

BAYESIAN ANALYSIS

Matrix-Variate Dirichlet Process Priors with Applications	
..... Z. Zhang and D. Wang and G. Dai and M. I. Jordan	259
Bayesian Sequential Experimental Design for Binary Response Data with Appli- cation to Electromyographic Experiments	
..... N. A. Azadi, P. Fearnhead, G. Ridall, and J. H. Blok	287
Local-Mass Preserving Prior Distributions for Nonparametric Bayesian Models	
..... J. Lee, S. N. MacEachern, Y. Lu and G. B. Mills	307
On Divergence Measures Leading to Jeffreys and Other Reference Priors.....	
..... R. Liu, A. Chakrabarti, T. Samanta, J.K. Ghosh and M. Ghosh	331
Bayesian Analysis of the Functional-Coefficient Autoregressive Heteroscedastic Model	
..... X. Y. Song, J. H. Cai, X. N. Feng and X. J. Jiang	371
Bayesian Adaptive Smoothing Splines Using Stochastic Differential Equations	
..... Y. R. Yue, D. Simpson, F. Lindgren and H. Rue	397
Laplace Approximation for Logistic Gaussian Process Density Estimation and Regression	
..... J. Riihimäki and A. Vehtari	425
Bayesian Regularization via Graph Laplacian.....	
..... F. Liu, S. Chakraborty, F. Li, Y. Liu, and A. C. Lozano	449
Adaptive Bayesian Density Estimation in L^p -metrics with Pitman-Yor or Normal- ized Inverse-Gaussian Process Kernel Mixtures.....	
..... C. Scricciolo	475
