

INDEX OF DEFINITIONS

- abstraction, 25
 - functional \dashv , 288
- action
 - empty \dashv , 117
 - \dashv of a monoid, 100
 - \dashv -preserving function, 101
- actual existence, 274
- addition
 - \dashv on ω , 335
 - \dashv on N , 337
- adjoint
 - left \dashv , 439
 - right \dashv , 439
 - \dashv -situation, 438.
- adjunction, 439
 - co-unit of \dashv , 440
 - \dashv in posets, 446
 - unit of \dashv , 440
- algebra
 - \dashv of classes, 125
 - Boolean \dashv , 134
 - Brouwerian \dashv , 178
 - closure \dashv , 178
 - Heyting \dashv , 183
- alphabet
 - for PL, 129
 - for elementary languages, 234
- and-Or map, 420
- antecedent, 132
- antisymmetric, 29
- apartness, 425
- appropriate
 - \dashv to ϕ , 239, 484
 - \dashv to t , 484
- arrow, 23, 24
 - \dashv -category, 34
 - \dashv in Ω -Set, 277
 - name of \dashv , 78
 - partial \dashv , 268
 - strong \dashv , 395
 - weak \dashv , 395
- Associative Law, 21, 24
- atom, 481
- atomic
 - \dashv -formula, 234
 - \dashv -sentence, 483
- axiom of
 - choice, 290–301, 312
 - extensionality, 307
 - infinity, 311
 - null set, 308
 - order-completeness, 421
 - pairs, 308
 - partial transitivity, 330
 - patching for sheaves (COM), 362, 376, 391
 - powersets, 308
 - regularity, 312
 - replacement, 312
 - separation, 308
 - transitive representation, 328
 - transitivity, 314
 - unions, 308
- axioms for
 - CL, 131, 237, 238
 - continuous functions, 427
 - Dedekind cuts, 415, 423, 427, 430
 - geometric modality, 382
 - GL, 497
 - identity, 238
 - IL, 177, 249
 - propositional logic, 131
 - quantifiers, 238
 - set theory, 307ff.
- bar, 193
- Barr's Theorem, 482, 495
- Beth model, 193, 388
- bi-complete, 69, 466, 469
- biconditional, 274
- bijjective, 39
- bivalent, 118
- Boolean
 - \dashv -algebra, 134
 - \dashv -topos, 156
- bound variable, 235
- bounded
 - \dashv -lattice, 133
 - \dashv -separation, 309
