	Page
A. MATSUI, Stiefel Whitney homology classes of Z_2 -Poincaré Euler spaces.....	321
H. KUROSE, Closed derivations in $C(I)$	341
Z. WANG, Comparison method and stability problem in functional differential equations	349
S. J. PATTERSON, Further remarks on the exponent of convergence of Poincaré series	357
D. W. ROBINSON AND S. YAMAMURO, The canonical half-norm, dual-half norms, and monotonic norms.....	375
G. OSHIKIRI, Totally geodesic foliations and Killing fields.....	387
W. TREBELS, The principle of subordination and comparison theorems for approximation processes of Abel-bounded orthogonal expansions.....	393
K. AZUKAWA, Hyperbolicity of circular domains	403
M. FURUSHIMA, Finite groups of polynomial automorphisms in C^n	415
S. KAWAMURA, A decomposition of reducing subspace for shift operators.....	425
T. NISHISHIRAO, Convergence of positive linear approximation processes.....	441
T. KAWATA, Absolute convergence of Fourier series of periodic stochastic processes and its applications	459
N. MOCHIZUKI, A class of subharmonic functions and integral inequalities.....	475
A. MIYACHI, Products of distributions in H^p spaces	483
