Pranab Kumar Sen: Life and works
N. Balakrishnan, Edsel A. Peña and Mervyn J. Silvapulle 1

PARAMETRIC INFERENCE

Analytic perturbations and systematic bias in statistical modeling and inference
Jerzy A. Filar, Irene Hudson, Thomas Mathew and Bimal Sinha 17

Smooth estimation of mean residual life under random censoring
Yogendra P. Chaubey and Arusharka Sen 35

ORDER RESTRICTED INFERENCE

Order restricted inference for comparing the cumulative incidence of a competing risk over several populations
Hammou El Barmi, Subhash Kochar and Hari Mukerjee 50

Statistical inference under order restrictions on both rows and columns of a matrix, with an application in toxicology
Eric Teoh, Abraham Nyska, Uri Wormser and Shyamal D. Peddada 62

On the structure of a family of probability generating functions induced by shock models
Satrajit Roychoudhury and Manish C. Bhattacharjee 78

BAYESIAN INFERENCE

A Bayesian test for excess zeros in a zero-inflated power series distribution
Archan Bhattacharya, Bertrand S. Clarke and Gauri S. Datta 89

Posterior consistency of Dirichlet mixtures of beta densities in estimating positive false discovery rates
Subhashis Ghosal, Anindya Roy and Yongqiang Tang 105

ROBUST INFERENCE

Robust estimation in finite population sampling
Malay Ghosh 116

BEYOND PARAMETRICS

Estimation of population-level summaries in general semiparametric repeated measures regression models
Arnab Maity, Tatiyana V. Apanasovich and Raymond J. Carroll 123

Smoothing-inspired lack-of-fit tests based on ranks
Jeffrey D. Hart 138

A nonparametric control chart based on the Mann–Whitney statistic
Subhabrata Chakraborti and Mark A. van de Wiel 156

Regression rank scores in nonlinear models
Jana Jurečková 173

Chernoff–Savage and Hodges–Lehmann results for Wilks' test of multivariate independence
Marc Hallin and Davy Paindaveine 184

***U*-tests for variance components in one-way random effects models**
Juvêncio S. Nobre, Julio M. Singer and Mervyn J. Silvapulle 197

MULTIPLE COMPARISONS

A comparison of the Benjamini–Hochberg procedure with some Bayesian rules for multiple testing
Małgorzata Bogdan, Jayanta K. Ghosh and Surya T. Tokdar 211

On the Simes inequality and its generalization
Sanat K. Sarkar 231

Multiple testing procedures under confounding
Debashis Ghosh 243

MIXTURE MODELS

A pattern mixture model for a paired 2×2 crossover design
Laura J. Simon and Vernon M. Chinchilli 257

Projected likelihood contrasts for testing homogeneity in finite mixture models with nuisance parameters
Debapriya Sengupta and Rahul Mazumder 272

RESAMPLING METHODOLOGY

Bootstrapping the Grenander estimator
Michael R. Kosorok 282

CHANGE POINT ANALYSIS

Ratio tests for change point detection
Lajos Horváth, Zsuzsanna Horváth and Marie Hušková 293

On estimating the change point in generalized linear models
Hongling Zhou and Kung-Yee Liang 305

STATISTICS IN HISTORY

Using statistical smoothing to date medieval manuscripts
Andrey Feuerverger, Peter Hall, Gelila Tilahun and Michael Gervers 321

STATISTICS IN HEALTH

Sequential nonparametrics and semiparametrics: Theory, implementation and applications to clinical trials
Tze Leung Lai and Zheng Su 332

Estimating medical costs from a transition model
Joseph C. Gardiner, Lin Liu and Zhehui Luo 350

GENETICS AND GENOMICS

Correcting for selection bias via cross-validation in the classification of microarray data
G. J. McLachlan, J. Chevelu and J. Zhu 364

An asymptotically normal test for the selective neutrality hypothesis
Aluísio Pinheiro, Hildete P. Pinheiro and Samara Kiihl 377

Model selection and sensitivity analysis for sequence pattern models
Mayetri Gupta 390
