

GENERAL INDEX

- \Box -fragment of modal logic K, 121
- 1-equivalential logic, 71
- abstract logic, 17
 - reduced, 23
- adequate, 78
 - fully, 81
 - strongly, 81
- Adjunction, rule of, 122
- algebra, 15
 - of formulas, 15
- algebraizable Gentzen system, 84
- algebraizable logic, 60
 - regularly, 71
 - strongly, 93
 - weakly, 66
- almost inconsistent logic, 60
- Andréka, H., 66
- Axiom, 76
- axiom scheme, 26
- axiomatic extension, 18
- axiomatic extensions of K, 118

- Barcelona, 4, 6, 14
- basic full model, 34
- BCK logic, 105
- Belnap, N.D.(jr.), 111
- Belnap's four-valued logic, 111, 125

- biological morphism, 20
- Blok, W.J., 1, 2, 5, 10, 14, 16, 25, 29, 59, 60, 66, 75, 83, 84, 94
- Boolean algebra, 116
 - finite, 108
 - monadic, 118
 - topological, 118
- Brown, D.J., 5, 20

- category, 44, 49
- classical logic, 62
 - equivalential fragment, 106
 - implicative fragment, 115
- classical propositional logic, 116
- Classical Reductio ad Absurdum, 55
- closed set
 - of a Gentzen system, 79
 - of an abstract logic, 17
- closure algebra, 118
- closure operator, 17
 - finitary, 17
 - structural, 26
- closure system, 17
 - inductive, 17
- compatibility property, 59
- compatible congruence, 16
- complete, 30, 32
- Completeness Theorem, 30, 38, 79
