

At the occasion of the Spring meeting of the Illinois, Indiana and Michigan sections of the Mathematical Association, at Notre Dame, April 9-10, 1943, the University arranged a symposium of four lectures on topics of advanced college mathematics.

Three of these lectures are published in this booklet, while the fourth, on Algebra of Analysis, in enlarged form, appears as Number 3 of this series.

TABLE OF CONTENTS

	<u>Page</u>
ALIGNMENT CHARTS	1
By Lester R. Ford	
THE TEACHING OF THE CALCULUS OF PROBABILITY	31
By Arthur H. Copeland	
ON THE RELATION BETWEEN CALCULUS OF PROBABILITY AND STATISTICS	44
By Karl Menger	
ON THE THEORY OF COMPLEX FUNCTIONS	55
By Emil Artin
