

# List of Notations

$\bar{a}$	the characteristic element (if $\alpha = 0$ ) of the root invariant $R(X, \theta)$ .....	41
$a$	one of main invariants: $(S^*/S) \cong (\mathbb{Z}/2\mathbb{Z})^a$ , of $Z, Y, (X, \theta)$ ..	30
$A_n$	Dynkin diagram, Du Val singularity, root system of type $A_n$ ..	5
$b$	a finite symmetric bilinear form .....	117
$b_\theta^{(p)}(p^k)$	one of elementary finite symmetric bilinear forms .....	118
$b_M$	the discriminant bilinear form of a lattice $M$ .....	118
$\det(M)$	the determinant of a lattice $M$ .....	118
$\text{Duv}(\cdot)$	the Du Val part of $(\cdot)$ .....	61
$D_n$	Dynkin diagram, Du Val singularity, root system of type $D_n$ ..	5
$E_n$	Dynkin diagram, Du Val singularity, root system of type $E_n$ ..	5
$g$	genus of a non-singular curve in $ -2K_Z $ or of moving part of $ -2K_Y $ , maximal genus $g$ of a component of $X^\theta$ , $g = (22 - r - a)/2$ .....	31
$H$	a part (kernel) of the root invariant $R(X, \theta)$ .....	41
$\mathcal{H}_\beta$	hyperplane orthogonal to $\beta$ of hyperbolic space .....	24
$\mathcal{H}_\beta^+$	half-space orthogonal to $\beta$ of hyperbolic space .....	24
$k$	number of exceptional $-4$ curves on $Y$ ; number of double transparent vertices of the graph $\Gamma$ ; number of genus 0 curves of $X^\theta$ ; $k = (r - a)/2$ .....	31
$(k, g, \delta)$	alternative main invariants of $Z, Y, (X, \theta)$ .....	32
$K$	a part (the root lattice $K$ or $K(2)$ ) of the root invariant $R(X, \theta)$	40
$K_H$	the overlattice of $K$ related to the root invariant $R(X, \theta)$ .....	44
$K_n$	log terminal singularities of index 2 .....	18
$K_\theta^{(p)}(p^k)$	one of (with rank 1) elementary $p$ -adic lattices .....	118
$\text{Log}(\cdot)$	the logarithmic part of $(\cdot)$ .....	61
$l(\mathfrak{A})$	the minimal number of generators of a finite Abelian group $\mathfrak{A}$	45

$L_{K3}$	the abstract lattice isomorphic to $H^2(X, \mathbb{Z})$ for a K3 surface $X$	26
$\mathcal{L}(X)$	$\mathcal{L}(X) = V^+(S_X)/\mathbb{R}^+$ , the hyperbolic space of a surface $X$ ...	24
$M(a)$	multiplication by $a \in \mathbb{Q}$ of the form of a lattice $M$ .....	117
$M$	an arbitrary lattice usually; in Sect. 2.7, the lattice related to the root invariant and defined in (57).....	117
$\mathcal{M}(X)$	$\mathcal{M}(X) = \text{NEF}(X)/\mathbb{R}^+ \subset \mathcal{L}(X)$ , the projectivization of the nef cone of a surface $X$ .....	24
$\mathcal{M}^{(2)}$	a fundamental chamber of $W^{(2)}(S)$ in $\mathcal{L}(S)$ .....	36
$\mathcal{M}^{(2,4)}$	a fundamental chamber of $W^{(2,4)}(S)$ in $\mathcal{L}(S)$ .....	36
$\mathcal{M}_+^{(2,4)}$	a fundamental chamber of $W_+^{(2,4)}$ in $\mathcal{L}(S)$ .....	37
$\text{Mod}_M$	moduli space of K3 with condition $M$ on Picard lattice.....	29
$\text{Mod}_{M \subset L_{K3}}$	moduli space of K3 with condition $M \subset L_{K3}$ on Picard lattice	28
$\text{Mod}_{(r,a,\delta)}$	moduli space of $(X, \theta)$ with the main invariants $(r, a, \delta)$ .....	30
$\text{Mod}'_S$	moduli space of $(X, \theta)$ with the main invariant $S$ .....	30
$N$	labels main invariants $(r, a, \delta)$ or $(k, g, \delta)$ of $Z$ , and $Y, (X, \theta)$ of elliptic type.....	52
$\overline{\text{NE}}(Z)$	Kleiman–Mori cone of a surface $Z$ .....	12
$\text{NEF}(X)$	nef cone of a surface $X$ .....	23
$P(X)$	set of all exceptional curves (or their classes) on a surface $X$ .	23
$P(X)_+$	the set of exceptional classes of $(X, \theta)$ .....	33
$P(X)_{+I}$	the subset of exceptional classes of $(X, \theta)$ .....	33
$P(X)_{+IIa}$	the subset of exceptional classes of $(X, \theta)$ .....	33
$P(X)_{+IIb}$	the subset of exceptional classes of $(X, \theta)$ .....	33
$P(X)_{+III}$	the subset of exceptional classes of $(X, \theta)$ .....	33
$P^{(2)}(X)_+$	the subset of exceptional classes of $(X, \theta)$ with square $-2$ ....	34
$P^{(4)}(X)_+$	the subset of exceptional classes of $(X, \theta)$ with square $-4$ ....	34
$P(Y)_I$	the subset of exceptional curves of $Y$ .....	33
$P(Y)_{IIa}$	the subset of exceptional curves of $Y$ .....	33
$P(Y)_{IIb}$	the subset of exceptional curves of $Y$ .....	33
$P(Y)_{III}$	the subset of exceptional curves of $Y$ .....	33
$P(\mathcal{M}^{(2)})$	all orthogonal primitive roots (they are all $(-2)$ roots) to $\mathcal{M}^{(2)}$	36
$P^{(2)}(\mathcal{M}^{(2,4)})$	all $(-2)$ -roots orthogonal to $\mathcal{M}^{(2,4)}$ .....	36
$P^{(2)}(\mathcal{M}_+^{(2,4)})$	all $(-2)$ -roots orthogonal to $\mathcal{M}_+^{(2,4)}$ .....	37
$P^{(4)}(\mathcal{M}^{(2,4)})$	all $(-4)$ -roots orthogonal to $\mathcal{M}^{(2,4)}$ .....	36
$P^{(4)}(\mathcal{M}_+^{(2,4)})$	all $(-4)$ -roots orthogonal to $\mathcal{M}_+^{(2,4)}$ .....	37
$q$	a finite quadratic form.....	118
$q_\theta^{(p)}(p^k)$	one of elementary finite quadratic forms.....	118
$q_M$	the discriminant quadratic form of an even lattice $M$ .....	118
$Q_\pm$	the $\pm 1$ eigenspaces of an involution $\theta$ on a module $Q$ .....	29

$r$	one of main invariants: the Picard number $r = \text{rk } S_Y$ ; $r = \text{rk } S$	29
$\tilde{r}$	the Picard number of a log del Pezzo surface $Z$ .....	106
$(r, a, \delta)$	main invariants of $Z, Y, (X, \theta)$ .....	30
$R(X, \theta)$	the root invariant of $(X, \theta)$ .....	40
$R_{\text{gen}}(X, \theta)$	the generalized root invariant of $(X, \theta)$ .....	42
$S$	$S = (S_X)_+ = H^2(X, \mathbb{Z})_+$ , the main invariant of $Z, Y, (X, \theta)$	29
$S_X$	the Picard lattice (modulo torsion) of a surface $X$ .....	23
$U^{(2)}(2^k)$	one of elementary (2-dimensional) 2-adic lattices .....	118
$u_-^{(2)}(2^k)$	one of elementary finite symmetric bilinear forms .....	119
$u_+^{(2)}(2^k)$	one of elementary finite quadratic forms .....	118
$\text{Var}(\cdot)$	the varying part of $(\cdot)$ .....	62
$V^{(2)}(2^k)$	one of elementary (2-dimensional) 2-adic lattices .....	118
$v_-^{(2)}(2^k)$	one of elementary finite symmetric bilinear forms .....	119
$v_+^{(2)}(2^k)$	one of elementary finite quadratic forms .....	118
$V(M)$	the light cone $V(M) = \{x \in M \otimes \mathbb{R}   x^2 > 0\}$ of a hyperbolic lattice $M$ .....	26
$V^+(X)$	the half containing polarization of the light cone $V(S_X)$ of a surface $X$ .....	23
$W^{(2)}(M)$	the group generated by reflections in all $f \in M$ with $f^2 = -2$	23
$W^{(4)}(M)$	the group generated by reflections in all $(-4)$ roots of $M$ .....	36
$W^{(2,4)}(M)$	the group generated by reflections in all $(-2)$ and $(-4)$ roots of $M$ .....	36
$W_+^{(2,4)}$	the subgroup of $W^{(2,4)}(S)$ generated by reflections in $\Delta_+^{(2,4)} \subset \Delta^{(2,4)}(S)$ .....	35
$W^{(4)}(\mathcal{M}^{(2)})$	see Proposition 2.2 .....	36
$W_+^{(4)}(\mathcal{M}^{(2)})$	see (50) .....	37
$W(R)$	the Weyl group of a finite root system $R$ .....	2
$X$	K3 surface $X$ .....	22
$(X, \theta)$	K3 surface $X$ with a non-symplectic involution $\theta$ .....	22
$X^\theta$	fixed points of involution $\theta$ on $X$ .....	31
$Y$	DPN surface; also $Y = X/\{1, \theta\}$ , also right resolution of $Z$ ..	20
$(Y, C)$	a DPN pair; also $(Y = X/\{1, \theta\}, C = X^\theta)$ .....	20
$Z$	log del Pezzo surface $Z$ of index $\leq 2$ .....	18
$\alpha$	the invariant (0 or 1) of the root invariant $R(X, \theta)$ .....	41
$\delta$	0 or 1; zero 0 iff $X^\theta \sim 0 \pmod{2}$ in $H_2(X, \mathbb{Z})$ ; zero 0 iff $\delta_S = 0$ for the main invariant $S$ of $Z, Y$ or $(X, \theta)$ .....	30
$\delta_M$	0 or 1; one of invariants of a 2-elementary lattice $M$ , zero 0 iff $(m^*)^2 \in \mathbb{Z}$ for any $m^* \in M^*$ .....	30

$\Delta_+^{(2)}$	the set $\Delta^{(2)}(S)$ of all $(-2)$ -roots of $S = (S_X)_+$ .....	34
$\Delta_{+t}^{(2)}$	the subset of $(-2)$ -roots of $S = (S_X)_+$ .....	34
$\Delta_{\pm}^{(4)}$	the subsets of $(-4)$ -roots of $(S_X)_{\pm}$ .....	34
$\Delta_+^{(2,4)}$	it is $\Delta_+^{(2)} \cup \Delta_+^{(4)}$ .....	35
$\Delta_-^{(6)}$	the subset of $(-6)$ -elements of $(S_X)_-$ .....	34
$\Delta^{(2)}(S)$	the set of all $(-2)$ -roots of a lattice $S$ .....	34
$\Delta^{(4)}(S)$	the set of all $(-4)$ -roots of a lattice $S$ .....	36
$\Delta^{(4)}(\mathcal{M}^{(2)})$	see Proposition 2.2 .....	36
$\Delta_+^{(4)}(\mathcal{M}^{(2)})$	see (51) .....	37
$\Gamma(\cdot)$	the Dynkin diagram of $(\cdot)$ ; equivalent to Gram matrix of $(\cdot)$ ; the dual graph of exceptional curves of $(\cdot)$ .....	50
$\tilde{\Omega}_{M \subset L_{K3}}$	period domain of K3 surfaces with condition $M \subset L_{K3}$ on Picard lattice .....	27
$\Omega_{M \subset L_{K3}}$	period domain of K3 surfaces with condition $M \subset L_{K3}$ on Picard lattice with forgetting $\mathcal{M}$ .....	27
$\xi$	a part (the homomorphism) of the root invariant $R(X, \theta)$ .....	40
$\mathfrak{A}_M$	the discriminant group $\mathfrak{A}_M = M^*/M$ of a lattice $M$ .....	45
$\oplus$	the orthogonal sum of lattices (with very few exceptions when it is used to denote the direct sum of modules) .....	117
