BIOMETRIKA

Volume 44 **Contents** **Parts 3 and 4, December 1957**

KARL PEARSON, 1857–1957. Centenary lecture by J. B. S. HALDANE. LESLIE, P. H. An analysis of the data for some experiments carried out by Gause with populations of the protozoa, *Paramecium aurelia* and *Paramecium caudatum*. COX, D. R. & SMITH, W. L. On the distribution of *Tribolium confusum* in a container. WATSON, G. S. The χ^2 goodness-of-fit test for normal distributions. SATHE, Y. S. & KAMAT, A. R. Approximations to the distributions of some measures of dispersion based on successive differences. HAIGHT, F. Queueing with balking. DURBIN, J. Testing for serial correlation in systems of simultaneous regression equations. CURNOW, R. N. Heterogeneous error variances in split-plot experiments. HARRIS, A. J. A maximum-minimum problem related to statistical distributions in two dimensions. ROY, S. N. & GNANADESIKAN, R. Further contributions to multivariate confidence bounds. STEVENS, W. L. Shorter intervals for the parameter of the binomial and Poisson distributions. JOWETT, G. H. Statistical analysis using local properties of smoothly heteromorphic stochastic series. ANSCOMBE, F. J. Dependence of the fiducial argument on the sampling rule. FIELLER, E. C., HARTLEY, H. O. & PEARSON, E. S. Tests for rank correlation coefficients. I. BERKSON, J. Tables for use in estimating the normal distribution function by normit analysis. MOORE, P. G. The two-sample *t*-test based on range. FOSTER, F. G. Upper percentage points of the generalized beta-distribution. II. DOIG, ALISON. A bibliography on the theory of queues.
Miscellanea—Contributions by M. S. BARTLETT, B. E. COOPER, N. L. JOHNSON, D. S. PALMER, A. R. THATCHER, J. W. TUKEY
Corrigenda—D. R. COX *Reviews* *Other Books Received*

The subscription, *payable in advance*, is now 54/- (or $8.00), per volume (including postage). Cheques should be made payable to *Biometrika*, crossed *"a/c Biometrika Trust"* and sent to the Secretary, Biometrika Office, Department of Statistics, University College, London, W.C.1. All foreign cheques must be drawn on a Bank having a London agency.
Issued by THE BIOMETRIKA OFFICE, University College, London

Colloquium Publications, Volume XXXI, *Revised edition.*

FUNCTIONAL ANALYSIS AND SEMI-GROUPS

by EINAR HILLE and RALPH S. PHILLIPS

This is a completely revised and largely rewritten edition of the Colloquium volume of the same name by the first author. The framework of the earlier book has been kept, but the subject matter has been rearranged and much expanded. The algebraic tools are introduced much earlier and put to important use thoughout the treatise. Functional analysis occupies almost one third of the book. The sections devoted to the analytical theory of semi-groups have been augmented by new material on perturbation theory, adjoint theory, spectral theory, operational calculus, and stochastic theory.

INTER AMERICAN STATISTICAL INSTITUTE

Pan American Union
Washington 6, D.C.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

L. J. Savage, Department of Statistics, University of Chicago, Chicago 37, Illinois

President-Elect:

J. Wolfowitz, Department of Mathematics, Cornell University, Ithaca, New York

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

Editor:

T. E. Harris, The RAND Corporation, 1700 Main Street, Santa Monica, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are $10.00 per year for residents of the United States or Canada and $5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Secretary of the Institute.

(Continued from inside front cover)

matical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Contents (continued)

On the Detection of Defective Members of Large Populations...ANDREW STERRETT 1033
Maximum Likelihood Estimates in a Simple Queue.....A. BRUCE CLARKE 1036
Most Powerful Rank-Type Tests.....D. A. S. FRASER 1040
Asymptotic Behavior of Tests on the Mean of a Logarithmico-Normal Distribution With Known Variance.....NORMAN C. SEVERO 1044
A t-test for the Serial Correlation Coefficient.....JOHN S. WHITE 1046
Groups and Conditional Monte Carlo.....J. G. WENDEL 1048
Tables for Type A Critical Regions.....HARRY WEINGARTEN 1052
A Note on BIBDS.....RALPH G. STANTON 1054
Correction.....I. J. GOOD 1055
Abstracts of Papers..... 1056
News and Notices..... 1076

Institutional Members..... 1098

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

WESTERN REGIONAL MEETING—Los Angeles, California, December 27–28, 1957. MIDWESTERN REGIONAL MEETING—Ames, Iowa, April 3–5, 1958. EASTERN REGIONAL MEETING (with Biometric Society)—Gatlinburg, Tennessee, April 10–12, 1958. ANNUAL MEETING (with American Mathematical Society)—Cambridge, Massachussetts, August 25–28, 1958.

Abstracts should be submitted in duplicate to the Editor, preferably on abstract blanks, which can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members.
