Aue, A. <i>Strong approximation for the sums of squares of augmented GARCH sequences</i>	583
Azaïs, J.-M. <i>Asymptotic distribution and local power of the log-likelihood ratio test for mixtures: bounded and unbounded cases</i>	775
Baldi, P. <i>Explicit computation of second-order moments of importance sampling estimators for fractional Brownian motion</i>	663
Barbour, A.D. <i>On Stein's factors for Poisson approximation in Wasserstein distance</i>	943
Barndorff-Nielsen, O.E. <i>Some classes of multivariate infinitely divisible distributions admitting stochastic integral representations</i>	1
Bernardoff, P. <i>Which multivariate gamma distributions are infinitely divisible?</i>	169
Berkes, I. <i>Strong approximation for the sums of squares of augmented GARCH sequences</i>	583
Bertail, P. <i>Empirical likelihood in some semiparametric models</i>	299
Bertail, P. <i>Regenerative block bootstrap for Markov chains</i>	689
Beskos, A. <i>Retrospective exact simulation of diffusion sample paths with applications</i>	1077
Boutsikas, M.V. <i>Compound Poisson process approximation for locally dependent real-valued random variables via a new coupling inequality</i>	501
Brockwell, P.J. <i>Gaussian maximum likelihood estimation for ARMA models II: Spatial processes</i>	403
Buchmann, B. <i>Fractional integral equations and state space transforms</i>	431
Carter, A.V. <i>A continuous Gaussian approximation to a nonparametric regression in two dimensions</i>	143
Chen, D. <i>The reversible nearest particle system on a finite interval</i>	101
Cléménçon, S. <i>Regenerative block bootstrap for Markov chains</i>	689
Coeurjolly, J.-F. <i>Identification of multifractional Brownian motion</i>	381
Corcuera, J.M. <i>Multivariate prediction</i>	157
Corcuera, J.M. <i>Power variation of some integral fractional processes</i>	713
Cox, D.R. <i>Covariance chains</i>	841
Csörgő, S. <i>Pooling strategies for St Petersburg gamblers</i>	971
DeBlassie, D. <i>Brownian motion in self-similar domains</i>	113
del Castillo, J. <i>Saddlepoint approximation in exponential models with boundary points</i>	491
del Puerto, I.M. <i>Geometric growth for stochastic difference equations with application to branching populations</i>	931
Dette, H. <i>A simple nonparametric estimator of a strictly monotone regression function</i>	469
Ferrante, M. <i>Stochastic delay differential equations driven by fractional Brownian motion with Hurst parameter <math>H &gt; \frac{1}{2}</math></i>	85
Franke, B. <i>The scaling limit behaviour of periodic stable-like processes</i>	551

Gassiat, E. <i>Asymptotic distribution and local power of the log-likelihood ratio test for mixtures: bounded and unbounded cases</i>	775
Gates, J. <i>The shape of a sequence of dual random triangles</i>	55
Girardin, V. <i>Entropy for semi-Markov processes with Borel state spaces: asymptotic equipartition properties and invariance principles</i>	515
Giummolè, F. <i>Multivariate prediction</i>	157
Gobet, E. <i>Rate of convergence of an empirical regression method for solving generalized backward stochastic differential equations</i>	889
González, M. <i>Geometric growth for stochastic difference equations with application to branching populations</i>	931
Hall, P. <i>Locating lines among scattered points</i>	821
Hansen, M.B. <i>Nonparametric inference from the M/G/1 workload</i>	737
Horowitz, J. <i>Optimal estimation in additive regression models</i>	271
Horváth, L. <i>Strong approximation for the sums of squares of augmented GARCH sequences</i>	583
Hult, H. <i>On Kesten's counterexample to the Cramér–Wold device for regular variation</i>	133
Jacod, J. <i>Parametric inference for discretely observed non-ergodic diffusions</i>	383
Johnson, O. <i>Central limit theorem and convergence to stable laws in Mallows distance</i>	191
Kallabis, R.S. <i>An exponential inequality under weak dependence</i>	333
Klemelä, J. <i>Optimal estimation in additive regression models</i>	271
Klok, M.J. <i>Asymptotic error rates in third-generation wireless systems</i>	193
Klüppelberg, C. <i>Fractional integral equations and state space transforms</i>	431
Kokonendji, C.C. <i>A characterization of Poisson–Gaussian families by generalized variance</i>	371
Kyprianou, A.E. <i>Quasi-stationary distributions for Lévy processes</i>	571
Lei, L. <i>Large deviations of the kernel density estimator in <math>L^1(\mathbb{R}^d)</math> for reversible Markov processes</i>	65
Lemor, J.-P. <i>Rate of convergence of an empirical regression method for solving generalized backward stochastic differential equations</i>	889
Linnios, N. <i>Entropy for semi-Markov processes with Borel state spaces: asymptotic equipartition properties and invariance principles</i>	515
Lindskog, F. <i>On Kesten's counterexample to the Cramér–Wold device for regular variation</i>	133
Liu, J. <i>The reversible nearest particle system on a finite interval</i>	101
López-Ratera, A. <i>Saddlepoint approximation in exponential models with boundary points</i>	491
Maejima, M. <i>Some classes of multivariate infinitely divisible distributions admitting stochastic integral representations</i>	1
Malin, P.E. <i>Locating lines among scattered points</i>	821
Mammen, E. <i>Optimal estimation in additive regression models</i>	271
Marchetti, G.M. <i>Covariance chains</i>	841
Marquardt, T. <i>Fractional Lévy processes with an application to long memory moving average processes</i>	1099
Masmoudi, A. <i>A characterization of Poisson–Gaussian families by generalized variance</i>	371
