

Index

- B -equivalent, 180
- B -pattern, 23, 88
 - nonsingular, 89
 - principal extension, 105
 - skew-symmetric, 89
 - transpose of, 101
- C -matrix, 53, 90
- C -pattern, 53, 90
- F -pattern, 56, 93
- F -polynomial, 56, 93
- G -chamber, 251
- G -complex, 162
- G -cone, 107, 251
- G -fan, 60, 108, 251
- G -matrix, 55, 91
- G -pattern, 55, 91
- S_n -action (on seeds), 20
- Y -pattern, 22
- Y -seed, 16
- \hat{C} -matrix, 97
- \hat{c} -vector, 97
- \hat{y} -variable, 17, 87
 - tropical, 96
- ε -expression, 19, 88
 - for C -matrices, 53, 91
 - for G -matrices, 56, 93
- c -vector, 53, 90
- d -vector, 41, 96
- g -vector, 55, 92
- g -vector fan, *see* G -fan
- k -adjacent, 22, 88
- p -exchangeable pair, 219
- x -representation, 175
 - principal, 215
- x -variable (cluster variable), 86, 169
 - tropical, 96
- y -representation, 173
- y -variable (coefficient), 86, 169
 - tropical, 95
- admissible curve, 184
- admissible region, 249
- ambient field, 16, 86
- Badlands, 141, 211, 256
- Baker-Campbell-Hausdorff (BCH) formula, 171
- broken line, 150, 257
- Cartan counterpart, 39
- Cartan matrix, 38
 - of finite type, 40
- chamber, 119, 250
 - G -, 251
- cluster, 16
 - extended, 44
- cluster algebra, 23, 89
 - of finite type, 40
 - lower bound, 65
 - of geometric type, 42
 - upper, 65
 - upper bound, 65
- cluster complex, 162
- cluster element, 205
- cluster monomial, 153
- cluster pattern, 22
 - of finite type, 40
 - isomorphic, 41
 - of finite type, 109
 - of geometric type, 42
 - strongly isomorphic, 41
 - with principal coefficients, 52
 - without coefficients, 22
- cluster scattering diagram (CSD), 138, 205
- cluster variable, 16
 - frozen variable, 44
 - non-initial, 41
- coefficient, 16
 - free, 32
 - principal, 52
 - tuple, 16
- cone, 106, 183
 - G -, 107, 251
 - convex rational polyhedral, 106, 183
 - dual, 106
 - nonsingular, 106
 - positive/negative, 192
 - simplicial, 106
 - strongly convex, 106, 183
- coprime
 - for Laurent polynomials, 35
 - for seeds, 66
- Coxeter number, 32
- CSD, *see* cluster scattering diagram
- decomposition of G
 - at z , 190
