|--|-----------|
| Preface | v |
| 1 Introduction | 1 |
| 1.1 Definition | 1 |
| 1.2 BNP Models for Random Probability Measures | 2 |
| 1.2.1 Species Sampling Models | 2 |
| 1.2.2 Stick Breaking Prior | 4 |
| 1.2.3 Product Partition Models | 5 |
| 1.2.4 Pólya Trees | 6 |
| 1.2.5 DDP | 7 |
| 1.2.6 Completely Random Measures | 7 |
| 1.2.7 NTR Priors | 8 |
| 1.2.8 Indian Buffet Process | 9 |
| 1.3 BNP Models for Random Functions | 10 |
| 1.3.1 Gaussian Process | 10 |
| 1.3.2 Models Based on Basis Representations | 12 |
| 1.3.3 Basis Representation and Gaussian Process Priors | 14 |
| 2 Data Analysis | 15 |
| 2.1 Density Estimation and Survival Analysis | 15 |
| 2.2 Regression | 16 |
| 2.2.1 Non-Parametric Residuals | 16 |
| 2.2.2 Non-Parametric Mean Function | 17 |
| 2.2.3 Fully Non-Parametric Regression | 18 |
| 2.3 Mixed Effects Models | 18 |
| 2.4 Clustering and Classification | 19 |
| 2.5 Computation | 20 |
| 3 Dirichlet Process | 23 |
| 3.1 The Dirichlet Process Prior | 23 |
| 3.1.1 Definition | 23 |
| 3.1.2 Properties | 24 |
| 3.2 DP Mixtures | 27 |
| 3.3 Posterior Simulation for DP Mixture Models | 28 |
| 3.3.1 Collapsed Gibbs Samplers | 29 |
| 3.3.2 Slice Samplers | 33 |
| 3.3.3 Retrospective Samplers | 34 |
| 3.3.4 Other Computational Approaches | 36 |
| 3.4 The Finite DP | 36 |
| 3.5 Mixtures of DP | 38 |
| 3.6 Functionals of DPs | 38 |
| 3.6.1 Inference for Non-linear Functionals of DP | 38 |
| 3.6.2 Centering the DP | 40 |
