

# CONTENTS

## I. Survey Articles

- Maria del Rosario GONZALEZ-DORREGO — Smooth double subvarieties on singular varieties. II 1
- Takahiro YAMAMOTO — Survey of apparent contours of stable maps between surfaces 13

## II. Research Articles

- Charef BEDDANI — Valuations divisorielles et connexité en codimension 1 31
- Alex DEGTYAREV — The Alexander module of a trigonal curve. II 47
- Alexandru DIMCA — Monodromy of triple point line arrangements 71
- Kazumasa INABA — On fibered links of singularities of polar weighted homogeneous mixed polynomials 81
- Hiroataka ISHIDA — On classes in the classification of curves on rational surfaces with respect to logarithmic plurigenera 93
- Atsuko KATANAGA — The links specific to hypersurface simple  $K3$  singularities 111
- Masayuki KAWASHIMA — On  $(4, 3)$  line degenerated torus curves and torus decompositions 123
- Katsusuke NABESHIMA and Shinichi TAJIMA — On the computation of algebraic local cohomology classes associated with semi-quasihomogeneous singularities 143
- Viet Khac NGUYEN — Some geometric-arithmetic aspects of separated variable curves 161
- Mutsuo OKA — Mixed functions of strongly polar weighted homogeneous face type 173
- Takayuki OKUDA — Singular fibers in barking families of degenerations of elliptic curves 203
- Atsushi TAKAHASHI — Mirror symmetry between orbifold projective lines and cusp singularities 257
