

# STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars; technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published; moreover, a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in each issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s. 3d. including postage and packing.

## TECHNOMETRICS

*A Journal of Statistics  
for the Physical, Chemical and Engineering Sciences*

### CONTENTS

TECHNOMETRICS, Vol. 12, No. 2, MAY 1970

A Method of Estimating Variance Components in Unbalanced Designs.....	P. Seeger
Improved Parameter Estimation.....	M. J. Box
Statistical Aspects of Character Recognition.....	J. L. Dolby
A New Weighted Average.....	K. B. Stewart
Computers as an Instrument for Data Analysis.....	M. E. Muller
Curtailed Attribute Sampling.....	A. C. Cohen
The Efficiency of Sequential Sampling Plans Based on Prior Distributions and Costs.....	W. Schüler and J. Pfanzagl

Distribution of Quasimidranges and Associated Mixtures.....	R. T. Leslie and D. Culpin
Sequencing with Random Service Times.....	P. C. Bagga
Approximations to System Reliability Using a Modular Decomposition.....	L. D. Bodin
Estimators and Exact Confidence Bounds for Weibull Parameters Based on a Few Ordered Observations.....	N. R. Mann

Maximum Likelihood Estimation, Exact Confidence Intervals for Reliability and Tolerance Limits in the Weibull Distribution.....	D. R. Thoman, L. J. Bain and C. E. Antle
A Technique for the Computation of Percentage Points of a Statistic.....	P. N. Somerville

#### NOTES

Comparing Two Methods of Obtaining a Confidence Interval for the Ratio of Poisson Parameters.....	J. L. Jaech
A Note on Separation of Variables.....	H. Scheffé
Residuals in Two Dimensions.....	N. R. Draper and W. Lawrence
Estimation of Parameters in Compound Weibull Distributions.....	L. W. Falls
Planning Censored Life Tests for Estimation of the Hazard Rate of a Weibull Distribution with Prescribed Precision.....	L. Danziger
On Proportional Hazard Functions.....	A. Nádas

#### QUERIES

#### BOOK REVIEWS

Raj, Des., SAMPLING THEORY.....	A. R. Sen
Rivlin, Theodore J., AN INTRODUCTION TO THE APPROXIMATION OF FUNCTIONS.....	Joseph Jerome

#### SUMMARIES OF NEW BOOKS

#### LETTERS TO THE EDITOR

The purpose of **TECHNOMETRICS** is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact **TECHNOMETRICS** Post Office Box 587 Benjamin Franklin Station

# REVIEW OF THE INTERNATIONAL STATISTICAL INSTITUTE

*Contents of Vol. 38, No. 2, 1970*

## Articles

- Nordbotten, S.—Individual data files and their utilization in sociodemographic model building in the Norwegian Central Bureau of Statistics.  
Kakwani, N. C., Court, R.—Simultaneous-equation estimation under linear restrictions with application to New-Zealand meat demand.  
Särndal, C. E.—A class of explicata for “information” and “weight of evidence”.  
Aigner, D. J.—The estimation of moments for a Pareto distribution subject to both sampling and grouping errors.  
Mehta, J. S., Swamy, P. A. V. B.—The finite sample distribution of Theil’s mixed regression estimator and a related problem.  
Hussain, A.—Efficiency of two-stage estimators for the parameters of a multi-regression model.  
Ramsey, J. B.—A note on alternative single equation estimators in simultaneous equation systems.  
Lancaster, H. O.—A bibliography of bibliographies: a third list.

## Communications

Statistical organization and administration  
Statistical training and research  
Statistical societies

## Calendar of meetings

## Book reviews

The REVIEW OF THE ISI is published three times per year. The annual subscription is \$11.50 post free.

Orders should be sent to: *International Statistical Institute, 2, Oostduinlaan, The Hague, Netherlands.*

## BIOMETRICS

*Journal of the Biometric Society*

Vol. 26, No. 2

CONTENTS

June 1970

- Evaluation of safety in food additives.....M. A. Gross, O. G. Fitzhugh, and N. Mantel  
Validation of an *in vitro* enzyme assay indirectly measuring an *in vivo* biosynthesis.....  
R. B. McHugh, J. F. Van Pilsum, and F. W. Briese  
Use of graph theory in computation of inbreeding and kinship coefficients.....T. Maruyama and N. Yasuda  
Effects of selection and drift on the dynamics of finite populations.....R. F. Nassar and R. N. Carr  
Selectively disadvantageous mutants.....Glenys J. Thomson  
Expected mean squares in variance component models having finite populations.....S. R. Searle  
Restriction errors for linear models (an aid to develop models for designed experiments).....V. L. Anderson  
Change detection model for serially correlated multivariate data.....  
R. H. Jones, D. H. Crowell and Linda E. Kapuniai  
The optimal spacing of repeated measurements.....D. F. Morrison  
Incomplete contingency tables.....N. Mantel  
A new test of association for continuous variables.....R. C. Elston  
Relative efficiency of sampling systems in the Canadian waterfowl harvest survey.....A. R. Sen  
Notes by W. T. Federer and A. Hedayat, S. C. Pearce, F. Pimentel Gomes, H. A. David, B. M. Bennett,  
and A. V. Kharshikar  
Correction note by R. E. Bechhofer

Biometrics is published quarterly. Its objects are to describe and exemplify the use of mathematical and statistical methods in biological and related sciences in a form assimilable by experimenters. The annual non-member subscription rate is \$15.00. Inquiries, non-member subscriptions, and orders for back issues, should be addressed to: Biometrics Business Office, Department of Experimental Statistics, North Carolina State University, Raleigh, North Carolina 27607 U.S.A. Editorial correspondence should be directed to: Biometrics Editorial Office, Department of Biostatistics, School of Public Health, University of North Carolina, Chapel Hill, North Carolina 27514 U.S.A.

## TRABAJOS DE ESTADISTICA y de INVESTIGACION OPERATIVA

Review published by the "Instituto de Investigaciones Operativa y Estadística" of the Spanish C.S.I.C. MADRID.

**VOL. XX**

**CONTENTS**

**CUAD. II y III**

MIGUEL MARTIN DIAZ.—Juegos bipersonales de suma nula con pago convexo.

ENRIQUE TEIXIDO RIERA.—Una metodología para solucionar problemas de ordenamiento con ligaduras disyuntivas.

PROCOPIO ZOROA TEROL.—Existencia de juegos diferenciales con valor dado.

R. P. GUPTA AND M. T. WASAN.—Bivariate time distribution of Brownian motion.

THOMAS A. KRIZ, J. V. TALACKO AND T. K. ISGII.—Statistical properties of Boolean variables generated by a class of binary arithmetic processes.

N. K. MALHOTRA.—Operational readiness of a complex system with general waiting & repair time distributions.

N. K. MALHOTRA.—Stochastic behaviour of a complex system with general waiting & repair time distributions.

J. S. METHA AND J. GURLAND.—On combining unbiased estimators of the mean.

SURYA PRAKASH AND SANTOSH KUMAR.—On the stochastic behaviour of an intermittent system with stand-by redundancy.

K. RAGHUNANDANAN.—A note on the distribution of sojourn time in a Markov chain.

B. RAJA RAO.—Partial canonical correlations.

S. S. SRIVASTAVA AND P. P. SANGAL.—Optimum plan for a level attack against a possible deployment of ground anti-aircraft gun.

NOTAS:

MIGUEL MARTIN DIAZ.—Nota sobre un problema de decisión cuando se conoce un orden parcial de preferencias sobre un espacio de consecuencias.

W. KRYSICKI.—Momentos de distribución condicional de probabilidad de los números de series.

M. V. RAMA SATRY.—A note on the method of scoring and the linearized maximum likelihood.

Ejercicios

TRABAJOS DE ESTADISTICA Y DE INVESTIGACION OPERATIVA is published three issues a year. Annual subscription post free U.S. \$6; price each part U.S. \$2.50.

All communications concerning the publication of papers, interchanges and subscriptions should be addressed to Prof. S. Rios, Serrano 123, Madrid-6, Spain.

## JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, SERIES A (GENERAL), four issues a year, annual subscription, post free, £5 4s. U. S. \$15; price each part £2; SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free, £2. U. S. \$12; price each part £2; SERIES C (APPLIED STATISTICS), three issues a year, annual subscription £2; U. S. \$5, price each part 15s.

Reviews; Current Notes; Library Accessions

Contents of SERIES B (METHODOLOGICAL), Vol. 32, PART 1, 1970

Stochastic models for earthquake occurrence (with discussion) D. VERE-JONES

The measure of association of rows and columns in a  $r \times s$  contingency table PATRICIA M. E. ALTHAM

A bivariate non-parametric  $s$ -sample test DR. K. V. MARDIA

A probability plotting procedure for general analysis of variance R. GNANADESIKAN AND M. B. WILK

Inequalities in the theory of queues J. F. C. KINGMAN

On priority queues in heavy traffic S. MAZUMDAR

Use of the Kolmogorov-Smirnov, Cramer-von Mises and related statistics without extensive tables M. A. STEPHENS

On bounds useful in the theory of symmetrical factorial designs B. R. GULATI AND E. G. KOUNIAS

On the asymptotic relative efficiencies of certain location parameter estimates R. M. LOYNES

Use of generalized matrices in Manova J. A. JOHN

On a sequential analogue of the Behrens-Fisher problem M. S. SRIVASTAVA

An explicit-limit theorem for the critical Galton-Watson process with immigration E. SENETA

**The Royal Statistical Society 21, Bentinck Street, London, W. 1**

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

### *President*

Jack C. Kiefer, Department of Mathematics, Cornell University, Ithaca, New York 14850

### *President-Elect:*

William Kruskal, Department of Statistics, University of Chicago, Chicago, Illinois 60637

### *Executive Secretary:*

Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

### *Program Secretary:*

R. V. Hogg, Department of Statistics, University of Iowa, Iowa City, Iowa 52240

### *Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

### *Editor:*

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

### *Managing Editor:*

K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U. S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

### **(Instructions for authors—continued)**

Authors are asked to keep in mind the typographical difficulties and high cost of printing complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown: care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and  $\alpha$ , kappa and  $k$ , mu and  $\mu$ , nu and  $\nu$ , eta and  $\eta$ , etc. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided;  $\liminf$  and  $\limsup$  are preferable to  $\underline{\lim}$  and  $\overline{\lim}$ . Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Unusual accents on letters should be avoided or replaced by superscripts or subscripts. Complicated exponentials should be represented with the symbol  $\exp$ . In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the solidus or negative exponent; thus  $(a+b)/(c+d)$  rather than  $\frac{a+b}{c+d}$ , and  $(2\pi)^{-1}$  rather than  $\frac{1}{2\pi}$ . In addition to decreasing the printing costs, a simple notation greatly improves the readability and appearance of a manuscript.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers may be ordered at cost on forms which will be provided by the printer.

## Contents (Continued)

Gauss-Markov estimation for multivariate linear models: A coordinate free approach	MORRIS L. EATON	528
Ergodic theorems for infinite probabilistic tables	A. PAZ	539
Betting systems in favorable games	ALAN J. TRUELOVE	551
Further results on minimum variance unbiased estimation and additive number theory	G. P. PATIL AND S. W. JOSHI	567
A system of Markov chains with random life times	FREDERICK W. LEYSIEFFER	576
Best tests for testing hypotheses about a random parameter with unknown distribution	GLEN MEEDEN	585
A local limit theorem and recurrence conditions for sums of independent non-lattice random variables	J. MINEKA AND S. SILVERMAN	592
The asymptotic behavior of Bayes' estimators	M. T. CHAO	601
Estimation for monotone parameter sequences: The discrete case	HAROLD SACKROWITZ	609
On the weak convergence of probability measures	LUCIEN LECAM	621
Optimally timing the sale of stock when the tax man is breathing down your neck	ARTHUR ALBERT	626
<b>Notes</b>		
A family of minimax estimators of the mean of a multivariate normal distribution	A. J. BARANCHIK	642
An addendum to "Stochastic approximation and nonlinear regression"	L. A. GARDNER AND A. E. ALBERT	646
On relationship algebras of incomplete block designs	J. ROBINSON	648
An $M/G/\infty$ estimation problem	MARK BROWN	651
Joint distribution of the extreme roots of a covariance matrix	T. SUGIYAMA	655
Characteristic functions, moments, and the Central Limit Theorem	B. M. BROWN	658
On a certain recurrence relation	J. C. AHUJA	665
The order of the minimum variance in a non-regular case	THOMAS POLFELDT	667
Minimum variance order when estimating the location of an irregularity in the density	THOMAS POLFELDT	673
A note on random polynomials	RICHARD G. WOOD	680
An extension of Wilks' test for the equality of means	I. OLKIN AND S. S. SHRIKHANDE	683
Recursive estimation of a subset of regression coefficients	RICHARD H. JONES	688
Distribution theory of positive definite quadratic form with matrix argument	B. K. SHAH	692
A characterization of a conditional expectation with respect to a $\sigma$ -lattice	RICHARD L. DYKSTRA	698
Convex cones and finite optimals	T. E. S. RAGHAVAN	702
Convergence properties of martingale transforms	HARRO WALK	706
A weak convergence theorem for random sums of independent random variables	PEDRO J. FERNANDEZ	710
A multivariate definition for increasing hazard rate distribution functions	ROBERT HARRIS	713
On multivariate density estimates based on orthogonal expansions	MICHAEL TARTER AND RICHARD KRONMAL	718
The distribution of the ratios of means to the square root of the sum of variances of a bivariate normal sample	S. A. PATIL AND S. H. LIAO	723
A note on a paper by H. G. Tucker	LAURENS DE HAAN	729
A remark on almost invariance	ROBERT H. BERK	733
A necessary and sufficient condition that for regular multiple decision problems of type I every unbiased procedure has minimax risk	WILHELMINE STEFANSKY	736
Extension of a result of Seneta for the super-critical Galton-Watson process	C. C. HEYDE	739
Analysis of Room's square design	K. R. SHAH	743
Book Reviews	RAOUL LEPAGE, NARESH C. JAIN, HARRY DYM	746
Abstracts		751
News and Notices		758
Publications Received		764

**NOTE.** The calendar of meetings of the Institute and information concerning submission of abstracts are given immediately before the first article.
