

# INDEX TO VOLUME 25

July–October 1991

## Research-Expository Papers

- Adler, Roy and Flatto, Leopold. *Geodesic flows, interval maps, and symbolic dynamics*, 229  
Flatto, Leopold. *See* Adler, Roy  
Herb, Rebecca A. *Harish-Chandra and his work*, 1  
Radin, Charles. *Global order from local sources*, 335

## Research Announcements

- Ashbaugh, Mark S. and Benguria, Rafael D. *Proof of the Payne-Pólya-Weinberger Conjecture*, 19  
Böttcher, Albrecht and Wolf, Hartmut. *Finite sections of Segal-Bargmann space Toeplitz operators with polyradially continuous symbols*, 365  
Benguria, Rafael D. *See* Ashbaugh, Mark S.  
Bierstone, Edward and Milman, Pierre D. *Geometric and differential properties of subanalytic sets*, 385  
Bochnak, J. and Kucharz, W. *Elliptic curves and real algebraic morphisms into the 2-sphere*, 81  
Curto, Raúl E. and Putinar, Mihai. *Existence of non-subnormal polynomially hyponormal operators*, 373  
Félix, Yves, Halperin, Stephen, and Thomas, Jean-Claude. *Elliptic spaces*, 69  
Gabai, David. *Convergence groups are Fuchsian groups*, 395  
Halperin, Stephen. *See* Félix, Yves  
Hara, Takashi and Slade, Gordon. *Critical behaviour of self-avoiding walk in five or more dimensions*, 417  
Iiyori, Nobuo and Yamaki, Hiroyoshi. *On a conjecture of Frobenius*, 413  
Kuang, Jinghua. *On the basis problem for Siegel-Hilbert modular forms*, 61  
Kucharz, W. *See* Bochnak, J.  
Lisiecki, Wojciech. *A classification of coherent state representations of unimodular Lie groups*, 37  
Mason, Geoffrey. *G-elliptic systems and the genus zero problem for  $M_{24}$* , 45  
Mayer, Dieter H. *The thermodynamic formalism approach to Selberg's zeta function for  $\mathrm{PSL}(2, \mathbb{Z})$* , 55  
Menasco, William W. and Thistlethwaite, Morwen B. *The Tait flyping conjecture*, 403  
Milman, Pierre D. *See* Bierstone, Edward  
Mockenhaupt, Gerd. *A restriction theorem for the Fourier transform*, 31  
Moody, John Atwell. *The Burau representation of the braid group  $B_n$  is unfaithful for large  $n$* , 379  
Osofsky, Barbara L. *A construction of nonstandard uniserial modules over valuation domains*, 89  
Putinar, Mihai. *See* Curto, Raúl E.  
Shapiro, B. Z. and Shapiro, M. Z. *On the number of connected components in the space of closed nondegenerate curves on  $S^p$* , 75  
Shapiro, M. Z. *See* Shapiro, B. Z.  
Slade, Gordon. *See* Hara, Takashi  
Thistlethwaite, Morwen B. *See* Menasco, William W.  
Thomas, Jean-Claude. *See* Félix, Yves  
Wolf, Hartmut. *See* Böttcher, Albrecht  
Yamaki, Hiroyoshi. *See* Iiyori, Nobuo

## INDEX TO VOLUME 25

### Book Reviews

- Azizov, T. Ya. and Iokhvidov, I. S. *Linear operators in spaces with an indefinite metric*, reviewed by Leiba Rodman, 111
- Barnsley, Michael F. *Fractals everywhere*, reviewed by Tim Bedford, 151
- Beals, Michael. *Propagation and interaction of singularities in nonlinear hyperbolic problems*, reviewed by Jeffrey Rauch, 157
- Burstall, Francis E. and Rawnsley, John H. *Twistor theory for Riemannian symmetric spaces*, reviewed by Raymond O. Wells, Jr., 454
- Carmichael, Richard D. and Mitrović, Dragiša. *Distributions and analytic functions*, reviewed by John Horváth, 162
- Carnielli, Walter A. *See* Epstein, Richard L.
- Cornwell, J. F. *Group theory in physics, volume III, Supersymmetries and infinite-dimensional algebras*, reviewed by Alex J. Feingold, 432
- van Dulst, D. *Characterization of Banach Spaces not containing  $\ell^1$* , reviewed by Michel Talagrand, 123
- Epstein, Richard L. and Carnielli, Walter A. *Computability; (computable functions, logic, and the foundations of mathematics)*, reviewed by Martin Davis, 106
- Filippov, V. M. *Variational principles for nonpotential operators*, reviewed by Roman I. Andrushkiw, 221
- Freitag, Eberhard. *Hilbert modular forms*, reviewed by Gerard van der Geer, 441
- Frenkel, Igor, Lepowsky, James, and Meurman, Arne. *Vertex operator algebras and the Monster*, reviewed by Andrew Ogg, 425
- Garrett, Paul B. *Holomorphic Hilbert modular forms*, reviewed by Michael Harris, 184
- Goldmann, H. *Uniform Fréchet algebras*, reviewed by John Wermer, 180
- Goodman, F. M., de la Harpe, P., and Jones, V. F. R. *Coxeter graphs and towers of algebras*, reviewed by Joan S. Birman, 195
- Gripenberg, G., Londen, S.-O., and Staffans, O. *Volterra integral and functional equations*, reviewed by Richard C. MacCamy, 146
- Gunning, Robert C. *Introduction to holomorphic functions of several variables*, reviewed by Steven G. Krantz, 205
- de la Harpe, P. *See* Goodman, F. M.
- Hayman, W. K. *Subharmonic functions, vol. 2*, reviewed by Albert Baernstein, II, 458
- Iokhvidov, I. S. *See* Azizov, T. Ya.
- Jensen, Christian U. and Lenzing, Helmut. *Model theoretic algebra*, reviewed by G. Sabbagh, 215
- Jones, V. F. R. *See* Goodman, F. M.
- Kleidman, Peter and Liebeck, Martin. *The subgroup structure of the finite classical groups*, reviewed by Michael Aschbacher, 200
- Lenzing, Helmut. *See* Jensen, Christian U.
- Lepowsky, James. *See* Frenkel, Igor
- Liebeck, Martin. *See* Kleidman, Peter
- Londen, S.-O. *See* Gripenberg, G.
- Makkai, Michael and Paré, Robert. *Accessible categories: The foundations of categorical model theory*, reviewed by John W. Gray, 131
- Meurman, Arne. *See* Frenkel, Igor
- Mitrović, Dragiša. *See* Carmichael, Richard D.
- Paré, Robert. *See* Makkai, Michael
- Pisier, Gilles. *The volume of convex bodies and Banach space geometry*, reviewed by Donald L. Burkholder, 140
- Protter, Philip. *Stochastic integration and differential equations—a new approach*, reviewed by R. J. Williams, 170

INDEX TO VOLUME 25

- Rawnsley, John H. *See* Burstall, Francis E.
- Shidlovskii, Andrei B. *Transcendental numbers*, reviewed by R. Tijdeman, 445
- Shorey, T. N. and Tijdeman, R. *Algorithms for Diophantine equations*, reviewed by J. L. Brenner, 145
- Staffans, O. *See* Gripenberg, G.
- Tijdeman, R. *See* Shorey, T. N.
- de Weger, B. M. M. *Exponential Diophantine Equations*, reviewed by J. L. Brenner, 145
- Wilf, Herbert S. *Generatingfunctionology*, reviewed by W. K. Hayman, 104
- Wong, Roderick. *Asymptotic approximations of integrals*, reviewed by B. Gabutti, 99

# JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

## TRANSLATION JOURNALS

**Soviet Mathematics–Doklady** is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences in the USSR. DOKLADY publishes 500 articles a year, each about four pages long.

**Mathematics of the USSR–Izvestiya**, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

**Mathematics of the USSR–Sbornik** is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKIĪ SBORNIK (NOVAYA SERIYA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

**Theory of Probability and Mathematical Statistics** is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĪ I MATEMATICHESKAYA STATISTIKA published by Kiev University, beginning with the 1970 Soviet publication.

**Transactions of the Moscow Mathematical Society** is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA which contains the results of original research in pure mathematics.

**Proceedings of the Steklov Institute of Mathematics** is a translation of the AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA. Issues contain book-length articles or collections of articles pertaining to the same topic.

**Leningrad Mathematical Journal** is a translation of ALGEBRA I ANALIZ.

## CONTENT AND SUBMISSION INFORMATION FOR RESEARCH JOURNALS

**Bulletin (New Series) of the American Mathematical Society** contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics. See inside front cover for submission information.

**Journal of the American Mathematical Society** is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

**Mathematics of Computation** is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, WALTER GAUTSCHI, Computer Sciences Department, Purdue University, West Lafayette, Indiana 47907.

**Memoirs of the American Mathematical Society** is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

**Proceedings of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

*Logic and foundations* (03 04) to ANDREAS R. BLASS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

*Combinatorics, computer science, and information theory* (05 15 68 94) to JEFFRY N. KAHN, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

*Commutative algebra* (06 12 13 14 15 18) to LOUIS J. RATLIFF, JR., Department of Mathematics, University of California, Riverside, California 92502

*Number theory and K-theory* (11 19) to WILLIAM ADAMS, Department of Mathematics, University of Maryland, College Park, Maryland 20742

*General algebra* (16 17 18 08) to MAURICE AUSLANDER, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

*Group theory* (20) to RONALD M. SOLOMON, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

*Real variables* (26 28 40) to ANDREW M. BRUCKNER, Department of Mathematics, University of California, Santa Barbara, California 93106

*Complex variables* (30 31 32) to CLIFFORD J. EARLE JR., Cornell University, White Hall, Ithaca, New York 14853

*Ordinary differential equations and dynamical systems* (33 34 39 49 58) to CHARLES PUGH, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

*Partial differential equations* (35 49 53) to BARBARA L. KEYFITZ, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

*General analysis* (31 41 42 43 44 45) to J. MARSHALL ASH, Department of Mathematics, DePaul University, Chicago, Illinois 60614

*Functional analysis and operator theory* (46 47) to PALLE E. T. JORGENSEN, University of Iowa, Iowa City, Iowa 52242

*Functional analysis and convexity* (46 52) to WILLIAM J. DAVIS, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

*Complex variables, functional analysis, and operator theory* (30 46 47) to THEODORE W. GAMELIN, Department of Mathematics, University of California at Los Angeles, Los Angeles, California 90024

*Lie groups and geometry* (22 51 53) to JONATHAN M. ROSENBERG, Department of Mathematics, University of Maryland, College Park, Maryland 20742

*Global analysis and partial differential equations on manifolds* (53 58) to PETER LI, Department of Mathematics, University of Arizona, Tucson, Arizona 85721

*Set theoretic and general topology* (54) to FRANKLIN D. TALL, Department of Mathematics, University of Toronto, Ontario M5S 1A1, Canada

*Metric and geometric topology* (54 57) to JAMES E. WEST, Department of Mathematics, Cornell University, Ithaca, New York 14853

*Algebraic and differential topology* (55 58) to FREDERICK R. COHEN, Department of Mathematics, University of Rochester, Rochester, New York 14627

*Probability and certain other fields* (60-94 inclusive) to LAWRENCE F. GRAY, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455, or GEORGE C. PAPANICOLAOU, Applied Mathematics Division, Courant Institute, New York University, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, IRWIN KRA, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

**Transactions of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Two copies of the manuscript should be submitted to one of the following editors.

*Harmonic analysis, representation theory, and Lie theory* to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

*Abstract analysis* to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

*Real and harmonic analysis* to DAVID JERISON, Department of Mathematics, MIT, Rm. 2-180, Cambridge, MA 02139

*Algebra and algebraic geometry* to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

*Geometric topology and general topology* to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

*Algebraic topology and differential topology* to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

*Ordinary differential equations, partial differential equations, and applied mathematics* to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

*Global analysis and differential geometry* to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

*Probability and statistics* to RICHARD DURRETT, Department of Mathematics, Cornell University, Ithaca, NY 14853-7901

*Combinatorics and number theory* to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

*Logic, set theory, general topology, and universal algebra* to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 37550

*Algebraic number theory, analytic number theory, and modular forms* to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

*Complex analysis and nonlinear partial differential equations* to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

## OTHER JOURNALS

**Abstracts of Papers Presented to the American Mathematical Society** contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

**Current Mathematical Publications**, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

**Mathematical Reviews** is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme (1985 Revision). The subscription includes an annual author and subject index.

**Notices of the American Mathematical Society**, published ten times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

## MANUSCRIPT, PROOF, AND COPYING INFORMATION

### MANUSCRIPT

Articles submitted for publication should be typewritten and double-spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand-drawn symbols are satisfactory if clearly done; special instructions for the typesetter, when necessary, should be included on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification (1985 Revision) can be found in the annual subject index volumes of *Mathematical Reviews*.

To encourage the submission of manuscripts in electronic form using  $\text{\TeX}$  and the  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\TeX}$  macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

### GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

### COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed

to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

## OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

## COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the author upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, a copy is sent to each author. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

## PUBLICATION CHARGES

There are no page charges assessed on papers published in the BULLETIN.

## REMARKS ON RESEARCH ANNOUNCEMENTS

The BULLETIN of the American Mathematical Society is the only research mathematical journal received as a privilege of membership in the Society. Its circulation is larger, by an order of magnitude, than that of most journals, in particular specialized journals. Thus, a BULLETIN Research Announcement should contain results of sufficient depth and import to be of interest to a wide mathematical audience. And, consequently, beyond basic mathematical standards, Research Announcements should meet high standards for style.

Beyond general exhortations to write clearly and precisely, the following more specific suggestions are offered.

1. Keep in mind that you are writing for as wide an audience as possible. Avoid the shorthand and jargon of your area as much as you can. Carefully introduce the terminology needed to understand the main results. If space considerations prevent a full development of the concepts, delineate clearly what you are not explaining and provide references to it in the literature. Consider an Announcement an opportunity to explain your area of research to the world at large.

2. Do not confuse a graceful style with a sloppy style. Although a light touch or a colorful phrase can relieve the tedium of definitions, excessive breeziness and imprecision confuse readers who have only a casual knowledge of the subject. We say this not to encourage pedantic writing but to discourage obscure writing. Your results should be stated precisely with all important concepts and notations made clear.

3. Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is very close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.

<b>Group theory in physics, volume III, Supersymmetries and infinite-dimensional algebras</b> by <i>J. F. Cornwell</i> —Reviewed by <i>Alex J. Feingold</i> .....	432
<b>Hilbert modular forms</b> by <i>Eberhard Freitag</i> —Reviewed by <i>Gerard van der Geer</i> .....	441
<b>Transcendental numbers</b> by <i>Andrei B. Shidlovskii</i> —Reviewed by <i>R. Tijdeman</i> .....	445
<b>Twistor theory for Riemannian symmetric spaces</b> by <i>Francis E. Burstall and John H. Rawnsley</i> —Reviewed by <i>Raymond O. Wells, Jr.</i> .....	454
<b>Subharmonic functions, vol. 2</b> by <i>W. K. Hayman</i> —Reviewed by <i>Albert Baernstein II</i> .....	458

**Research-Expository Papers**

**Geodesic flows, interval maps, and symbolic dynamics** by Roy Adler and Leopold Flatto ..... 229

**Global order from local sources** by Charles Radin ..... 335

**Research Announcements**

**Finite sections of Segal-Bargmann space Toeplitz operators with polyradially continuous symbols** by Albrecht Böttcher and Hartmut Wolf 365

**Existence of non-subnormal polynomially hyponormal operators** by Raúl E. Curto and Mihai Putinar ..... 373

**The Burau representation of the braid group  $B_n$  is unfaithful for large  $n$**  by John Atwell Moody ..... 379

**Geometric and differential properties of subanalytic sets** by Edward Bierstone and Pierre D. Milman ..... 385

**Convergence groups are Fuchsian groups** by David Gabai ..... 395

**The Tait flying conjecture** by William W. Menasco and Morwen B. Thistlethwaite ..... 403

**On a conjecture of Frobenius** by Nobuo Iiyori and Hiroyoshi Yamaki .. 413

**Critical behaviour of self-avoiding walk in five or more dimensions** by Takashi Hara and Gordon Slade ..... 417

**Book Reviews**

**Vertex operator algebras and the Monster** by Igor Frenkel, James Lepowsky, and Arne Meurman—Reviewed by Andrew Ogg ..... 425

**Group theory in physics, volume III, Supersymmetries and infinite-dimensional algebras** by J. F. Cornwell—Reviewed by Alex J. Feingold ..... 432

**Hilbert modular forms** by Eberhard Freitag—Reviewed by Gerard van der Geer ..... 441

**Transcendental numbers** by Andrei B. Shidlovskii—Reviewed by R. Tijdeman ..... 445

**Twistor theory for Riemannian symmetric spaces** by Francis E. Burstall and John H. Rawnsley—Reviewed by Raymond O. Wells, Jr. .... 454

**Subharmonic functions, vol. 2** by W. K. Hayman—Reviewed by Albert Baernstein II ..... 458
