Contents

Foreword to : A Collection of Papers in Mathematics and Related Sciences, a festschrift in honour of the late Galaye Dia 1

Chapter 1. Who was Galaye Dia (1941-2013), by Profs Gane Samb Lo and Aboubakary Diakhaby
  1. Introduction 6
  2. Scientific Career 6
  3. Professional career 8
  4. Services to the Mathematical Community 8
  5. List of publications and supervision 9

Part 1. ALGEBRA 13

Chapter 2. A conjecture of Hartshorne, by H. Seydi, T. H. Miabey and S. Maimouna. 15

Bibliography 19

Chapter 3. Le théorème inverse de Galois, by Hamet Seydi 21

Bibliography 31

Chapter 4. Points algébriques de degré donné sur la courbe de Picard, by Moussa FALL, Oumar SALL 33
  1. Introduction and motivations 34
  2. Results and proofs 35

Bibliography 41

Part 2. STATISTICS AND DATA SCIENCES 43

Chapter 5. Sine-Skewed Cardioid Distribution, by M. Ahsanullah 45
  1. Introduction 46
  2. Main Results 47

Bibliography 55
Chapter 6. On the Parameter Estimation by the Moment Method and Wald Type Test for Poisson Processes, by E. O. Accrachi, A. S. Dabye and A. A. Gounounk  
1. Introduction and motivations 58  
2. Results and proofs 59

Chapter 7. Bidimensional Asymptotic Normality of the Moving Kernel Poverty Index Estimate, by Y. Ciss and A. Diakhaby  
1. Introduction and definition of the estimator 76  
2. Asymptotic Normality 78  
3. Application 83  
4. Details of the Proofs 83

Chapter 8. Adaptive kernel density estimation of income distribution and poverty index, by Z. Baradine, Y. Ciss and A. Diakhaby  
1. Introduction and motivations 114  
2. Convergence of the estimator 117  
3. Simulations 120  
4. Details of the Proofs 120

Chapter 9. Stochastic volatility model through MCEM: Departure from canonical SV model, by M. M. Allaya and M. M. Kâ  
1. Introduction 142  
2. Framework 142  
3. Parameter estimation 143  
4. Calibration to data 145  
5. Departure from canonical sv model 152  
6. Conclusion 158

1. Introduction and motivation 164  
2. The asymptotic behavior of the Gini Index 176
A Collection of Papers in Mathematics and Related Sciences, a festschrift in honour of the late Galaye Dia (2018).

5. Conclusion 270

Bibliography 271

Chapter 15. The $\partial \bar{\partial}$-problem for extendable currents defined on a half space of $\mathbb{C}^n$, by M. Eramane Bodian, W. Ndiaye and S. Sambou 275
   1. Introduction 276
   2. Resolution of the equation $dS = T$ for a half space $\Omega$ of $\mathbb{R}^{n+1}$ 277
   3. Resolution of the $\partial \bar{\partial}$ for extendable currents in a half space of type $\{\text{Im}(z_n) < 0\} \subset \mathbb{C}^n$ 279

Bibliography 281

Chapter 16. The Riemann extension of an affine Osserman connection on 3-dimensional manifold, by A.S. Diallo 283
   1. Introduction 284
   2. Preliminaries 284
   3. Affine Osserman connections on 3-dimensional manifolds 288
   4. Nonflat pseudo-Riemannian Osserman metric of signature $(3,3)$ 290

Bibliography 293

   1. Introduction 296
   2. Preliminary 297
   3. Identification of the domain by conformal mapping method 298

Bibliography 317

Part 4. PROBABILITY AND RANDOM ANALYSIS 319

Chapter 18. General Central Limit Theorems for Associated Sequences, by H. Sangaré and G.S. Lo 321
   1. Introduction 322
   2. A brief Reminder of Association 323
   3. Central limit theorem for associated sequences 325
   4. Results and Commentaries 329

Bibliography 341
Chapter 19. Homogenization of semilinear periodic parabolic PDEs with Reflecting boundary condition, 
by A. Diedhiou, I. Sane, A. Coulibaly 343

1. Introduction 344
2. Preliminaries 345
3. Main result 360

Bibliography 361

Chapter 20. On proximity between spectral elements associated with periodic and almost periodic stationary processes, by E. N. Cabral 363

1. Introduction 364
2. Notation and recalls 365
3. Spectral elements associated with periodic stationary process 371
4. Almost periodic stationary process 376
5. Periodic and almost periodic PCA in the frequency domain 379
6. Conclusion 384

Bibliography 385

Chapter 21. Strong limits related to the oscillation modulus of the empirical process based on the k-spacing process, by G. S. Lo 387

1. Introduction and statement of the results 388
2. Technical lemmas 394
3. Proofs of the results 403

Bibliography 411

Chapter 22. Gaussian Approximations and Related Questions for the Spacings process, by G. S. Lo 413

1. Introduction 414
2. The Gaussian approximation. 415
3. The Glivenko-Cantelli Theorem 427
4. The oscillation moduli 429

Bibliography 435

Chapter 23. A Simple Round-up on the Validity of a.s Convergence after Partial Modification of the Probability Law and Application, by G.S. Lo 437

1. Introduction and Motivation 438
2. General conditions for validity of types of limits after a marginal change of the sequence 440
3. Other sufficient conditions for conservation of the a.s. limits 443
4. Main Problem 447
5. Appendix 450

Bibliography 465

**Part 5. MATHEMATICAL MODELLING** 467

1. Introduction 470
2. Model 472
3. Floquet theory 474
4. Averaging method 478
5. Conclusion 482

Bibliography 485

1. Introduction 488
2. About 2-D incompressible non-stationary Navier Stokes system 489
3. The proposed method: Projection method adapted to Navier-Stokes equations 495
4. Some concluding remarks and extensions 517

Bibliography 519

Chapter 26. Topological Optimization for Photonic and Phononic crystals problems, by M.B. Dia, I. Faye and A. Sy 523
1. Introduction and modeling 524
2. Modeling of crystal problems 525
3. Problem formulation and topological optimization 531
4. Application to photonics crystals problems and main result 534
5. Numerical simulations 542

Bibliography 557
Chapter 27. Numerical analysis of a corrector results in short term sand transport problem, by B. K. Thiam, M. M. T. Baldé, I. Faye and D. Seck

1. Introduction and results
2. Mathematical convergence and Homogenization
3. Two scale Numerical Method s
4. Numerical illustration

Bibliography

Chapter 28. Numerical simulations of sand transport problems, by C. Diédhiou, B. K. Thiam and I. Faye

1. Introduction and Results
2. Finite element method for Two scale limit
4. Comparison Numerical Solution of Two-scale limit and reference solution

Bibliography

Part 6. CRYPTOGRAPHY AND NUMBER THEORY

Chapter 29. A note on Encoding and Hashing into Elliptic and Hyperelliptic Curves, by N. Diarra, M. Seck and D. Sow

1. Introduction
2. Preliminaries
3. Overview of (Hyper)Elliptic Curves Encoding
4. Overview of Hashing into (Hyper)Elliptic Curves
5. Unified Formulas for Hashing into (Hyper)Elliptic Curves
6. Conclusion

Bibliography

Part 7. GENERAL MATHEMATICS

Chapter 30. Réflexion sur la relativité de l’égalité mathématique à travers les notions de nombre, fonction, ensemble et l’affectation algorithmique, by A. Maitournam

1. Introduction
2. Égalité mathématique entre nombres
3. Égalité mathématique entre fonctions
4. Égalité mathématique entre ensembles
5. Egalité mathématique et algorithmique 654
6. Conclusion 655

Bibliography 657
