

THE ANNALS *of* APPLIED PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Information flow on trees	ELCHANAN MOSSEL AND YUVAL PERES	817
Stochastic interacting particle systems and nonlinear kinetic equations	ANDREAS EIBECK AND WOLFGANG WAGNER	845
Volatility time and properties of option prices	SVANTE JANSON AND JOHAN TYSK	890
On validity of the asymptotic expansion approach in contingent claim analysis	NAOTO KUNITOMO AND AKIHIKO TAKAHASHI	914
The valuation of American call options on the minimum of two dividend-paying assets	JEROME DETEMPLE, SHUI FENG AND WEIDONG TIAN	953
Affine processes and applications in finance	D. DUFFIE, D. FILIPOVIĆ AND W. SCHACHERMAYER	984
Asymptotic ruin probabilities and optimal investment	J. GAIER, P. GRANDITS AND W. SCHACHERMAYER	1054
Perpetual options and Canadization through fluctuation theory	A. E. KYPRIANOU AND M. R. PISTORIUS	1077
Limit theorem for Leland's strategy	S. PERGAMENSHCHIKOV	1099
A broader view of Brownian networks	J. MICHAEL HARRISON	1119
Control of end-to-end delay tails in a multiclass network: LWDF discipline optimality	ALEXANDER L. STOLYAR	1151
Some probability distributions in modeling DNA replication	AIMÉ LACHAL	1207
