

Key Words and Phrases Index

Word/Phrase	Pages*
admissibility	135
age replacement	57
arrangement increasing	45
associated random variables (association)	257, 269, 371, 481
association models	167
Bartholomew's test	135
biometry	93
bivariate binomial distribution	371
bivariate dependence	257
bivariate distribution	451
bivariate exponential distributions	69, 251
bivariate negative binomial distribution	371
bivariate Pareto distribution	371
bivariate Poisson distribution	371
block replacement	57
boundary crossing	315
censored data	471
coefficients of divergence	257
compact set	451
compensator transformation	5
complete dependence	459
complete repair	57
concave and Schur-concave functions	85
conditional independence	19, 283
conditional probability	19
conditioning by order statistic	295
convex body	203
convex set	443, 451
convex-ordering	121
correlation coefficient	111
counterexamples	333
cross product difference statistics	351
crossing point	147
decreasing in transposition	45
dependence orderings	45
dependent variables	237

* This index utilizes authors' key words and phrases. The cited page is the first page of the article in which that word or phrase appears.

Dirichlet distribution	69
environmental effects	435
exact test	351
exchangeable random variables	85
exponential approximation	111
exponential distribution	35
exponential families	13
extreme points	443, 451
failure rate	251, 435
FKG inequality	135
functional dependence	459
gamma process	435
Gaussian quadrature	315
generalized concentration curve	403
global dependence	103
goodness-of-fit test statistics	167
graphical representation	333
graphs	19
heaviness of tail	489
homogeneity	135
imperfect repair	5
independence	269
independent gamma random variables	147
inequalities	111
infinite divisibility	371, 481
influence diagrams	19
instantaneous failure rate	415
intensity function	207
interchangeable random variables	295
Ising models	395
Kaplan-Meier estimator	471
Kolmogorov's differential equations	207
likelihood estimation	167
likelihood ratio	103
likelihood ratio dependence	351
limit theory	283
linear combination	299
log concave	135
majorization inequalities	85
Martingale limit theorems	471
maximally dependent collection	459
mean residual life	251
measure-preserving transformation	459

metrics	45
minimal repair	5, 57
models for dependence	283
moment inequalities	85
monotone dependence	103
monotonicity constraints	167
more dispersed	147
multivariate distributions	223, 489
multivariate distributions with given marginals	371
multivariate exponential	359
multivariate extreme values	269
multivariate geometric	359
multivariate IFR	415
multivariate life distributions	435
multivariate lifelengths	93
multivariate total positivity of order two (MTP_2)	135
NBUE and NWUE distributions	111
negative dependence	13, 223
negative dependence through stochastic ordering	295
negative orthant dependence	203
Neyman structure	135
nomination sampling	471
nonhomogeneous Poisson process	415
nonlinear time series models	69
nonparametric maximum likelihood	471
nonparametric tests	35
normal distribution	315
odds ratio	167, 189
one-parameter family of distributions	189
ordered contingency tables	351
overdispersion	489
partial ordering	45
partial ordering of distributions	121
percolation	395
permutation	459
Pitman efficiency	237
point processes	207
Poisson processes	111
Polya frequency function of order two (PF_2)	135
positive dependence	13, 69, 223, 269, 315
Positive dependence property	189
positive lower orthant dependence	443

positive upper orthant dependence	443
Potts models	395
probability inequalities	223, 315
probability measures with fixed marginals	403
processes with independent increments	481
proportional hazards regression	207
random graphs	395
random rays	203
rank test for scale	237
record values	111
reliability	35, 93
reliability function	251
reliability theory	415
repair replacement	57
Schur convexity	147
sequential test	315
serial correlation	299
sign test	351
similar test	135
simulation	333
skip-free Markov chain	359
spread	489
stochastic domination	395
stochastic independence	459
stochastic ordering	5, 415
stopping time	315
strength of dependence	333
systems using second hand components	295
tail probabilities	147
tests for aging	35
tests of independence	35, 299
time-dependent covariates	207
time series with arbitrary marginals	69
total dependence	269
total positivity of order two	13, 121, 147, 371, 451
two-class discriminant analysis	103
two-way contingency table	189
types of bivariate dependence	333
U-statistics	351
unbiasedness	135
unconditional inference	283
weighted sums	147
