

CONTENTS OF VOLUME 12

Articles

ALSMEYER, GEROLD AND RÖSLER, UWE. Asexual versus promiscuous bisexual Galton–Watson processes: The extinction probability ratio	125–142
ALVES, O. S. M., MACHADO, F. P. AND POPOV, S. YU. The shape theorem for the frog model	533–546
ANTONELLI, FABIO AND KOHATSU-HIGA, ARTURO. Rate of convergence of a particle method to the solution of the McKean–Vlasov equation	423–476
ASSAF, DAVID, GOLDSTEIN, LARRY AND SAMUEL-CAHN, ESTER. Ratio prophet inequalities when the mortal has several choices	972–984
BAI, Z. D., HU, FEIFANG AND ZHANG, LI-XIN. Gaussian approximation theorems for urn models and their applications	1149–1173
BALDI, PAOLO AND CARAMELLINO, LUCIA. Asymptotics of hitting probabilities for general one-dimensional pinned diffusions	1071–1095
BASRAK, BOJAN, DAVIS, RICHARD A. AND MIKOSCH, THOMAS. A characterization of multivariate regular variation	908–920
BERGLUND, NILS AND GENTZ, BARBARA. A sample-paths approach to noise-induced synchronization: Stochastic resonance in a double-well potential	1419–1470
BERTOIN, JEAN. Eternal solutions to Smoluchowski’s coagulation equation with additive kernel and their probabilistic interpretations	547–564
BOUCHERON, STÉPHANE, GAMBOA, FABRICE AND LÉONARD, CHRISTIAN. Bins and balls: Large deviations of the empirical occupancy process	607–636
BOYARCHENKO, SVETLANA AND LEVENDORSKIĬ, SERGEI. Barrier options and touch-and-out options under regular Lévy processes of exponential type	1261–1298
BRAVERMAN, MICHAEL, MIKOSCH, THOMAS AND SAMORODNITSKY, GENNADY. Tail probabilities of subadditive functionals of Lévy processes	69–100
BRUSS, F. THOMAS AND FERGUSON, THOMAS S. High-risk and competitive investment models	1202–1226
BUDHIRAJA, A. On invariant measures of discrete time filters in the correlated signal–noise case	1096–1113
CAMIA, FEDERICO, DE SANTIS, EMILIO AND NEWMAN, CHARLES M. Clusters and recurrence in the two-dimensional zero-temperature stochastic ising model	565–580

CARAMELLINO, LUCIA AND BALDI, PAOLO. Asymptotics of hitting probabilities for general one-dimensional pinned diffusions	1071–1095
CHOI, K. P. AND XIA, AIHUA. Approximating the number of successes in independent trials: Binomial versus Poisson	1139–1148
CHOW, PAO-LIU. Stochastic wave equations with polynomial nonlinearity	361–381
COLLAMORE, J. F. Importance sampling techniques for the multidimensional ruin problem for general Markov additive sequences of random vectors	382–421
COMETS, FRANCIS, FERNÁNDEZ, ROBERTO AND FERRARI, PABLO A. Processes with long memory: Regenerative construction and perfect simulation	921–943
COX, J. THEODORE AND DURRETT, RICHARD. The stepping stone model: New formulas expose old myths	1348–1377
CRANSTON, MIKE AND SCHEUTZOW, MICHAEL. Dispersion rates under finite mode Kolmogorov flows	511–532
DANTZER, JEAN-FRANÇOIS AND ROBERT, PHILIPPE. Fluid limits of string valued Markov processes	860–889
DAVIS, RICHARD A., MIKOSCH, THOMAS AND BASRAK, BOJAN. A characterization of multivariate regular variation	908–920
DE SANTIS, EMILIO, NEWMAN, CHARLES M. AND CAMIA, FEDERICO. Clusters and recurrence in the two-dimensional zero-temperature stochastic ising model	565–580
DENUIT, MICHEL AND MÜLLER, ALFRED. Smooth generators of integral stochastic orders	1174–1184
DURRETT, RICHARD AND COX, J. THEODORE. The stepping stone model: New formulas expose old myths	1348–1377
EVANS, STEVEN N. AND STEINSALTZ, DAVID. Estimating some features of NK fitness landscapes	1299–1321
FERGUSON, THOMAS S. AND BRUSS, F. THOMAS. High-risk and competitive investment models	1202–1226
FERNÁNDEZ, ROBERTO, FERRARI, PABLO A. AND COMETS, FRANCIS. Processes with long memory: Regenerative construction and perfect simulation	921–943
FERRARI, PABLO A., COMETS, FRANCIS AND FERNÁNDEZ, ROBERTO. Processes with long memory: Regenerative construction and perfect simulation	921–943
FILIPOVIĆ, DAMIR AND ZABCZYK, JERZY. Markovian term structure models in discrete time	710–729

FLEMING, W. H. AND SHEU, S. J. Risk-sensitive control and an optimal investment model II	730–767
FRANÇOIS, OLIVIER. Global optimization with exploration/selection algorithms and simulated annealing	248–271
GAMBOA, FABRICE, LÉONARD, CHRISTIAN AND BOUCHERON, STÉPHANE. Bins and balls: Large deviations of the empirical occupancy process	607–636
GENTZ, BARBARA AND BERGLUND, NILS. A sample-paths approach to noise-induced synchronization: Stochastic resonance in a double-well potential	1419–1470
GOLDSTEIN, LARRY, SAMUEL-CAHN, ESTER AND ASSAF, DAVID. Ratio prophet inequalities when the mortal has several choices	972–984
GROMOLL, H. CHRISTIAN, PUHA, AMBER L. AND WILLIAMS, RUTH J. The fluid limit of a heavily loaded processor sharing queue	797–859
GROTE, MARK N. AND SPEED, TERENCE P. Approximate Ewens formulae for symmetric overdominance selection	637–663
GUASONI, PAOLO. Optimal investment with transaction costs and without semimartingales	1227–1246
HU, FEIFANG, ZHANG, LI-XIN AND BAI, Z. D. Gaussian approximation theorems for urn models and their applications	1149–1173
INOUE, AKIHIKO. Asymptotic behavior for partial autocorrelation functions of fractional ARIMA processes	1471–1491
IVANOFF, B. GAIL AND MERZBACH, ELY. Random censoring in set-indexed survival analysis	944–971
JACKA, SAUL. Avoiding the origin: A finite-fuel stochastic control problem	1378–1389
JARNER, SØREN F. AND ROBERTS, GARETH O. Polynomial convergence rates of Markov chains	224–247
JORDAN, JONATHAN. Almost sure convergence for iterated functions of independent random variables	985–1000
JOURDAIN, B. Probabilistic characteristics method for a one-dimensional inviscid scalar conservation law	334–360
JOURDAIN, B. AND MARTINI, C. Approximation of American put prices by European prices via an embedding method	196–223
JOYCE, PAUL, KRONE, STEPHEN M. AND KURTZ, THOMAS G. Gaussian limits associated with the Poisson–Dirichlet distribution and the Ewens sampling formula	101–124
KOHATSU-HIGA, ARTURO AND ANTONELLI, FABIO. Rate of convergence of a particle method to the solution of the McKean–Vlasov equation	423–476

- KOURITZIN, MICHAEL A. AND LONG, HONGWEI. Convergence of Markov chain approximations to stochastic reaction–diffusion equations 1039–1070
- KRONE, STEPHEN M., KURTZ, THOMAS G. AND JOYCE, PAUL. Gaussian limits associated with the Poisson–Dirichlet distribution and the Ewens sampling formula 101–124
- KURIKI, SATOSHI AND TAKEMURA, AKIMICHI. On the equivalence of the tube and Euler characteristic methods for the distribution of the maximum of Gaussian fields over piecewise smooth domains 768–796
- KURTZ, THOMAS G., JOYCE, PAUL AND KRONE, STEPHEN M. Gaussian limits associated with the Poisson–Dirichlet distribution and the Ewens sampling formula 101–124
- LASSERRE, JEAN B. Bounds on measures satisfying moment conditions 1114–1137
- LÉONARD, CHRISTIAN, BOUCHERON, STÉPHANE AND GAMBOA, FABRICE. Bins and balls: Large deviations of the empirical occupancy process 607–636
- LEVENDORSKIĬ, SERGEI AND BOYARCHENKO, SVETLANA. Barrier options and touch-and-out options under regular Lévy processes of exponential type 1261–1298
- LONG, HONGWEI AND KOURITZIN, MICHAEL A. Convergence of Markov chain approximations to stochastic reaction–diffusion equations 1039–1070
- LÖWE, MATTHIAS AND MATZINGER III, HEINRICH. Scenery reconstruction in two dimensions with many colors 1322–1347
- MA, JIN, PROTTER, PHILIP, SAN MARTÍN, JAIME AND TORRES, SOLEDAD. Numerical method for backward stochastic differential equations 302–316
- MA, JIN AND ZHANG, JIANFENG. Representation theorems for backward stochastic differential equations 1390–1418
- MACHADO, F. P., POPOV, S. YU. AND ALVES, O. S. M. The shape theorem for the frog model 533–546
- MADRAS, NEAL AND RANDALL, DANA. Markov chain decomposition for convergence rate analysis 581–606
- MARCHAND, R. Strict inequalities for the time constant in first passage percolation 1001–1038
- MARTINI, C. AND JOURDAIN, B. Approximation of American put prices by European prices via an embedding method 196–223
- MATZINGER III, HEINRICH AND LÖWE, MATTHIAS. Scenery reconstruction in two dimensions with many colors 1322–1347

MERZBACH, ELY AND IVANOFF, B. GAIL. Random censoring in set-indexed survival analysis	944–971
MICLO, L. About relaxation time of finite generalized Metropolis algorithms	1492–1515
MIKOSCH, THOMAS, BASRAK, BOJAN AND DAVIS, RICHARD A. A characterization of multivariate regular variation	908–920
MIKOSCH, THOMAS, RESNICK, SIDNEY, ROOTZÉN, HOLGER AND STEGEMAN, ALWIN. Is network traffic approximated by stable Lévy motion or fractional Brownian motion?	23–68
MIKOSCH, THOMAS, SAMORODNITSKY, GENNADY AND BRAVERMAN, MICHAEL. Tail probabilities of subadditive functionals of Lévy processes	69–100
MÜLLER, ALFRED AND DENUIT, MICHEL. Smooth generators of integral stochastic orders	1174–1184
MÜLLER-GRONBACH, THOMAS. The optimal uniform approximation of systems of stochastic differential equations	664–690
NAGAI, HIDEO AND PENG, SHIGE. Risk-sensitive dynamic portfolio optimization with partial information on infinite time horizon	173–195
NEWMAN, CHARLES M., CAMIA, FEDERICO AND DE SANTIS, EMILIO. Clusters and recurrence in the two-dimensional zero-temperature stochastic ising model	565–580
OWEN, M. P. Utility based optimal hedging in incomplete markets	691–709
PAULSEN, JOSTEIN. On Cramér-like asymptotics for risk processes with stochastic return on investments	1247–1260
PENG, SHIGE AND NAGAI, HIDEO. Risk-sensitive dynamic portfolio optimization with partial information on infinite time horizon	173–195
PENROSE, MATHEW D. AND YUKICH, J. E. Limit theory for random sequential packing and deposition	272–301
PHAM, HUYÊN. Minimizing shortfall risk and applications to finance and insurance problems	143–172
POPOV, S. YU., ALVES, O. S. M. AND MACHADO, F. P. The shape theorem for the frog model	533–546
PROTTER, PHILIP, SAN MARTÍN, JAIME, TORRES, SOLEDAD AND MA, JIN. Numerical method for backward stochastic differential equations	302–316
PUHA, AMBER L., WILLIAMS, RUTH J. AND GROMOLL, H. CHRISTIAN. The fluid limit of a heavily loaded processor sharing queue	797–859
RANDALL, DANA AND MADRAS, NEAL. Markov chain decomposition for convergence rate analysis	581–606

RESNICK, SIDNEY, ROOTZÉN, HOLGER, STEGEMAN, ALWIN AND MIKOSCH, THOMAS. Is network traffic approximated by stable Lévy motion or fractional Brownian motion?	23–68
ROBERT, PHILIPPE AND DANTZER, JEAN-FRANÇOIS. Fluid limits of string valued Markov processes	860–889
ROBERTS, GARETH O. AND JARNER, SØREN F. Polynomial con- vergence rates of Markov chains	224–247
ROOTZÉN, HOLGER, STEGEMAN, ALWIN, MIKOSCH, THOMAS AND RESNICK, SIDNEY. Is network traffic approximated by stable Lévy motion or fractional Brownian motion?	23–68
RÖSLER, UWE AND ALSMEYER, GEROLD. Asexual versus pro- miscuous bisexual Galton–Watson processes: the extinction probability ratio	125–142
SAMORODNITSKY, GENNADY, BRAVERMAN, MICHAEL AND MIKOSCH, THOMAS. Tail probabilities of subadditive func- tionals of Lévy processes	69–100
SAMUEL-CAHN, ESTER, ASSAF, DAVID AND GOLDSTEIN, LARRY. Ratio prophet inequalities when the mortal has several choices	972–984
SAN MARTÍN, JAIME, TORRES, SOLEDAD, MA, JIN AND PROTTER, PHILIP. Numerical method for backward stochastic differen- tial equations	302–316
SCHEUTZOW, MICHAEL AND CRANSTON, MIKE. Dispersion rates under finite mode Kolmogorov flows	511–532
SCHMIDLI, HANSPETER. On minimizing the ruin probability by investment and reinsurance	890–907
SHEN, LIAN. Asymptotic properties of certain anisotropic walks in random media	477–510
SHEU, S. J. AND FLEMING, W. H. Risk-sensitive control and an optimal investment model II	730–767
SOLAN, EILON AND VIEILLE, NICOLAS. Uniform value in recur- sive games	1185–1201
SPEED, TERENCE P. AND GROTE, MARK N. Approximate Ewens formulae for symmetric overdominance selection	637–663
STEGEMAN, ALWIN, MIKOSCH, THOMAS, RESNICK, SIDNEY AND ROOTZÉN, HOLGER. Is network traffic approximated by sta- ble Lévy motion or fractional Brownian motion?	23–68
STEINSALTZ, DAVID AND EVANS, STEVEN N. Estimating some features of NK fitness landscapes	1299–1321
TAKEMURA, AKIMICHI AND KURIKI, SATOSHI. On the equiva- lence of the tube and Euler characteristic methods for the distrib- ution of the maximum of Gaussian fields over piecewise smooth domains	768–796

TOOMEY, FERGAL. Large deviations of products of random topical operators	317–333
TORRES, SOLEDAD, MA, JIN, PROTTER, PHILIP AND SAN MARTÍN, JAIME. Numerical method for backward stochastic differential equations	302–316
VIEILLE, NICOLAS AND SOLAN, EILON. Uniform value in recursive games	1185–1201
WILLIAMS, RUTH J., GROMOLL, H. CHRISTIAN AND PUHA, AMBER L. The fluid limit of a heavily loaded processor sharing queue	797–859
XIA, AIHUA AND CHOI, K. P. Approximating the number of successes in independent trials: Binomial versus Poisson	1139–1148
YUKICH, J. E. AND PENROSE, MATHEW D. Limit theory for random sequential packing and deposition	272–301
ZABCZYK, JERZY AND FILIPOVIĆ, DAMIR. Markovian term structure models in discrete time	710–729
ZACHARY, STAN AND ZIEDINS, ILZE. A refinement of the Hunt–Kurtz theory of large loss networks, with an application to virtual partitioning	1–22
ZHANG, JIANFENG AND MA, JIN. Representation theorems for backward stochastic differential equations	1390–1418
ZHANG, LI-XIN, BAI, Z. D. AND HU, FEIFANG. Gaussian approximation theorems for urn models and their applications	1149–1173
ZIEDINS, ILZE AND ZACHARY, STAN. A refinement of the Hunt–Kurtz theory of large loss networks, with an application to virtual partitioning	1–22
