TABLE OF CONTENTS

(The sections marked with an asterisk have been herein added to the content of the first edition)

			Page
I	LINE	AR ALGEBRA	1
	A. B. C. D. E. F.*	Fields Vector Spaces Homogeneous Linear Equations Dependence and Independence of Vectors Non-homogeneous Linear Equations Determinants	1 1 2 4 9 11
II	FIELI	THEORY	21
	A. B. C. D. E.	Extension Fields	21 22 25 30
	F. G.* H. I. J. K. L. M. O.	into Irreducible Factors Group Characters Applications and Examples to Theorem 13 Normal Extensions Finite Fields Roots of Unity Noether Equations Kummer's Fields Simple Extensions Existence of a Normal Basis Theorem on Natural Irrationalities	33 34 38 41 49 56 57 59 64 66 67
III		ICATIONS By A. N. Milgram	69
	A. B. C. D. E.	Solvable Groups	69 70 72 74 76 80
