

CONTENTS

Hiroshi SUZUKI — Abundant Central Extensions and Genus Fields	1
Hiroshi SUZUKI — A Tripling Symbol for Central Extensions of Algebraic Number Fields	9
Yoshinobu NAKAI — On Diophantine Inequalities of Real Indefinite Quadratic Forms of Additive Type in Four Variables	25
Masao KOIKE and Yoshio TANIGAWA — A_4 -Extensions over Real Quadratic Fields and Hecke Operators	171
Eiji YOSHIDA — On an Application of Zagier's Method in the Theory of Selberg's Trace Formula	193
Akio FUJII — Some Problems of Diophantine Approximation and a Kronecker's Limit Formula	215
Akio FUJII — Arithmetic of Some Zeta Function Connected with the Eigenvalues of the Laplace-Beltrami Operator	237
Noburo ISHII — Quadratic Units and Congruences between Hilbert Modular Forms	261
Tomio KUBOTA — On a Classical Theta-Function, II	277
Shuji KONNO — On Kronecker's Limit Formula for Certain Biquadratic Fields	297
Eiji YOSHIDA — Selberg Trace Formula for a Certain Group Generated by $PSL(2, Z[i])$ and a Reflection	313
Susumu SHIRAI — On the Decomposition Laws of Rational Primes in Certain Class 2 Extensions	345
Noburo ISHII — On the Eighth Power Residue of Totally Positive Quadratic Units	413
Yoshiyuki KITAOKA — Local Densities of Quadratic Forms	433
Ken NAKAMULA — A Table for Pure Cubic Fields	461
Katsumi SHIRATANI — On Generalized Periods of Cusp Forms	479
Hideo YOKOI — Some Relations among New Invariants of Prime Number p Congruent to 1 mod 4	493
Toyokazu HIRAMATSU — Theory of Automorphic Forms of Weight 1	503
Hideo SHIMIZU — The Space of Eisenstein Series in the Case of GL_2	585
