
STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields; for example, reliability, quality control, experiments, surveys, queueing, congestion and forecasting. Approximately 500 journals are scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

Approximately 400 words long, these literary informative abstracts are written in English; the language of the original paper is indicated. The heading not only gives the name and address of the author together with the journal in which the paper was published, but a note is given of references, tables, etc.

The revised classification scheme consists of three parts. The pages of the journal are colour-tinted in groups to provide visual indication of twelve main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special table in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. When papers are concerned with new statistical tables the relevant classification for the Greenwood/Hartley Guide (1962) is indicated in a special section.

The abstracts are numbered serially, the volume number being inserted as a prefix. The journal is published four times a year and contains approximately 1,250 abstracts. Relevant indexes are published in each issue and combined in a yearly supplement.

<i>Annual Subscription</i>	£7.10s. (U. S. A. \$24.00)
<i>Single Number</i>	£2.5s. (U. S. A. \$4.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s.3d including postage and packing.

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 62

March 1967

Number 317

Presidential Address.....	Frederick F. Stephan
Missing Observations in Multivariate Statistics II. Point Estimation in Simple Linear Regression.....	Robert M. Elashoff and A. Afifi
A Multivariate Exponential Distribution.....	Ingram Olkin and Albert W. Marshall
Life-Testing Results Based on a Few Heterogeneous Lognormal Observations.....	John E. Walsh and A. J. McCulloch
Bayesian Approach to Life Testing and Reliability Estimation.....	S. K. Bhattacharya
Optimal Sample Design with Nonresponse.....	William Ericson
A Note on Fellegi's Method of Sampling without Replacement with Probability Proportional to Size.....	Kenneth R. W. Brewer
Step-Wise Clustering Procedures.....	Benjamin King
Inclusion and Exclusion.....	Lajos Takacs
An Algorithm for Obtaining the Zero of a Function of the Dispersion Matrix in Multivariate Analysis.....	Irene M. Trawinski
The Robustness of Hotelling's T^2	Olive Jean Dunn and Lois Nelson Holloway
Seasonal Adjustment of Data for Econometric Analysis.....	Dale W. Jorgenson
The Unbiasedness of Zellner's Seemingly Unrelated Regression Equation Estimators.....	N. C. Kakwani
Regional Disparities in Household Consumption in India.....	N. Bhattacharya and B. Mahalanobis
Measures of Concentration.....	Marshall Hall and Nicolaus Tideman
Some Further Notes on Disturbance Estimates in Regression Analysis.....	J. Koerts
Wilcoxon Confidence Intervals for Location Parameters in the Discrete Case.....	Gottfried E. Noether
A Partial Coefficient for Goodman and Kruskal's Gamma.....	James A. Davis
Ties in Paired-Comparison Experiments: A Generalization of the Bradley-Terry Model.....	P. V. Rao and Lawrence L. Kupper
Sequences Balanced for Pairs of Residual Effects.....	C. R. Nair
Equal and Proportional Frequency Squares.....	Sidney Adelman
The Combination of Estimates from Similar Experiments Allowing for Inter-Experiment Variation.....	Pamela M. Morse and A. Bickle
A Note on Regression in the Multivariate Poisson Distribution.....	D. M. Mahamunulu
Distribution of some Statistics in Samples from Exponential and Power-Functions Populations.....	Jiri Likes
Estimation of the Probability of Zero Failures in m Binomial Trials.....	Herbert C. Rutemiller
The Moments of a Doubly Non-Central t -Distribution.....	Marakatha Krishnan
Note on a Uniqueness Relation in Certain Accident Proneness Models.....	N. L. Johnson
Book Reviews

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

President-Elect:

Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

Program Secretary:

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

A new family of partially balanced incomplete block designs with some latin square design properties.....	DALE M. MESNER 571
Notes	
A solution to a countable system of equalities arising in Markovian decision processes.....	CYRUS DERMAN AND ARTHUR F. VEINOTT, JR. 582
A potential theoretic proof of a theorem of Derman and Veinott	RONALD A. SCHAUFEL 585
On stationary Markov processes.....	RICHARD ISAAC 588
On the cross periodogram of a stationary Gaussian vector process	T. SUBBA RAO 593
A remark on the law of the iterated logarithm.....	DAVID A. FREEDMAN 599
Optimal stopping when the future is discounted	LESTER E. DUBINS AND HENRY TEICHER 601
A note on risk and maximal regular generalized submartingales in stopping problems.....	H. CHERNOFF 606
On the expected value of a stopped submartingale.....	Y. S. CHOW 608
On the strong law of large numbers for martingales.....	Y. S. CHOW 610
A technical lemma for monotone likelihood ratio families.....	J. PFANZAGL 611
A counter-example relating to certain multivariate generalizations of t and F	A. W. DAVIS 613
On the distribution of the largest root of a matrix in multivariate analysis	K. C. SREEDHARAN PILLAI 616
On obtaining balanced incomplete block designs from partially balanced association schemes.....	PETER W. M. JOHN 618
A mean-square-error characterization of binomial-type distributions	M. C. K. TWEEDIE 620
Correction Notes.....	624
Book Reviews	
J. NEVEU: <i>Mathematical Foundations of the Calculus of Probability</i>	R. M. BLUMENTHAL 624
N. U. PRABHU: <i>Stochastic Processes</i>	MEYER DWASS 626
ROBERT ASH: <i>Information Theory</i>	J. WOLFOWITZ 627
TITO A. MIJARES: <i>Percentage Points of the Sum $V_1^{(s)}$ of Roots ($s = 1 - 50$) A Unified Table for Tests of Significance in Various Univariate and Multivariate Hypotheses</i>	R. GNANIDESIKAN 628
E. S. PEARSON AND H. O. HARTLEY: <i>Biometrics for Statisticians</i>	D. B. OWEN 632
Abstracts of Papers.....	634
News and Notices.....	644
Report of the Los Angeles Meeting.....	653
Publications Received.....	658

MEETINGS OF THE INSTITUTE

WESTERN REGIONAL - Missoula, Montana - June 15-17, 1967
ANNUAL MEETING - Washington, D. C. - December 27-30, 1967

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
