

VOLUME 29 NO.1 2003-04
**REAL ANALYSIS
 EXCHANGE**

CONTENTS

EDITORIAL MESSAGE	1
CONTRIBUTIONS	3
CONFERENCE ANNOUNCEMENTS	5
ERRATA	
Artur Bartoszewicz and Krzysztof Ciesielski	
Errata: MB-Representations and Topological Algebras	7
TOPICAL SURVEYS	
Zbigniew H. Nitecki	
Topological Entropy and the Preimage Structure of Maps	9
RESEARCH ARTICLES	
Ruchi Das and Nikolaos Papanastassiou	
Some Types of Convergence of Sequences of Real Valued Functions	43
A. G. Das and Sarmila Kundu	
A Generalized Henstock Integral	59
T. H. Steele	
Chaos and the Recurrent Set	79
Eva Matoušková	
Bilipschitz Mappings of Nets	89
Jolanta Wesołowska	
On Sets of Discrete Convergence Points of Sequences of	
Real Functions	107
Zbigniew Grande	
Extending Some Functions to Strongly Approximately	
Quasicontinuous Functions	121
Jan Mycielski and Pawel Szeptycki	
Minimizing Moments	131
Antonis Bisbas	
On the Hausdorff Dimension of Average Type Sums of	
Rademacher Functions	139
Lev Bukovský	
Cardinality of Bases of Families of Thin Sets	147
Ewa Strońska	
On the Sum of Functions with Condition (s_3)	155
Adrian I. Ban and Sorin G. Gal	
On Some Pointwise Defects of Properties in Real Analysis	175
Parasar Mohanty and Erik Talvila	
A Product Convergence Theorem for Henstock–Kurzweil Integrals	199
Piotr Szuca	
Loops of Intervals and Darboux Baire 1 Fixed Point Problem . .	205

Zbigniew Piotrowski and Robert W. Vallin	
Conditions Which Imply Continuity	211
Kazimierz Nikodem and Zsolt Páles	
On t -Convex Functions	219
Janusz Matkowski	
Convex Functions with Respect to a Mean and a Characterization of Quasi-Arithmetic Means	229
Mariola Marciniak	
On Path Continuity	247
Janina Ewert and Jacek Jędrzejewski	
Between Arzelá and Whitney Convergence	257
Marek Balcerzak, Artur Bartoszewicz and Krzysztof Ciesielski	
Algebras with Inner MB-Representation	265
Toh Tin-Lam and Chew Tuan-Seng	
The Non-Uniform Riemann Approach to the Multiple Itô-Wiener Integral	275
Tamás Mátrai	
Graphs of Gâteaux Derivatives are w^* -Connected	291
Christian Richter and Irmtraud Stephani	
Cluster Sets and Approximation Properties of Quasi-Continuous and Cliquish Functions	299
S. V. Konyagin	
Rearrangements of Trigonometric Series and Trigonometric Polynomials	323
R. Toledano	
A Note on the Lebesgue Differentiation Theorem in Spaces of Homogeneous Type	335
Jinghu Yu	
Covering the Circle with Random Open Sets	341
Aliasghar Alikhani-Koopaei	
Path Derived Numbers and Path Derivatives of Continuous Functions with Respect to Continuous Systems of Paths	355
Chris Freiling and Cynthia Pittman	
Convexity Using a Combination of Derivatives	365

INROADS

Franciszek Prus-Wiśniowski and Grzegorz Szkiłbiel	
SAC Property and Approximate Semicontinuity	379
Yves Bolle	
Darboux-Integrability and Uniform Convergence	395
L. Ephremidze	
A New Proof of the Ergodic Maximal Equality	409
Szymon Plewik	
A Set of Measure Zero Containing a Copy of Any Finite Set	413

A. Boccuto and V. A. Skvortsov	
Henstock-Kurzweil Type Integration of Riesz-Space-Valued Functions and Applications to Walsh Series	419
M. Federson	
Some Peculiarities of the Henstock and Kurzweil Integrals of Banach Space-Valued Functions	439
Paweł Szeptycki	
Percentiles	461
J. J. Koliha	
Approximation of Convex Functions	465
W. Strauss, N. D. Macheras and K. Musiał	
Non-Existence of Certain Types of Liftings and Densities in Product Spaces with σ -Ideals	473
Ch. Rini Indrati, Soeparna Darmawijaya, Bambang Soedijono, and Subanar	
Convergence Theorems for the Henstock Integral Involving Small Riemann Sums	481
Helena Pawlak	
Properties of the Space $\mathcal{DB}_1^{**}$ with the Metric of Uniform Convergence	489
Zoltán Buczolich	
Category of Density Points of Fat Cantor Sets	497
