ACKNOWLEDGEMENT

The editors are grateful to the Francqui Foundation of Belgium for financial support for this volume.

Stephen M. Samuels (Purdue) and Lloyd Shapley (UCLA) made some helpful suggestions for this volume. Beatriz Ferguson helped us with some personal data about Tom and kindly kept our project secret! We would also like to thank Elyse Gustafson of the IMS and Peggy Leroy of the ULB Brussels for editorial help.

Our warmest thanks go to the referees of the papers. Without their important contribution this special volume would not have been possible. We have been trying hard to obtain quality refereeing, and so we were determined to have a vast majority of referees who did not contribute to this volume. To all those our particular appreciation!
