

Kyoto Journal of Mathematics

Volume 50 · Number 4 · Winter 2010

Memorial Issue for the Late Professor Masayoshi Nagata, Part I

Special Issue Editors: Haruzo Hida, János Kollár, Shigefumi Mori, Atsushi Moriwaki, Shigeru Mukai, Yoshinori Namikawa, Eckart Viehweg, Hiroyuki Yoshida

- 645 **Masayoshi Nagata (1927–2008) and his mathematics**
Masayoshi Miyanishi
- 661 **Le théorème de plongement de Nagata**
Pierre Deligne
- 671 **Finite generation of the log canonical ring in dimension four**
Osamu Fujino
- 685 **Estimation of arithmetic linear series**
Atsushi Moriwaki
- 727 **Poisson deformations of affine symplectic varieties, II**
Yoshinori Namikawa
- 753 **On volume-preserving complex structures on real tori**
Fabrizio Catanese, Keiji Oguiso, and Thomas Peternell
- 777 **Central critical values of modular Hecke L -functions**
Haruzo Hida
- 827 **Selmer varieties for curves with CM Jacobians**
John Coates and Minhyong Kim
- 853 **Surjectivity of the global-to-local map defining a Selmer group**
Ralph Greenberg
- 889 **Numerically trivial involutions of Kummer type of an Enriques surface**
Shigeru Mukai
- 903 **Index to Volume 50**
