

Contents

1	Introduction	1
1.1	From classical solutions to weak solutions	2
1.2	Typical examples of weak solutions	4
1.2.1	Burgers' equation	4
1.2.2	Hamilton-Jacobi equation	6
2	Definition	9
2.1	Vanishing viscosity method	9
2.2	Equivalent definitions	17
3	Comparison principle	23
3.1	Classical comparison principle	24
3.1.1	Degenerate elliptic PDEs	24
3.1.2	Uniformly elliptic PDEs	24
3.2	Comparison principle for first-order PDEs	26
3.3	Extension to second-order PDEs	31
3.3.1	Degenerate elliptic PDEs	33
3.3.2	Remarks on the structure condition	35
3.3.3	Uniformly elliptic PDEs	38
4	Existence results	40
4.1	Perron's method	40
4.2	Representation formulas	45
4.2.1	Bellman equation	46
4.2.2	Isaacs equation	51
4.3	Stability	58
5	Generalized boundary value problems	62
5.1	Dirichlet problem	65
5.2	State constraint problem	68
5.3	Neumann problem	72
5.4	Growth condition at $ x \rightarrow \infty$	75
