

## CONTENTS.

	Page.
Preface ... ..	III
Bibliography ... ..	XIII
1. Introduction ... ..	3
2. The Two Interpretations of the Logical Calculus ... ..	3
3. Relation of Inclusion ... ..	4
4. Definition of Equality ... ..	6
5. Principle of Identity ... ..	8
6. Principle of the Syllogism ... ..	8
7. Multiplication and Addition ... ..	9
8. Principles of Simplification and Composition ... ..	11
9. The Laws of Tautology and of Absorption ... ..	12
10. Theorems on Multiplication and Addition ... ..	14
11. The First Formula for Transforming Inclusions into Equalities	15
12. The Distributive Law ... ..	16
13. Definition of 0 and 1 ... ..	17
14. The Law of Duality ... ..	20
15. Definition of Negation ... ..	21
16. The Principles of Contradiction and of Excluded Middle ...	23
17. Law of Double Negation ... ..	24
18. Second Formula for Transforming Inclusions into Equalities	25
19. Law of Contraposition ... ..	26
20. Postulate of Existence ... ..	27
21. The Developments of 0 and of 1 ... ..	28
22. Properties of the Constituents ... ..	29
23. Logical Functions ... ..	29
24. The Law of Development ... ..	30
25. The Formulas of De Morgan .. ..	32
26. Disjunctive Sums .. ..	34
27. Properties of Developed Functions ... ..	34
28. The Limits of a Function ... ..	37
29. Formula of Poretsky ... ..	38
30. Schröder's Theorem ... ..	39
31. The Resultant of Elimination ... ..	41
32. The Case of Indetermination ... ..	43
