

# Program

## 17 (Fri)/July

- Craw, Alastair (Bath) Punctual Hilbert schemes of Kleinian singularities
- Heuberger, Liana (Loughborough/Angers) Combinatorial Reid's Recipe for Dimer Models
- Kubota, Ayako (Waseda) On the G-Hilbert scheme of the closure of the regular nilpotent orbit of type A
- Yasuda, Takehiko (Osaka) The motivic McKay correspondence in arbitrary characteristics
- (Poster) Tanno, Mahito (Osaka) The wild McKay correspondence for  $Z/p^n Z$  and its application

Free discussion 21:00 ~ 23:00 JST

## 24 (Fri)/July

- August, Jenny (MPIM) Stability and McKay
- Faber, Eleonore (Leeds) Complex reflection groups, their McKay quivers, and the McKay correspondence
- Schroll, Sibylle (Leicester) Grassmannian categories of infinite rank from hypersurface singularities
- Wemyss, Michael (Glasgow) Tits Cone Intersections and Applications
- (Poster) van Garderen, Okke (Glasgow) Donaldson-Thomas invariants and flopping contractions
- (Poster) Yurikusa, Toshiya (Tohoku) Dense g-vector fans for tame algebras

Free discussion 21:00 ~ 23:00 JST

## 31 (Fri)/July

- Anno, Rina (Kansas State) Nil Hecke bimodule categories
- Batyrev, Victor (Tuebingen) On the stringy E-functions of minimal models
- Donovan, Will (Tsinghua) Windows on the Pfaffian-Grassmannian correspondence
- Hanany, Amihay (Imperial) Quivers for Hypersurface Symplectic Singularities
- Logvinenko, Timothy (Cardiff) McKay correspondence and perverse sheaves
- Yamagishi, Ryo (Kavli IPMU) Crepant resolutions and moduli of G-constellations for abelian groups

Free discussion 21:00 ~ 23:00 JST
