

## Yang-Mills Connections and Einstein-Hermitian Metrics

Mitsuhiro Itoh and Hiraku Nakajima\*

### Table of Contents

#### Introduction

#### Chapter 1. Notation and Preliminaries

- §1.1. Yang-Mills functional and Yang-Mills connections
- §1.2. Self-dual connections
- §1.3. Einstein-Hermitian connections
- §1.4. Moment maps

#### Chapter 2. Local Geometries of Moduli Spaces

- §2.1. Smooth structure on moduli spaces
- §2.2. Complex Kähler structure on moduli spaces
- §2.3. Hyperkähler structure on moduli spaces

#### Chapter 3. Twistor Theory and Yang-Mills Connections

- §3.1. Yang-Mills connections on self-dual manifolds
- §3.2.  $B_2$ -connections on quaternionic Kähler manifolds

#### Chapter 4. Analysis for Yang-Mills Equations

- §4.1. A priori estimates for Yang-Mills connections
- §4.2. Removable singularities theorem
- §4.3. Examples of convergence of Yang-Mills connections

#### Chapter 5. Existence Theorems for Yang-Mills Connections

- §5.1. Anti-self-dual connections on 4-manifolds
- §5.2. Einstein-Hermitian connections on stable vector bundles

#### Chapter 6. Vector Bundles over Moduli Spaces

- §6.1. Universal connections
- §6.2. Determinant line bundles
