## CONTENTS OF VOLUME 3

### Special Invited Papers and Articles

ADLER, ROBERT J., SAMORODNITSKY, GENNADY AND GADRICH, TAMAR. The expected number of level crossings for stationary, harmonisable, symmetric, stable processes . . . . .	553–575
ALEXANDER, KENNETH S. A note on some rates of convergence in first-passage percolation . . . . .	81–90
ALMEIDA, MURILO P. AND GIDAS, BASILIS. A variational method for estimating the parameters of MRF from complete or incomplete data . . . . .	103–136
ALSMAYER, GEROLD. On the Galton–Watson predator–prey process . . . . .	198–211
ANANTHARAM, V. Uniqueness of stationary ergodic fixed point for a $\mathcal{A}/M/K$ node . . . . .	154–172
ANTONELLI, FABIO. Backward–forward stochastic differential equations . . . . .	777–793
AVRAM, FLORIN AND BERTSIMAS, DIMITRIS. On central limit theorems in geometrical probability . . . . .	1033–1046
BALDI, PAOLO, FRIGESSI, ARNOLDO AND PICCIONI, MAURO. Importance sampling for Gibbs random fields . . . . .	914–933
BARBOUR, A. D. AND GREENWOOD, P. E. Rates of Poisson approximation to finite range random fields . . . . .	91–102
BERTSIMAS, DIMITRIS AND AVRAM, FLORIN. On central limit theorems in geometrical probability . . . . .	1033–1046
BLASZCZYSZYN, B. AND ROLSKI, T. Queues in series in light traffic . . . . .	881–896
CAPIŃSKI, MAREK AND CUTLAND, NIGEL J. The Euler equation: A uniform nonstandard construction of a global flow, invariant measures and statistical solutions . . . . .	212–227
CHASSAING, PHILIPPE. Optimality of move-to-front for self-organizing data structures with locality of references . . . . .	1219–1240
CLIFFORD, PETER AND WEI, GANG. The equivalence of the Cox process with squared radial Ornstein–Uhlenbeck intensity and the death process in a simple population model . . . . .	863–873
COFFMAN, JR., E. G., GILBERT, E. N. AND SHOR, P. W. A selection–replacement process on the circle . . . . .	802–818
COHEN, JOEL E. AND ŁUCZAK, TOMASZ. Stratigraphy of a random acyclic directed graph: The size of trophic levels in the cascade model . . . . .	403–420
COX, J. THEODORE, GANDOLFI, ALBERTO, GRIFFIN, PHILIP S. AND KESTEN, HARRY. Greedy lattice animals I: upper bounds . . . . .	1151–1169
CUTLAND, NIGEL J. AND CAPIŃSKI, MAREK. The Euler equation: A uniform nonstandard construction of a global flow, invariant measures and statistical solutions . . . . .	212–227
CVITANIĆ, JAKŠA AND KARATZAS, IOANNIS. Hedging contingent claims with constrained portfolios . . . . .	652–681

DAI, J. G. AND HARRISON, J. M. The QNET method for two-moment analysis of closed manufacturing systems . . . . .	968–1012
DAVIS, RICHARD A. AND RESNICK, SIDNEY I. Prediction of stationary max-stable processes . . . . .	497–525
DE GUNST, MATHISCA C. M. AND VAN ZWET, WILLEM R. A non-Markovian model for cell population growth: tail behavior and duration of the growth process . . . . .	1112–1144
DEN HOLLANDER, FRANK AND GREVEN, ANDREAS. A variational characterization of the speed of a one-dimensional self-repellent random walk . . . . .	1067–1099
DIACONIS, PERSI AND SALOFF-COSTE, LAURENT. Comparison theorems for reversible Markov chains . . . . .	696–730
DUFFIE, J. DARRELL AND HARRISON, J. MICHAEL. Arbitrage pricing of Russian options and perpetual lookback options . . . . .	641–651
DURRETT, RICHARD AND SCHINAZI, RINALDO. Asymptotic critical value for a competition model . . . . .	1047–1066
DYER, MARTIN, FRIEZE, ALAN AND PITTEL, BORIS. The average performance of the greedy matching algorithm . . . . .	526–552
EISENBERG, BENNETT, STENGLE, GILBERT AND STRANG, GILBERT. The asymptotic probability of a tie for first place . . . . .	731–745
FERRARI, PABLO A., FRIGESSI, ARNOLDO AND SCHONMANN, ROBERTO H. Convergence of some partially parallel Gibbs sampler with annealing . . . . .	137–153
FILL, JAMES ALLEN AND PEMANTLE, ROBIN. Percolation, first-passage percolation and covering times for the Richardson's model on the $n$ -Cube . . . . .	593–629
FISCH, ROBERT, GRAVNER, JANKO AND GRIFFEATH, DAVID. Metastability in the Greenberg-Hastings model . . . . .	935–967
FONTES, LUIZ AND NEWMAN, CHARLES M. First passage percolation for random colorings of $\mathbb{Z}^d$ . . . . .	746–762
FRIEZE, ALAN, PITTEL, BORIS AND DYER, MARTIN. The average performance of the greedy matching algorithm . . . . .	526–552
FRIGESSI, ARNOLDO, PICCIONI, MAURO AND BALDI, PAOLO. Importance sampling for Gibbs random fields . . . . .	914–933
FRIGESSI, ARNOLDO, SCHONMANN, ROBERTO H. AND FERRARI, PABLO A. Convergence of some partially parallel Gibbs sampler with annealing . . . . .	137–153
GADRICH, TAMAR, ADLER, ROBERT J. AND SAMORODNITSKY, GENNADY. The expected number of level crossings for stationary, harmonisable, symmetric, stable processes . . . . .	553–575
GANDOLFI, ALBERTO, GRIFFIN, PHILIP S., KESTEN, HARRY AND COX, J. THEODORE. Greedy lattice animals I: upper bounds . . . . .	1151–1169
GATES, D. J. AND WESTCOTT, M. Markov models of steady crystal growth . . . . .	339–355
GIDAS, BASILIS AND ALMEIDA, MURILO P. A variational method for estimating the parameters of MRF from complete or incomplete data . . . . .	103–136

GILBERT, E. N., SHOR, P. W. AND COFFMAN, JR., E. G. A selection-replacement process on the circle . . . . .	802-818
GLAZEBROOK, K. D. Indices for families of competing Markov decision processes with influence . . . . .	1013-1032
GRAVNER, JANKO, GRIFFEATH, DAVID AND FISCH, ROBERT. Metastability in the Greenberg-Hastings model . . . . .	935-967
GREENWOOD, P. E. AND BARBOUR, A. D. Rates of Poisson approximation to finite range random fields . . . . .	91-102
GREVEN, ANDREAS AND DEN HOLLANDER, FRANK. A variational characterization of the speed of a one-dimensional self-repellent random walk . . . . .	1067-1099
GRIFFEATH, DAVID, FISCH, ROBERT AND GRAVNER, JANKO. Metastability in the Greenberg-Hastings model . . . . .	935-967
GRiffin, PHILIP S., KESTEN, HARRY, COX, J. THEODORE AND GANDOLFI, ALBERTO. Greedy lattice animals I: upper bounds . . . . .	1151-1169
HANNAN, E. J. AND WAHLBERG, B. Parametric signal modelling using Laguerre filters . . . . .	467-496
HARRISON, J. M. AND DAI, J. G. The QNET method for two-moment analysis of closed manufacturing systems . . . . .	968-1012
HARRISON, J. MICHAEL AND DUFFIE, J. DARRELL. Arbitrage pricing of Russian options and perpetual lookback options . . . . .	641-651
HEINRICH, ARTHUR C. AND STOCKBRIDGE, RICHARD H. Optimal control and replacement with state-dependent failure rate: An invariant measure approach . . . . .	380-402
HEINRICH, ARTHUR C. AND STOCKBRIDGE, RICHARD H. Optimal control and replacement with state-dependent failure rate: Dynamic programming . . . . .	364-379
HOGAN, MICHAEL. Problems in certain two-factor term structure models . . . . .	576-581
HONG, SUNG JO AND YAMADA, KEIGO. A limit theorem for functionals of jumps of birth and death processes under heavy traffic condition . . . . .	840-862
HWANG, CHII-RUEY, HWANG-MA, SHU-YIN AND SHEU, SHUENN-JYI. Accelerating Gaussian diffusions . . . . .	897-913
HWANG-MA, SHU-YIN, SHEU, SHUENN-JYI AND HWANG, CHII-RUEY. Accelerating Gaussian diffusions . . . . .	897-913
ISCOE, I., McDONALD, D. AND QIAN, K. Capacity of ATM switches . . . . .	277-295
ISHAM, VALERIE. Stochastic models for epidemics with special reference to AIDS . . . . .	1-27
JAILLET, PATRICK. Cube versus torus models and the Euclidean minimum spanning tree constant . . . . .	582-592
JOFFE, A. A new Martingale in branching random walk . . . . .	1145-1150
KAJ, INGEMAR AND SALMINEN, PAAVO. On a first passage problem for branching Brownian motions . . . . .	173-185
KARATZAS, IOANNIS AND CVITANIĆ, JAKŠA. Hedging contingent claims with constrained portfolios . . . . .	652-681

KELLA, OFFER. Parallel and tandem fluid networks with dependent Lévy inputs . . . . .	682–695
KESTEN, H. AND VAN DEN BERG, J. Inequalities for the time constant in first-passage percolation . . . . .	56–80
KESTEN, HARRY, COX, J. THEODORE, GANDOLFI, ALBERTO AND GRIFFIN, PHILIP S. Greedy lattice animals I: upper bounds .	1151–1169
KESTEN, HARRY. On the speed of convergence in first-passage percolation . . . . .	296–338
KOOK, KWANG HO AND SERFOZO, RICHARD F. Travel and sojourn times in stochastic networks . . . . .	228–252
KRICHAGINA, ELENA V., LOU, SHELDON X. C., SETHI, SURESH P. AND TAKSAR, MICHAEL I. Production control in a failure-prone manufacturing system: Diffusion approximation and asymptotic optimality . . . . .	421–453
LEE, SUNGCHUL. An inequality for greedy lattice animals . . . . .	1170–1188
LOU, SHELDON X. C., SETHI, SURESH P., TAKSAR, MICHAEL I. AND KRICHAGINA, ELENA V. Production control in a failure-prone manufacturing system: Diffusion approximation and asymptotic optimality . . . . .	421–453
ŁUCZAK, TOMASZ AND COHEN, JOEL E. Stratigraphy of a random acyclic directed graph: The size of trophic levels in the cascade model . . . . .	403–420
MANNION, DAVID. Products of $2 \times 2$ random matrices . . . . .	1189–1218
MATTHEWS, PETER C. AND RUKHIN, ANDREW L. Asymptotic distribution of the normal sample range . . . . .	454–466
MCDONALD, D., QIAN, K. AND ISCOE, I. Capacity of ATM switches .	277–295
METRY, MAGDY H. AND SAMPSON, ALLAN R. Orderings for positive dependence on multivariate empirical distributions . . . . .	1241–1251
MIYAZAWA, MASAKIYO AND SCHMIDT, VOLKER. On ladder height distributions of general risk processes . . . . .	763–776
NEWMAN, CHARLES M. AND FONTES, LUIZ. First passage percolation for random colorings of $\mathbb{Z}^d$ . . . . .	746–762
NGUYEN, VIÊN. Processing networks with parallel and sequential tasks: Heavy traffic analysis and Brownian limits . . . . .	28–55
PEMANTEL, ROBIN AND FILL, JAMES ALLEN. Percolation, first-passage percolation and covering times for the Richardson's model on the $n$ -Cube . . . . .	593–629
PENROSE, MATHEW D. On the spread-out limit for bond and continuum percolation . . . . .	253–276
PICCIONI, MAURO, BALDI, PAOLO AND FRIGESSI, ARNOLDO. Importance sampling for Gibbs random fields . . . . .	914–933
PITTEL, BORIS, DYER, MARTIN AND FRIEZE, ALAN. The average performance of the greedy matching algorithm . . . . .	526–552
QIAN, K., ISCOE, I. AND MCDONALD, D. Capacity of ATM switches .	277–295
RESNICK, SIDNEY I. AND DAVIS, RICHARD A. Prediction of stationary max-stable processes . . . . .	497–525

RHEE, WANSOO T. A matching problem and subadditive Euclidean functionals . . . . .	794–801
ROLSKI, T. AND BŁASZCZYSZYN, B. Queues in series in light traffic . . . . .	881–896
ROSENTHAL, JEFFREY S. Rates of convergence for data augmentation on finite sample spaces . . . . .	819–839
RUKHIN, ANDREW L. AND MATTHEWS, PETER C. Asymptotic distribution of the normal sample range . . . . .	454–466
SALMINEN, PAAVO AND KAJ, INGEMAR. On a first passage problem for branching Brownian motions . . . . .	173–185
SALOFF-COSTE, LAURENT AND DIACONIS, PERSI. Comparison theorems for reversible Markov chains . . . . .	696–730
SAMORODNITSKY, GENNADY, GADRICH, TAMAR AND ADLER, ROBERT J. The expected number of level crossings for stationary, harmonisable, symmetric, stable processes . . . . .	553–575
SAMPSON, ALLAN R. AND METRY, MAGDY H. Orderings for positive dependence on multivariate empirical distributions . . . . .	1241–1251
SCHINAZI, RINALDO AND DURRETT, RICHARD. Asymptotic critical value for a competition model . . . . .	1047–1066
SCHMIDT, VOLKER AND MIYAZAWA, MASAKIYO. On ladder height distributions of general risk processes . . . . .	763–776
SCHONMANN, ROBERTO H., FERRARI, PABLO A. AND FRIGESSI, ARNOLDO. Convergence of some partially parallel Gibbs sampler with annealing . . . . .	137–153
SERFOZO, RICHARD F. AND KOOK, KWANG HO. Travel and sojourn times in stochastic networks . . . . .	228–252
SETHI, SURESH P., TAKSAR, MICHAEL I., KRICHAGINA, ELENA V. AND LOU, SHELDON X. C. Production control in a failure-prone manufacturing system: Diffusion approximation and asymptotic optimality . . . . .	421–453
SHEPP, LARRY AND SHIRYAEV, A. N. The Russian option: reduced regret . . . . .	631–640
SHEU, SHUENN-JYI, HWANG, CHII-RUEY AND HWANG-MA, SHU-YIN. Accelerating Gaussian diffusions . . . . .	897–913
SHIRYAEV, A. N. AND SHEPP, LARRY. The Russian option: reduced regret . . . . .	631–640
SHOR, P. W., COFFMAN, JR., E. G. AND GILBERT, E. N. A selection-replacement process on the circle . . . . .	802–818
STEIN, MICHAEL L. Asymptotic properties of centered systematic sampling for predicting integrals of spatial processes . . . . .	874–880
STENGLE, GILBERT, STRANG, GILBERT AND EISENBERG, BENNETT. The asymptotic probability of a tie for first place . . . . .	731–745
STOCKBRIDGE, RICHARD H. AND HEINRICH, ARTHUR C. Optimal control and replacement with state-dependent failure rate: An invariant measure approach . . . . .	380–402

STOCKBRIDGE, RICHARD H. AND HEINRICKER, ARTHUR C. Optimal control and replacement with state-dependent failure rate: Dynamic programming . . . . .	364-379
STRANG, GILBERT, EISENBERG, BENNETT AND STENGLE, GILBERT. The asymptotic probability of a tie for first place . . . . .	731-745
TAKÁCS, LAJOS. On the distribution of the integral of the absolute value of the Brownian motion . . . . .	186-197
TAKSAR, MICHAEL I., KRICHAGINA, ELENA V., LOU, SHELDON X. C. AND SETHI, SURESH P. Production control in a failure-prone manufacturing system: Diffusion approximation and asymptotic optimality . . . . .	421-453
TALAGRAND, M. AND YUKICH, J. E. The integrability of the square exponential transportation cost . . . . .	1100-1111
WAHLBERG, B. AND HANNAN, E. J. Parametric signal modelling using Laguerre filters . . . . .	467-496
WEI, GANG AND CLIFFORD, PETER. The equivalence of the Cox process with squared radial Ornstein-Uhlenbeck intensity and the death process in a simple population model . . . . .	863-873
WESTCOTT, M. AND GATES, D. J. Markov models of steady crystal growth . . . . .	339-355
YAMADA, KEIGO AND HONG, SUNG JO. A limit theorem for functionals of jumps of birth and death processes under heavy traffic condition . . . . .	840-862
YCART, BERNARD. The philosophers' process: An ergodic reversible nearest particle system . . . . .	356-363
YUKICH, J. E. AND TALAGRAND, M. The integrability of the square exponential transportation cost . . . . .	1100-1111
VAN DEN BERG, J. AND KESTEN, H. Inequalities for the time constant in first-passage percolation . . . . .	56-80
VAN ZWET, WILLEM R. AND DE GUNST, MATHISCA C. M. A non-Markovian model for cell population growth: tail behavior and duration of the growth process . . . . .	1112-1144
