<b>Preface</b>	
<i>Evarist Giné, Vladimir Koltchinskii, Wenbo Li, Joel Zinn</i> . . . . .	v
<b>Contributors</b>	
. . . . .	vii
<b>DEPENDENCE, MARTINGALES</b>	
<b>Stochastic integrals and asymptotic analysis of canonical von Mises statistics based on dependent observations</b>	
<i>Igor S. Borisov and Alexander A. Bystrov</i> . . . . .	1
<b>Invariance principle for stochastic processes with short memory</b>	
<i>Magda Peligrad and Sergey Utev</i> . . . . .	18
<b>Binomial upper bounds on generalized moments and tail probabilities of (super)martingales with differences bounded from above</b>	
<i>Iosif Pinelis</i> . . . . .	33
<b>Oscillations of empirical distribution functions under dependence</b>	
<i>Wei Biao Wu</i> . . . . .	53
<b>STOCHASTIC PROCESSES</b>	
<b>Karhunen–Loève expansions of mean-centered Wiener processes</b>	
<i>Paul Deheuvels</i> . . . . .	62
<b>Fractional Brownian fields, duality, and martingales</b>	
<i>Vladimir Dobrić and Francisco M. Ojeda</i> . . . . .	77
<b>Risk bounds for the non-parametric estimation of Lévy processes</b>	
<i>José E. Figueroa-López and Christian Houdré</i> . . . . .	96
<b>Random walk models associated with distributed fractional order differential equations</b>	
<i>Sabir Umarov and Stanly Steinberg</i> . . . . .	117
<b>Fractal properties of the random string processes</b>	
<i>Dongsheng Wu and Yimin Xiao</i> . . . . .	128
<b>OPERATORS IN HILBERT SPACE</b>	
<b>Random sets of isomorphism of linear operators on Hilbert space</b>	
<i>Roman Vershynin</i> . . . . .	148
<b>EMPIRICAL PROCESSES</b>	
<b>Revisiting two strong approximation results of Dudley and Philipp</b>	
<i>Philippe Berthet and David M. Mason</i> . . . . .	155
<b>Modified empirical CLT's under only pre-Gaussian conditions</b>	
<i>Shahar Mendelson and Joel Zinn</i> . . . . .	173
<b>Empirical and Gaussian processes on Besov classes</b>	
<i>Richard Nickl</i> . . . . .	185
<b>On the Bahadur slope of the Lilliefors and the Cramér–von Mises tests of normality</b>	
<i>Miguel A. Arcones</i> . . . . .	196
