

CONTENTS OF VOLUME 31

Articles

ADLER, ROBERT J. AND TAYLOR, JONATHAN E. Euler characteristics for Gaussian fields on manifolds	533–563
ALABERT, AURELI AND FERRANTE, MARCO. Linear stochastic differential equations with functional boundary conditions.....	2082–2108
ARNAUDON, MARC AND THALMAIER, ANTON. Yang–Mills fields and random holonomy along Brownian bridges	769–790
BASS, RICHARD F. AND CHEN, ZHEN-QING. Brownian motion with singular drift	791–817
BENDIKOV, ALEXANDER AND SALOFF-COSTE, LAURENT. On the sample paths of Brownian motions on compact infinite dimensional groups	1464–1493
BENJAMINI, ITAI, HÄGGSTRÖM, OLLE, PERES, YUVAL AND STEIF, JEFFREY E. Which properties of a random sequence are dynamically sensitive?	1–34
BENJAMINI, ITAI, KALAI, GIL AND SCHRAMM, ODED. First passage percolation has sublinear distance variance	1970–1978
BERG, J. VAN DEN AND JÁRAI, A. A. The lowest crossing in two-dimensional critical percolation	1241–1253
BOBKOV, S. G.. On concentration of distributions of random weighted sums	195–215
BOUCHERON, STÉPHANE, LUGOSI, GÁBOR AND MASSART, PASCAL. Concentration inequalities using the entropy method	1583–1614
BROFFERIO, SARA. Speed of stochastic locally contractive systems	2040–2067
BRUSS, F. THOMAS. A note on bounds for the odds theorem of optimal stopping	1859–1861
BURDZY, KRZYSZTOF AND KULCZYCKI, TADEUSZ. Stable processes have thorns	170–194
CHEN, XIA AND LI, WENBO V.. Quadratic functionals and small ball probabilities for the m -fold integrated Brownian motion ...	1052–1077
CHEN, ZHEN-QING AND BASS, RICHARD F. Brownian motion with singular drift	791–817
CHOIRAT, CHRISTINE, HESS, CHRISTIAN AND SERI, RAFFAELLO. A functional version of the Birkhoff ergodic theorem for a normal integrand: A variational approach	63–92
CRISAN, DAN. Exact rates of convergence for a branching particle approximation to the solution of the Zakai equation	693–718
CSÖRGŐ, MIKLÓS, SZYSZKOWICZ, BARBARA AND WANG, QIYING. Darling–Erdős theorem for self-normalized sums ..	676–692

CSÖRGŐ, MIKLÓS, SZYSZKOWICZ, BARBARA AND WANG, QIYING. Donsker's theorem for self-normalized partial sums processes	1228–1240
DA PRATO, GIUSEPPE AND DEBUSSCHE, ARNAUD. Strong solutions to the stochastic quantization equations	1900–1916
DEBUSSCHE, ARNAUD AND DA PRATO, GIUSEPPE. Strong solutions to the stochastic quantization equations	1900–1916
DEN HOLLANDER, FRANK, KÖNIG, WOLFGANG AND VAN DER HOFSTAD, REMCO. Large deviations for the one-dimensional Edwards model	2003–2039
DUAN, JINQIAO, LU, KENING AND SCHMALFUSS, BJÖRN. Invariant manifolds for stochastic partial differential equations ...	2109–2135
DUQUESNE, THOMAS. A limit theorem for the contour process of conditioned Galton–Watson trees	996–1027
DURRETT, RICHARD AND LIMIC, VLADA. Rigorous results for the NK model	1713–1753
DZHAPARIDZE, KACHA, SPREIJ, PETER AND VALKEILA, ESKO. Information processes for semimartingale experiments	216–243
ERSCHLER, ANNA. On drift and entropy growth for random walks on groups	1193–1204
EVANS, STEVEN N. AND SOWERS, RICHARD B. Pinching and twisting Markov processes	486–527
FAHRNER, I. AND STADTMÜLLER, U. Strong approximation of maxima by extremal processes	926–947
FERNIQUE, XAVIER. Extension du théorème de Cameron–Martin aux translations aléatoires	1296–1304
FERRANTE, MARCO AND ALABERT, AURELI. Linear stochastic differential equations with functional boundary conditions	2082–2108
GAO, F., HANNIG, J. AND TORCASO, F. Integrated Brownian motions and exact L_2 -small balls	1320–1337
GINÉ, EVARIST, MASON, DAVID M. AND ZAITSEV, ANDREI YU. The L_1 -norm density estimator process	719–768
GRADINARU, MIHAI, RUSSO, FRANCESCO AND VALLOIS, PIERRE. Generalized covariations, local time and Stratonovich Itô's formula for fractional Brownian motion with Hurst index $H \geq \frac{1}{4}$	1772–1820
GRIGOR'YAN, ALEXANDER AND KELBERT, MARK. Recurrence and transience of branching diffusion processes on Riemannian manifolds	244–284
GROTHAUS, MARTIN, KONDRATIEV, YURI G., LYTVYNOV, EUGENE AND RÖCKNER, MICHAEL. Scaling limit of stochastic dynamics in classical continuous systems	1494–1532

GUILLIN, A. Averaging principle of SDE with small diffusion: Moderate deviations	413–443
GYÖNGY, ISTVÁN AND KRYLOV, NICOLAI. On the splitting-up method and stochastic partial differential equations	564–591
HÄGGSTRÖM, OLLE, PERES, YUVAL, STEIF, JEFFREY E. AND BENJAMINI, ITAI. Which properties of a random sequence are dynamically sensitive?	1–34
HANNIG, J., TORCASO, F. AND GAO, F. Integrated Brownian motions and exact L_2 -small balls	1320–1337
HARA, TAKASHI, HOFSTAD, REMCO VAN DER AND SLADE, GORDON. Critical two-point functions and the lace expansion for spread-out high-dimensional percolation and related models	349–408
HARRELSON, D. AND HOUDRÉ, C. A characterization of m -depen- dent stationary infinitely divisible sequences with applications to weak convergence	849–881
HESS, CHRISTIAN, SERI, RAFFAELLO AND CHOIRAT, CHRISTINE. A functional version of the Birkhoff ergodic theorem for a normal integrand: A variational approach	63–92
HINO, MASANORI AND RAMÍREZ, JOSÉ A. Small-time Gaussian behavior of symmetric diffusion semigroups	1254–1295
HOFSTAD, REMCO VAN DER, SLADE, GORDON AND HARA, TAKASHI. Critical two-point functions and the lace expansion for spread-out high-dimensional percolation and related models	349–408
HÖSEL, VOLKER AND LASSER, RUPERT. Prediction of weakly stationary sequences on polynomial hypergroups	93–114
HOUDRÉ, C. AND HARRELSON, D. A characterization of m -depen- dent stationary infinitely divisible sequences with applications to weak convergence	849–881
HSU, ELTON P. Brownian motion and Dirichlet problems at infinity	1305–1319
HWANG, HSIEN-KUEI. Second phase changes in random m -ary search trees and generalized quicksort: Convergence rates	609–629
IBRAGIMOV, RUSTAM, SHARAKHMETOV, SHATURGUN AND PEÑA, VICTOR H. DE LA. On extremal distributions and sharp L_p -bounds for sums of multilinear forms	630–675
JACKA, SAUL AND TRIBE, ROGER. Comparisons for measure valued processes with interactions	1679–1712
JACOD, J., JAKUBOWSKI, A. AND MÉMIN, J. On asymptotic errors in discretization of processes	592–608
JAJTE, RYSZARD. On the strong law of large numbers	409–412
JAKUBOWSKI, A., MÉMIN, J. AND JACOD, J. On asymptotic errors in discretization of processes	592–608

JÁRAI, A. A. AND BERG, J. VAN DEN. The lowest crossing in two-dimensional critical percolation	1241–1253
JÁRAI, ANTAL A. Incipient infinite percolation clusters in 2D	444–485
JEU, MARCEL DE. Determinate multidimensional measures, the extended Carleman theorem and quasi-analytic weights	1205–1227
JING, BING-YI, SHAO, QI-MAN AND WANG, QIYING. Self-normalized Cramér-type large deviations for independent random variables	2167–2215
JUNGE, MARIUS AND XU, QUANHUA. Noncommutative Burkholder/Rosenthal inequalities	948–995
KALAI, GIL, SCHRAMM, ODED AND BENJAMINI, ITAI. First passage percolation has sublinear distance variance	1970–1978
KARATZAS, IOANNIS AND ŽITKOVIĆ, GORDAN. Optimal consumption from investment and random endowment in incomplete semimartingale markets	1821–1858
KEANE, MICHAEL AND STEIF, JEFFREY E. Finitary coding for the one-dimensional T, T^{-1} process with drift	1979–1985
KELBERT, MARK AND GRIGOR'YAN, ALEXANDER. Recurrence and transience of branching diffusion processes on Riemannian manifolds	244–284
KHOSHNEVISAN, DAVAR, XIAO, YIMIN AND ZHONG, YUQUAN. Measuring the range of an additive Lévy process	1097–1141
KLÜPPELBERG, CLAUDIA AND PERGAMENCHTCHIKOV, SERGUEI. Renewal theory for functionals of a Markov chain with compact state space	2270–2300
KONDRATIEV, YURI G., LYTVYNOV, EUGENE, RÖCKNER, MICHAEL AND GROTHAUS, MARTIN. Scaling limit of stochastic dynamics in classical continuous systems	1494–1532
KÖNIG, WOLFGANG, VAN DER HOFSTAD, REMCO AND DEN HOLLANDER, FRANK. Large deviations for the one-dimensional Edwards model	2003–2039
KRYLOV, NICOLAI AND GYÖNGY, ISTVÁN. On the splitting-up method and stochastic partial differential equations	564–591
KULCZYCKI, TADEUSZ AND BURDZY, KRZYSZTOF. Stable processes have thorns	170–194
LANDIM, C. AND YAU, H. T. Convergence to equilibrium of conservative particle systems on \mathbb{Z}^d	115–147
LASSER, RUPERT AND HÖSEL, VOLKER. Prediction of weakly stationary sequences on polynomial hypergroups	93–114
LI, WENBO V. The first exit time of a Brownian motion from an unbounded convex domain	1078–1096

LI, WENBO V. AND CHEN, XIA. Quadratic functionals and small ball probabilities for the m -fold integrated Brownian motion . . .	1052–1077
LIMIC, VLADA. Attracting edge property for a class of reinforced random walks	1615–1654
LIMIC, VLADA AND DURRETT, RICHARD. Rigorous results for the NK model	1713–1753
LU, KENING, SCHMALFUSS, BJÖRN AND DUAN, JINQIAO. Invariant manifolds for stochastic partial differential equations . . .	2109–2135
LUGOSI, GÁBOR, MASSART, PASCAL AND BOUCHERON, STÉPHANE. Concentration inequalities using the entropy method	1583–1614
LYTVYNOV, EUGENE, RÖCKNER, MICHAEL, GROTHAUS, MARTIN AND KONDRATIEV, YURI G. Scaling limit of stochastic dynamics in classical continuous systems	1494–1532
MAIRESSE, JEAN AND PRABHAKAR, BALAJI. The existence of fixed points for the $\cdot/GI/1$ queue	2216–2236
MARCKERT, JEAN-FRANÇOIS AND MOKKADEM, ABDELKADER. The depth first processes of Galton–Watson trees converge to the same Brownian excursion	1655–1678
MARCUS, M. B. AND ROSEN, J. New perspectives on Ray’s theorem for the local times of diffusions	882–913
MASON, DAVID M., ZAITSEV, ANDREI YU. AND GINÉ, EVARIST. The L_1 -norm density estimator process	719–768
MASSART, PASCAL, BOUCHERON, STÉPHANE AND LUGOSI, GÁBOR. Concentration inequalities using the entropy method	1583–1614
MATTNER, LUTZ. Mean absolute deviations of sample means and minimally concentrated binomials	914–925
MEESTER, RONALD AND ZNAMENSKI, DMITRI. Limit behavior of the Bak–Sneppen evolution model	1986–2002
MÉMIN, J., JACOD, J. AND JAKUBOWSKI, A. On asymptotic errors in discretization of processes	592–608
MOKKADEM, ABDELKADER AND MARCKERT, JEAN-FRANÇOIS. The depth first processes of Galton–Watson trees converge to the same Brownian excursion	1655–1678
MYTNIK, LEONID AND PERKINS, EDWIN. Regularity and irregularity of $(1 + \beta)$ -stable super-Brownian motion	1413–1440
NUALART, DAVID, ROVIRA, CARLES AND TINDEL, SAMY. Probabilistic models for vortex filaments based on fractional Brownian motion	1862–1899
OWHADI, HOUMAN. Anomalous slow diffusion from perpetual homogenization	1935–1969

- PANCHENKO, DMITRY. Symmetrization approach to concentration inequalities for empirical processes 2068–2081
