

INDEX

A

action of group 51
affine group 17, 30, 34, 90
alternating group 45
American Psychological Association data 93
analysis of variance 61, 112, 153, 163
association-measures of 102, 106
association schemes 60
automorphism 32
 of designs 156

B

balanced incomplete block designs 157
Bernoulli-Laplace diffusion 56, 59
bibliography 2, 61
bi-invariant 54
Bingham density 171
Borel shuffle 18, 84
branching theorem 138
bridge 78
Burnsides lemma 135

C

card shuffling 18ff, 69, 77ff
Cayley distance 117ff, 122, 123
character 9
 orthogonality relations for 11
 of symmetric group 137
 as a metric 120
circulant 50ff
cities, distance data 92, 142
class functions 14, 15, 24, 35, 60
codes 46
column stabilizer 132
combinatorial central limit theorem 115
conjugacy 14
Condorcets rule 107
convolution 7
coupling 84
covariance matrices 101
covariance 178
cutoff phenomenon 18, 91
cycle notation 5

D

dimension of representation 5
 direct sum decomposition 8, 12
 draft lottery data 93, 102ff

E

Ehrenfest urn 19, 28, 72, 77, 86, 89
 equivalent representations 9
 exponential families
 from representations 167
 on sphere 170
 theory of 175
 and covariates 178

F

first hit distribution 49, 64ff, 87ff
 first time to cover all 87ff
 Fisher-von Mises distribution 170ff
 fixed points 134
 fixed vector approach 121, 124, 126
 Floyd's game 118
 Fourier inversion theorem 13
 Fourier transform 7
 Frobenius reciprocity 54

G

GL_n 18, 21, 47, 160
 Gelfand pair 54ff, 61ff
 grand tour 20
 group 5
 means and medians on 108, 109
 See also affine group, GL_n , orthogonal group, Z_n , Z_2^n

H

Hamming distance 117, 123
 Hausdorff metric 124ff
 Hollands model 172
 homogeneous space 51
 random walk on 51
 data on
 metrics on 124
 horse race data 174
 hypergroup 113

I

inference for spectral analysis
 invariance 112, 113, 161
 inversions 123
 irreducible representation 5
 isotropy subgroup 51
 item analysis 145, 162

K

k sets of an n set 56, 59, 97, 125, 126
 Kazhdan-Lusztig representations 139
 Kendalls tau 117ff, 123, 127, 130
 as social choice function 108
 Krawtchouk polynomials 58

L

lengths on groups 121ff
 lottery 97ff
 lower bounds 26, 27, 35, 43, 71, 82
 Luce model 174

M

majorization 40, 131
 Mallows model 104, 123
 Markov chains 19, 48ff, 52, 169
 matrix norms 119
 metrics 102ff
 applications of 102ff
 examples of 112ff
 invariance of 112
 on homogeneous space 124
 on probabilities 23, 33, 110
 multidimensional scaling 104, 105

O

orthogonal group 20
 data on 111
 random walk on 20, 47
 metrics on 120
 acting on sphere 105
 orthogonal series estimators 168
 overhand shuffle 19, 87

P

p -adic numbers 21
 panel study data 145, 162
 partially ranked data 93, 125, 127, 147ff
 permutation representation 5, 132
 permutation group see symmetric group
 product group 16
 projective plane 160
 projection pursuit 17

Q

Q -nomial coefficients 128
 Q -sort data 99
 quarternions 14, 50

R

Radon transform 45, 151
 rank tests 111
 random walk – see Affine group, GL_n , orthogonal
 group, Z_n , Z_2^n
 rapidly mixing chain 88
 Rayleigh test 170
 regular representation 12, 120
 representations 5
 of affine group 34
 of Z_n 16
 of symmetric group 3-D, Chapter 7
 riffle shuffle 19, 77
 Robinson-Schensted-Knuth correspondence 139
 robust regression 106

S

Schensted correspondence 139
 Schur's lemma 7
 separation distance 75
 social choice 107
 Spearman's footrule 102, 114, 115ff
 Spearman's rho 116ff
 spectral analysis
 of time series 141
 of permutations 142
 inference for 143
 on homogeneous spaces 147
 and ANOVA 153

sphere
 data on 100
 metrics on 125, 126
 models on 170
 spherical functions 55, 56
 strong uniform time 69, 75
 subrepresentation 5
 symmetric group 5
 representations of 6, 36ff, 131ff
 characters of 37, 137
 data on 93
 random walk on 22 – see card shuffling,
 transpositions
 metrics on 131ff

T

tableau 38, 131
 tabloid 39, 132
 tensor product 8, 44
 time series analysis 141, 165ff
 top in at random shuffle 69
 transitive action 51
 transpositions, random 18, 36ff, 73ff
 trees 21, 104, 105
 trivial representation 5
 two point homogeneous 59

U

Ulam's distance 118ff
 unfolding hypothesis 92
 uniform distribution 10
 convergence to 23, 79
 tests for 109, 170
 upper bound lemma 24, 25, 53
 for strong uniform times 70, 76
 for coupling 86
 useful fact 134

V

variation distance 21, 22, 25, 52
 see also upper bound lemma

W

Weyl group 122ff

Wreath product 155, 162

X Y

Youngs rule 138, 148, 159

Young tableau see tableau

Z

Z_n 15

representations of 15

random walk on 17, 25ff, 28

data on 100, 141

Z_2^n 15

representations of 16

random walk on 18, 28, 58, 67, 72, 77, 86, 89

data on 110, 145, 162

models on 168
