

# Contents

<b>A. DESGAGNÉ and P. GAGNON</b> Bayesian robustness to outliers in linear regression and ratio estimation . . . . .	205
<b>K. K. DEY and S. BHATTACHARYA</b> A brief review of optimal scaling of the main MCMC approaches and optimal scaling of additive TMCMC under non-regular cases . . . . .	222
<b>Q. LIU, C. A. MCGRORY and P. W. J. BAXTER</b> The coresets variational Bayes (CVB) algorithm for mixture analysis . . . . .	267
<b>K. K. SAID, W. NING and Y. TIAN</b> Modified information criterion for testing changes in skew normal model . . . . .	280
<b>E. ATHAYDE, A. AZEVEDO, M. BARROS and V. LEIVA</b> Failure rate of Birnbaum–Saunders distributions: Shape, change-point, estimation and robustness . . . . .	301
<b>F. CRIBARI-NETO and R. V. FONSECA</b> A new log-linear bimodal Birnbaum–Saunders regression model with application to survival data . . . . .	329
<b>B. MALLEIN</b> Necessary and sufficient conditions for the convergence of the consistent maximal displacement of the branching random walk . . . . .	356
<b>R. C. P. DOS REIS, E. A. COLOSIMO and G. L. GILARDONI</b> Hierarchical modelling of power law processes for the analysis of repairable systems with different truncation times: An empirical Bayes approach . . . . .	374
<b>D. AHLBERG</b> A temporal perspective on the rate of convergence in first-passage percolation under a moment condition . . . . .	397
<b>L. RIVAS and M. GALEA</b> Influence measures for the Waring regression model . . . . .	402
