[3] Rates of weak convergence and asymptotic expansions in classical central  

[4] Speed of convergence of the n-fold convolution of a probability measure on  

Majumdar).

[9] Normal Approximation and Asymptotic Expansions (with R. Ranga Rao)  

[10] On the stochastic foundations of the theory of water flow through unsatu-  
G. Sposito).

434-451 (joint with J.K. Ghosh).

[13] Criteria for recurrence and existence of invariant measures for multidimen-  

Sposito).

(1980) *Quantitative Economics and Development* (Ed. by L.R. Klein, M.  
Nerlove and R.C. Tsiang), 19-43, Academic Press, New York (with M.  
Majumdar).

Phase changes with time for a class of diffusions with multiple periodic spatial scales, and applications (1997) Proc. 51st Session of the International Statistical Institute, Istanbul, Turkey.

Convergence to equilibrium of random dynamical systems generated by i.i.d. monotone maps with applications to economics (1999) in Asymptotics, Nonparametrics, and Time Series: Festschrift for M.L. Puri (S. Ghosh, Editor), 713-742 (with M. Majumdar), Marcel Dekker (New York).

Speed of convergence to equilibrium and normality for diffusions with multiple periodic scales (1999) Stochastic Processes and Applications, 80, 55-86 (with M. Denker and A. Goswami).

[79] Phase changes with time for a class of autonomous multiscale diffusions, in Sankhyä: Special issue in memory of D. Basu (To appear).

xiii
[80] Markov processes: asymptotic stability in distribution, central limit theo-
eds.).

[82] Random Dynamical Systems: Theory and Applications (with M. Majum-
Press.

[83] Stochastic Processes: Theory and Applications (with E. Waymire). To ap-
pear in the Graduate Texts in Mathematics Series, Springer.
