

INDEX TO VOLUME 9

- Andrea, Stephen. *On the support of the Radon transform*, 193.
- Appling, William D. L. *Quasi-uniform absolute continuity and integral convergence*, 577.
- Asimow, L. *Interpolation in Banach spaces*, 543.
- Avila, Geraldo S. S., and Costa, David G., *Decays of solutions of symmetric hyperbolic systems of partial differential equations*, 405.
- Barnett, William A. *Random sets and confidence procedures*, 453.
- Beyer, W. A., Harris, D. R., and Ryan, R. J. *A stochastic model of the Isle Royale biome*, 3.
- Bilyeu, Russell G., and Lewis, and Paul W. *Compact operators, weakly compact operators, and smooth points*, 587.
- Bittman, Richard M., and Levy, Lawrence S. *Idempotent Artinian rings and projective covers*, 425.
- Blum, Julius and Eisenberg, Bennett. *Ergodic theorems for mixing transformation groups*, 593.
- Borwein, D., and Jakimovski, A. *Matrix operators on $\mathbb{P}$* , 463.
- Brauer, Fred. *Harvesting strategies for population systems*, 19.
- Campbell, Douglas M., and Pearce, Kent. *Generalized Bazilevic functions*, 197.
- Cima, J., and Schober, G. *On spaces of meromorphic functions*, 527.
- Cohen, Elaine. *On the Fourier coefficients and continuity of functions of class $\mathcal{V}_{\Phi}$* , 227.
- Cohen, Joel E. *Ergodic theorems of population dynamics*, 27.
- Cohen, Joel E. *Graph theoretic models of food webs*, 29.
- Cooke, Kenneth L. *Stability analysis for a vector disease model*, 31.
- Costa, David G. See Ávila, Geraldo S. S.
- Cushing, J. M. *Stability and instability in predator-prey models with growth rate response delays*, 43.
- Dankel, Thad, Jr. *On moduli of continuity of analytic and harmonic functions*, 519.
- Darden, Thomas. *A pseudo-steady state approximation for stochastic chemical kinetics*, 51.
- Dence, Thomas P. *Differentiable points of the generalized Cantor function*, 239.
- De Raggi, Dennis F., and Markley, Nelson G. *The structure of codimension one distal flows with non-trivial isotropy*, 601.
- Deveney, James K., and Mordeson, John N. *Invariance in inseparable Galois theory*, 395.
- Dunham, C. B. See Schmidt, Eckard.
- Eisenberg, Bennett. See Blum, Julius.
- Freedman, H. I., and Gatica, J. A. *On the boundedness of lymphocytes in deterministic threshold models of humoral immune response*, 73.
- Gatica, J. A. See Freedman, H. I.
- Gaudard, Marie Adèle. *Dispersion free weights, maximal refinement ideals, and atomicity in certain generalized sample spaces*, 617.
- Gazik, R. J. See Kent, D. C.
- Gilpin, Michael E. *Prudent predation and the character of ecological attractor sets*, 83.
- Gittings, Raymond F. *Products of generalized metric spaces*, 479.
- Griego, Richard, and Sanchez, David. *Introduction to this issue*, 1.
- Griffel, D. H. *Harvesting competing populations*, 87.
- Hager, Anthony W. *Semicompact Cozero-fields and uniform spaces*, 447.
- Hahn, Peter. *The σ -representation of amenable groupoids*, 631.

- Harris, D. R. See Beyer, W. A.
- Hopenwasser, Alan. *The Cartan criterion fails for triangular subalgebras of a factor*, 441.
- Hoppensteadt, F. C. *Slow selection analysis of genetic traits in synchronized populations*, 93.
- Hussain, M. A., and Pu, S. L. *Exact solution of coupled pairs of dual trigonometric series*, 641.
- Iyer, Hariharan K. *On solving the equation $\text{Aut}(X) = G$* , 653.
- Jakimovski, A. See Borwein, D.
- Johnson, Jon L. *The graded ring $R[X_1, \dots, X_n]$* , 415.
- Johnston, Elgin H. *Growth of derivatives and the modulus of continuity of analytic functions*, 671.
- Keener, James P. *Long range predation in pattern formation*, 99.
- Kent, D. C., and Gazik, R. J. *Minimal uniform convergence spaces*, 251.
- Leavitt, W. G., and Wiegandt, R. *Torsion theory for not necessarily associative rings*, 259.
- Leonard, Philip A., and Williams, Kenneth S. *The quadratic and quartic character of certain quadratic units. II*, 683.
- Levy, Lawrence S. See Bittman, Richard M.
- Lewis, Paul W. See Bilyeu, Russell G.
- Loxton, J. H., and van der Poorten, A. J. *Multi-dimensional generalizations of the Padé table*, 385.
- Marchetto, D. *Stefanoff flows on orientable surfaces*, 273.
- Mardesic, Sibe, and Rushing, T. B. *Shape fibrations, II*, 283.
- Markley, Nelson G. See De Raggi, Dennis F.
- Maxwell, J. W. *Embedding noncompact manifolds*, 693.
- Mordeson, John N. See Deveney, James K.
- Morris, Robert A. *Reciprocity isomorphisms for separable field extensions*, 707.
- Nagel, Alexander. *Cauchy transforms of measures, and a characterization of smooth peak interpolation sets for the Ball algebra*, 299.
- Nishiura, Togo. *Two counterexamples for measurable relations*, 499.
- Pandey, J. N. See Pathak, R. S.
- Pathak, R. S., and Pandey, J. N. *The G -transform of generalized functions*, 307.
- Pearce, Kent. See Campbell, Douglas M.
- Perelson, Alan S. *Stochastic models for the evolution of multigene families*, 115.
- Peterson, Allan C. *Green's functions for focal type boundary value problems*, 721.
- Phillips, Veril L. *Infinite groups with a subnormality condition on infinite subgroups*, 327.
- Protter, M. H. *The generalized spectrum of second order elliptic systems*, 503.
- Pu, S. L. See Hussain, M. A.
- Ratliff, L. J., Jr. *$A(X)$ and GB-Noetherian rings*, 337.
- Redmond, Don. *Omega theorems for a class of Dirichlet series*, 733.
- Rushing, T. B. See Mardesic, Sibe.
- Ryan, R. J. See Beyer, W. A.
- Sanchez, David. See Griego, Richard.
- Schmidt, Eckard, and Dunham, C. B. *Discontinuity of the alternating Chebyshev operator*, 355.
- Schober, G. See Cima J.
- Setzer, Bennett. *Arithmetic progressions in the values of a quadratic polynomial*, 361.
- Silvia, E. M. *A note on special classes of p -valent functions*, 365.
- Smith, Hal L. *Periodic solutions of an epidemic model with a threshold*, 131.

- Smith, Kirby C. *A characterization of quaternion division algebras*, 371.
- Sons, L. R. *Growth and gap structure of functions in the unit disc*, 533.
- Swan, George W. *Immunological surveillance and neoplastic development*, 143.
- Szeto, George. *On Goldie theorems for quotient rings*, 749.
- Taylor, Fritz. *On the applicability of current population models to the growth of insect populations*, 149.
- Torrez, William C. *On a genetics model of Moran evolving in random environments*, 153.
- van der Poorten, A. J. See Loxton, J. H.
- Vincent, Thomas L. *Yield for annual plants as an adaptive response*, 163.
- Vinsonhaler, C. *Almost quasi-pure injective abelian groups*, 569.
- Wang, James Li-Ming. *A note on modulus of approximate continuity on $R(X)$* , 755.
- Warren, Richard H. *Fuzzy topologies characterized by neighborhood systems*, 761.
- White, Benjamin, S. *A method for the approximate solution of some stochastic equations of population biology*, 175.
- Wiegant, R. See Leavitt, W. G.
- Williams, Kenneth S. See Leonard, Philip A.
- Wright, David G. *Cantor sets in 3-manifolds*, 377.
