

Preface to the Present Volume

The papers in this volume were submitted by participants of the Symposium on Geometry of geodesics and related topics, held at University of Tokyo from November 29 till December 3, 1982, and supported by the Ministry of Education. There were twenty two invited talks including seven survey talks given by Professors Klingenberg, Shikata and the members of the Program Committee, and about one hundred twenty participants. The members of the Program Committee would like to thank them for their participation, and the referees of the papers submitted for their kind cooperation.
