	4E 3
π - —, 67	round-up ($\lceil \rceil$), 36
- at x , 90	sectional decomposition, 2
relatively —, 67	f- —, 226
negative part	semi-ample, 24, 45
$-D_{-}$, 29	f- —, 24
- N, 85, 94	relatively —, 24
normal, 15	semi-stable reduction, 218
—ization, 15	semi-stable sheaf, 77
normal crossing divisor, 56	singular, 28
simple —, 56	— locus (Sing), 28
numerical pullback, 41, 107	non-—, 28
numerically equivalent (\approx), 62	Stein factorization, 15
numerically trivial	
π - —, 67	strictly convex, 113, 122
relatively —, 67	subbundle, 14
C 1.	subdivision, 114
of general type, 55	locally finite —, 114
orbit, 115	proper —, 114
period, 189	support (), 114
Picard	— function, 117
(support (Supp), 29
— group (Pic), 14 — number (ρ), 62	tautological, 19, 22
	— divisor, 73
pluricanonical ring, 3	normalized — divisor, 4, 74
polarization, 187	terminal, 60
positive, 24, 65 semi- —	— singularity, 59
	toric bundle, 127
generically —, 8, 162	affine —, 127
numerically —, 190	toric variety, 114
weakly —, 200	
positive part	affine —, 114 torsion part (tor), 14
$-D_{+}, 29$	
— P, 85, 94	torsion-free, 14
prime	total transform, 40
— component, 29	transform
— decomposition, 29	proper —, 40
— divisor, 29	strict —, 40
projective, 19, 229	unit, 14, 29
$-\operatorname{space}\left(\mathbb{P}^{n}\right), 19$, ,
—ly flat, 154	vector bundle, 14
proper	vertex, 115
— inverse image, 39	vertical, 39
— subset, 11	— part (v) , 47
pseudo-effective, 63, 64, 72	
f- —, 69	weight, 187
relatively —, 69	Weil operator, 187
rank, 14	Zariski-closed, 14
reduced, 14	Zariski-decomposition, 86
reducible, 14	— conjecture, 3
reflexive, 31	-in the sense of Fujita, 3
— R-sheaf of rank one, 37	relative —, 99
round-down (,), 36	Zariski-open, 14
10dia down ([]), 00	Zarishi-open, 14
