

CONTENTS

Mladen BESTVINA — Homological stability of $Aut(F_n)$ revisited	1
Brian H. BOWDITCH — One-ended subgroups of mapping class groups	13
Martin R. BRIDSON and Henry WILTON — On the recognition problem for virtually special cube complexes	37
Jeffrey BROCK and Kenneth BROMBERG — Geometric inflexibility of hyperbolic cone-manifolds	47
Danny CALEGARI — Dipoles and pixie dust	65
Suhyoung CHOI — A classification of radial or totally geodesic ends of real projective orbifolds I: a survey of results	69
François DAHMANI — On suspensions, and conjugacy of a few more automorphisms of free groups	135
Daniel GROVES and Michael HULL — Abelian splittings of right-angled Artin groups	159
Yoshikata KIDA — Splitting in orbit equivalence, treeable groups, and the Haagerup property	167
Sang-hyun KIM and Thomas KOBERDA — RAAGs in Diffeos	215
Athanase PAPADOPOULOS and Weixu SU — On hyperbolic analogues of some classical theorems in spherical geometry	225
Piotr PRZYTYCKI and Alessandro SISTO — A note on acylindrical hyperbolicity of Mapping Class Groups	255
Karen VOGTMANN — Contractibility of Outer space: reprise	265
