

# Contents

1	Introduction	1
2	Definition of Minimal Surfaces	4
3	The First Variation	9
4	The Minimal Surface Equation	14
5	Isothermal Coordinates for Minimal Surfaces	19
6	The Enneper-Weierstrass Representation	21
7	The Geometry of the Enneper-Weierstrass Representation	24
8	Some Applications of the Enneper-Weierstrass Representation	29
9	Conformal Types of Riemann Surfaces	32
10	Complete Minimal Surfaces, Osserman's Theorem	37
11	Ends of Complete Minimal Surfaces	44
12	Complete Minimal Surfaces of Finite Total Curvature	51
13	Total Curvature of Branched Complete Minimal Surfaces	56
14	Examples of Complete Minimal Surfaces	61
15	The Halfspace Theorem and The Maximum Principle at Infinity	75
16	The Convex Hull of a Minimal Surface	78
17	Flux	81
18	Uniqueness of the Catenoid	87
19	The Gauss Map of Complete Minimal Surfaces	91
20	The Second Variation and Stability	93
21	The Cone Lemma	98
22	Standard Barriers and The Annular End Theorem	103

<b>23 Annular Ends Lying above Catenoid Ends</b>	<b>107</b>
<b>24 Complete Minimal Surfaces of Finite Topology</b>	<b>113</b>
<b>25 Minimal Annuli</b>	<b>116</b>
<b>26 Isoperimetric Inequalities for Minimal Surfaces</b>	<b>126</b>
<b>27 Minimal Annuli in a Slab</b>	<b>131</b>
