

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Conditional expectation given a σ -lattice and applications. . . H. D. BRUNK	1339
An introduction to polyspectra DAVID BRILLINGER	1351
The Robbins-Isbell two-armed-bandit problem with finite memory CARTER VINCENT SMITH AND RONALD PYKE	1375
A Bayes sequential sampling inspection HERMAN CHERNOFF AND S. N. RAY	1387
Markovian decision models for the evaluation of a large class of continuous sampling inspection plans LEON S. WHITE	1408
Some applications of monotone operators in Markov processes J. MACQUEEN AND R. M. REDHEFFER	1421
On the extrapolation of a special class of stationary time series WILLIAM F. TRENCH	1426
Sampling entropy for random homogeneous systems with complete con- nections MARIUS IOSIFESCU	1433
Limit theorems for queues with traffic intensity one. . . DONALD L. IGLEHART	1437
On random sums of random vectors HENRY TEICHER	1450
On the generalized Mellin transform of a complex random variable and its applications. IGNACY KOTLARSKI	1459
Multiparameter problems from a Bayesian point of view G. E. P. BOX AND GEORGE C. TIAO	1468
Optimum designs for polynomial extrapolation PAUL G. HOEL	1483
A method of sequential estimation applicable to the hypergeometric, bi- nomial, Poisson, and exponential distributions . . . WILLIAM KNIGHT	1494
The effect of truncation on tests of hypotheses for normal populations BRITAIN J. WILLIAMS	1504
Some results on the non-central multivariate beta distribution and moments of traces of two matrices. C. G. KHATRI AND K. G. S. PILLAI	1511
Some inequalities for central and non-central distributions WILLIAM H. LAWTON	1521
Cyclic designs H. A. DAVID AND F. W. WOLOCK	1526
Generalized right angular designs SURESH K. THARTHARE	1535
Notes	
On a problem in non-linear prediction theory. . . JAMES B. ROBERTSON	1554
Conditional expectations of random variables without expectations R. E. STRAUCH	1556

(Continued on back cover)

Vol. 36, No. 5—October 1965

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U. S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$15 per volume, \$4.00 per issue; issues from 1957 through 1964 are \$20.00 per volume, \$5.25 per issue; from 1965 onward, \$30 per volume, \$5.25 per issue. Complete sets (Volumes I-XXVII) are \$250. If additional volumes are ordered at the same time the set is ordered, the price is \$15 for each additional volume. An index to Volumes I-XXXI is available for \$10.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address**, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61803. **Abstracts** and **corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittied or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
