

Ann. Funct. Anal.
Volume 5, Number 2, 2014

The second issue of the special volume dedicated to Professor Tsuyoshi Ando
in celebration of his distinguished achievements in Matrix Analysis and
Operator Theory

- 1 **Some problems in functional analysis inspired by Hahn-Banach type theorems** pp.1-29
M.A. Sofi
- 2 **On relations among solutions of the Hermitian matrix equation $AXA^* = B$ and its three small equations** pp. 30-46
Y. Li; Y. Tian
- 3 **Commutators of two compressed shifts and the Hardy space on the bidisc** pp. 47-52
T. Nakazi
- 4 **Characterization of exponential polynomials on commutative hypergroups** pp. 53-60
L. Szekelyhidi
- 5 **Time scales Hardy-type inequalities via superquadracity** pp. 61-73
J.A. Oguntuase; L.E. Persson
- 6 **Non-commutative perspectives** pp.74-79
E.G. Effros; F. Hansen
- 7 **Orthogonally additive and orthogonally multiplicative holomorphic functions of matrices** pp. 80-89
Q. Bu; C. Liao; N.-C. Wong
- 8 **Actions of arithmetic functions on matrices and corresponding representations** pp. 90-117
I. Cho; P. Jorgensen

- 9 **Approximation problems in the Riemannian metric on positive definite metrics** pp. 118-126
R. Bhatia; T. Jain
- 10 **The roots and links in a class of M-matrices** pp.127-137
X.-D. Zhang
- 11 **A normal variation of the Horn problem: the rank 1 case** pp. 138-146
L. Cao; H.J. Woerdeman
- 12 **On f-connections of positive definite matrices** pp.147-157
M. Niezgoda
- 13 **Conic structure of the non-negative operator convex functions on $(0, \infty)$** pp. 158-175
U Franz; F. Hiai
- 14 **Principal angles and approximation for quaternionic projections** pp. 176-187
T. Loring
- 15 **An interview with Tsuyoshi Ando** pp.188-206
R.A. Brualdi; M.S. Moslehian
