

# Preface

## 1995 Rimini Proceedings

The Second International Workshop on Bayesian Robustness was held in Rimini, Italy from May 22 - 25, 1995. The Organizing Committee consisted of the following members:

B. Betrò	CNR IAMI, Italy
F. Ruggeri	CNR IAMI, Italy

The Scientific Committee, and Editorial Board for this volume, consisted of the following members:

J. O. Berger,	Purdue University, USA
B. Betrò	CNR IAMI, Italy
E. Moreno,	Universidad de Granada, Spain
L. R. Pericchi,	Universidad Simón Bolívar, Venezuela
F. Ruggeri,	CNR IAMI, Italy
G. Salinetti,	Università di Roma, Italy
L. Wasserman	Carnegie Mellon University, USA.

Editorial Assistant: Heidi Sestrich

There were 83 participants from Italy, USA, Canada, Poland, the United Kingdom, Japan, Brazil, Spain, Austria, Sweden, Germany, Venezuela and Belgium. Thirty-nine papers were presented (16 invited and 23 contributed) spanning the wide range of theoretical issues in Bayesian robustness, as well as applications of Bayesian robustness to medicine and engineering. Most of the invited papers, together with invited discussions and a selection of the contributed papers presented at the Workshop, are collected in this volume. All papers were refereed.

For providing financial and organizational support for the Workshop, we gratefully acknowledge Istituto per le Applicazioni della Matematica e dell'Informatica del Consiglio Nazionale delle Ricerche and the National Science Foundation

(U.S.A). The workshop also received the support of the International Society for Bayesian Analysis (ISBA) and the Italian Statistical Society (SIS).

We thank Luciana Paterna for her assistance in organizing the workshop and Fulvio De Santis, Marco Perone Pacifico and Luca Tardella for their proofreading of the volume. We are especially grateful to Heidi Sestrich for invaluable assistance in putting together this volume; it would not have been possible without her.
