

CONTENTS

INTRODUCTION	iv
NOTATION	vii
CHAPTER 1 : PRELIMINARY MEASURE THEORY	1
§1. Basic Notions	1
§2. Hausdorff Measure	6
§3. Densities	10
§4. Radon Measures	17
CHAPTER 2 : SOME FURTHER PRELIMINARIES FROM ANALYSIS	29
§5. Lipschitz Functions	29
§6. BV Functions	34
§7. Submanifolds of \mathbb{R}^{n+k}	40
§8. The Area Formula	46
§9. First and Second Variation Formulae	48
§10. The Co-area Formula	53
CHAPTER 3 : COUNTABLY n -RECTIFIABLE SETS	58
§11. Basic Notions, Tangent Properties	58
§12. Gradients, Jacobians, Area, Co-area	66
§13. The Structure Theorem	70
§14. Sets of Locally Finite Perimeter	71
CHAPTER 4 : THEORY OF RECTIFIABLE n -VARIFOLDS	77
§15. Basic Definitions and Properties	77
§16. First Variation	80
§17. Monotonicity Formulae and Basic Consequences	82
§18. Poincaré and Sobolev Inequalities	89
§19. Miscellaneous Additional Consequences of the Monotonicity Formulae	95
