

# Contents

<b>Preface</b>	
<i>Dee Denteneer, Frank den Hollander, Evgeny Verbitskiy</i> . . . . .	vii
<b>PERCOLATION AND INTERACTING PARTICLE SYSTEMS</b>	
<b>Polymer pinning in a random medium as influence percolation</b>	
<i>V. Beffara, V. Sidoravicius, H. Spohn and M. E. Vares</i> . . . . .	1
<b>Proof of a conjecture of N. Konno for the 1D contact process</b>	
<i>J. van den Berg, O. Häggström and J. Kahn</i> . . . . .	16
<b>Uniqueness and multiplicity of infinite clusters</b>	
<i>Geoffrey Grimmett</i> . . . . .	24
<b>A note on percolation in cocycle measures</b>	
<i>Ronald Meester</i> . . . . .	37
<b>RANDOM WALKS</b>	
<b>On random walks in random scenery</b>	
<i>F. M. Dekking and P. Liardet</i> . . . . .	47
<b>Random walk in random scenery: A survey of some recent results</b>	
<i>Frank den Hollander and Jeffrey E. Steif</i> . . . . .	53
<b>Linearly edge-reinforced random walks</b>	
<i>Franz Merkl and Silke W. W. Rolles</i> . . . . .	66
<b>Recurrence of cocycles and stationary random walks</b>	
<i>Klaus Schmidt</i> . . . . .	78
<b>RANDOM PROCESSES</b>	
<b>Heavy tail properties of stationary solutions of multidimensional stochastic recursions</b>	
<i>Yves Guivarc'h</i> . . . . .	85
<b>Attractiveness of the Haar measure for linear cellular automata on Markov subgroups</b>	
<i>Alejandro Maass, Servet Martínez, Marcus Pivato and Reem Yassawi</i> . . . . .	100
<b>Weak stability and generalized weak convolution for random vectors and stochastic processes</b>	
<i>Jolanta K. Misiewicz</i> . . . . .	109
<b>Coverage of space in Boolean models</b>	
<i>Rahul Roy</i> . . . . .	119
<b>RANDOM FIELDS</b>	
<b>Strong invariance principle for dependent random fields</b>	
<i>Alexander Bulinski and Alexey Shashkin</i> . . . . .	128
<b>Incoherent boundary conditions and metastates</b>	
<i>Aernout C. D. van Enter, Karel Netočný and Hendrikjan G. Schaap</i> . . . . .	144
<b>Markovianity in space and time</b>	
<i>M. N. M. van Lieshout</i> . . . . .	154
