

Abelian Surfaces with (1, 2)-Polarization

Wolf Barth

§ 0.1 Introduction

§ 0.2 Polarizations

§ 1. The (1, 2)-polarization

1.1 Divisors defining the polarization

1.2 The pencil $|\mathcal{L}|$ on A

1.3 Doubly elliptic curves

1.4 The surface Prym(D/E)

§ 2. The (2, 4)-polarization

2.1 The linear system $|\mathcal{L}^{\otimes 2}|$ and its symmetries

2.2 Quadrics Q_i through A of rank ≤ 4

2.3 Special quadrics Q_{EF} through A of rank ≤ 4

2.4 Quadratic equations for $A \subset P_7$

§ 3. The parameters

3.1 Symplectic automorphisms of $T(2, 4)$

3.2 Degenerations

3.3 Properties of the expressions r_{jk}

3.4 Theta-Null values

§ 4. Kummer surfaces

4.1 The hypernet

4.2 The dual Kummer surface $K^\vee = \text{Km } A^\vee$

4.3 The Kummer surface $K = \text{Km } A$

§ 5. Haine's theorem

5.1 The pencil of odd sections

5.2 The complete intersection surface $A_c \subset P_6$

5.3 The elliptic curve $E \subset P_3$

§ 6. Comments
