corson Measure Theory Vol. II
Blyth with Roberts General Theory Vol. I
Borovkov Passage Problems Vol. III
Brillinger Regression Analysis Vol. I
Bucy Information and Control Vol. III
Bühler Point Processes, Branching Processes Vol. III
Bühlmann Regression Analysis Vol. I
Burkholder with Davis and Gundy Inequalities Vol. II

Cartier with Azencott Markov Processes—Potential Theory Vol. III
Chernoff Multivariate Analysis Vol. I
Chibisov Asymptotic Theory Vol. I
Cochran Regression Analysis Vol. I
Cogburn Central Limit Vol. II
Corson with Blumenthal Measure Theory Vol. II
Cox with Lewis Point Processes, Branching Processes Vol. III

Daniels Point Processes, Branching Processes Vol. III
Das Gupta with Eaton, Olkin, Perlman, Savage, and Sobel Inequalities Vol. II
David Multivariate Analysis Vol. I
Davis with Burkholder and Gundy Inequalities Vol. II
Debreu with Schmeidler Measure Theory Vol. II
Doksum with Barlow Nonparametric Procedures Vol. I
Doksum Nonparametric Procedures Vol. I
Doob Introduction Vol. II
Doob Markov Processes—Potential Theory Vol. III
Doubilet with Stanley and Rota Combinatorial Analysis Vol. II
Dudley Measure Theory Vol. II
Dvoretzky Central Limit Vol. II

Eaton with Das Gupta, Olkin, Perlman, Savage, and Sobel Inequalities Vol. II

Feldman Gaussian Processes Vol. II
Ferguson Information and Control Vol. III
Frolík Measure Theory Vol. II

Gani Point Processes, Branching Processes Vol. III
Garsia Gaussian Processes Vol. II
Getoor Markov Processes—Trajectories—Functionals Vol. III
Gleser with Olkin Regression Analysis Vol. I
Gnedenko Central Limit Vol. II
Goodman Multivariate Analysis Vol. I
Gundy with Burkholder and Davis Inequalities Vol. II

Hájek Asymptotic Theory Vol. I
Hammersley Nonparametric Procedures Vol. I
Hildenbrand Measure Theory Vol. II
Hoem Regression Analysis Vol. I
Holley Point Processes, Branching Processes Vol. III

Ionescu Tulcea Measure Theory Vol. II
Itô Markov Processes—Trajectories—Functionals Vol. III

Jain with Pruitt Passage Problems Vol. III
Johnson with Roussas Asymptotic Theory Vol. I

Kac Introduction Vol. II
Kakutani Ergodic Theory Vol. II
Kallianpur with Nadkarni Gaussian Processes Vol. II
Katz with Sobel Point Processes, Branching Processes Vol. III
Kemperman Measure Theory Vol. II
Kiefer Asymptotic Theory Vol. I
Kingman Markov Processes—Trajectories—Functionals Vol. III
Krieger Ergodic Theory Vol. II
Kushner Information and Control Vol. III

Leadbetter Point Processes, Branching Processes Vol. III
Le Cam Asymptotic Theory Vol. I
Lewis with Cox Point Processes, Branching Processes Vol. III
Linnik with Romanovsky Sequential Analysis Vol. I
Liptser with Shiryayev Gaussian Processes Vol. II

Maharam Measure Theory Vol. II
Marcus with Shepp Gaussian Processes Vol. II
Marshall with Proschan Nonparametric Procedures Vol. I
McShane Markov Processes—Trajectories—Functionals Vol. III
Meyer with Smythe and Walsh Markov Processes—Trajectories—Functionals Vol. III
Millar Markov Processes—Trajectories—Functionals Vol. III
Miller Sequential Analysis Vol. I
Mitra with Rao Multivariate Analysis Vol. I
Mollison Point Processes, Branching Processes Vol. III
Müller Measure Theory Vol. II

Nadkarni with Kallianpur Gaussian Processes Vol. II

Olkin with Das Gupta, Eaton, Perlman, Savage, and Sobel Inequalities Vol. II
Olkin with Gleser Regression Analysis Vol. I
Olson with Uppuluri Point Processes, Branching Processes Vol. III
Oosterhoff with Van Zwet General Theory Vol. I
Orchard with Woodbury Multivariate Analysis Vol. I
Orey Gaussian Processes Vol. II
Ornstein Ergodic Theory Vol. II

Perlman Asymptotic Theory Vol. I
Perlman with Das Gupta, Eaton, Olkin, Savage, and Sobel Inequalities Vol. II
Port with Stone Markov Processes—Potential Theory Vol. III
Port with Stone Markov Processes—Potential Theory Vol. III
Posner with Rodemich Information and Control Vol. III
Proschan with Marshall Nonparametric Procedures Vol. I
Pruitt with Jain Passage Problems Vol. III
Puri Point Processes, Branching Processes Vol. III
Pyke Nonparametric Procedures Vol. I

Raghavachari with Bahadur Asymptotic Theory Vol. I
Rao with Mitra Multivariate Analysis Vol. I
Robbins with Siegmund Passage Problems Vol. III
Roberts with Blyth General Theory Vol. I
Rodemich with Posner Information and Control Vol. III
Romanovsky with Linnik Sequential Analysis Vol. I
Rosenblatt Central Limit Vol. II
Rosenthal Measure Theory Vol. II
Rota with Doubilet and Stanley Combinatorial Analysis Vol. II
Roussas with Johnson Asymptotic Theory Vol. I
Rubin Nonparametric Procedures Vol. I

Sato Markov Processes—Potential Theory Vol. III
Savage with Sethuraman Nonparametric Procedures Vol. I
Savage with Das Gupta, Eaton, Olkin, Perlman, and Sobel Inequalities Vol. II
Sazonov Central Limit Vol. II

Schmeidler with Debreu Measure Theory Vol. II
Schmetterer Introduction Vol. II
Schmetterer Measure Theory Vol. II
Sethuraman with Savage Nonparametric Procedures Vol. I
Shepp with Marcus Gaussian Processes Vol. II
Shiryayev with Liptser Gaussian Processes Vol. II
Siegmund with Robbins Passage Problems Vol. III
Smythe with Meyer and Walsh Markov Processes—Trajectories—Functionals Vol. III
Sobel with Das Gupta, Eaton, Olkin, Perlman, and Savage Inequalities Vol. II
Sobel with Katz Point Processes, Branching Processes Vol. III
Sobel with Weiss Multivariate Analysis Vol. I
Solomon with Wang Point Processes, Branching Processes Vol. III
Soloviev Passage Problems Vol. III
Stanley with Doubilet and Rota Combinatorial Analysis Vol. II
Stein Central Limit Vol. II
Stone with Port Markov Processes—Potential Theory Vol. III
Stone with Port Markov Processes—Potential Theory Vol. III
Straf Measure Theory Vol. II
Strawderman General Theory Vol. I
Stroock with Varadhan Markov Processes—Trajectories—Functionals Vol. III
Stroock with Varadhan Markov Processes—Trajectories—Functionals Vol. III
Switzer Asymptotic Theory Vol. I

Uppuluri with Olson Point Processes, Branching Processes Vol. III

Van Zwet with Oosterhoff General Theory Vol. I
Varadhan with Stroock Markov Processes—Trajectories—Functionals Vol. III
Varadhan with Stroock Markov Processes—Trajectories—Functionals Vol. III
Varaiya Information and Control Vol. III
Vincze Nonparametric Procedures Vol. I

Walsh with Meyer and Smythe Markov Processes—Trajectories—Functionals Vol. III
Wang with Solomon Point Processes, Branching Processes Vol. III
Waugh Point Processes, Branching Processes Vol. III
Weiss with Sobel Multivariate Analysis Vol. I
Wijsman Sequential Analysis Vol. I
Woodbury with Orchard Multivariate Analysis Vol. I

Yahav with Bickel Sequential Analysis Vol. I

Zelen Multivariate Analysis Vol. I
